FOR AMERICAN ARCHAEOLOGY

OFFICERS OF THE SOCIETY FOR AMERICAN ARCHAEOLOGY

- President:* PAUL S. MARTIN, Chicago Natural History Museum, Chicago, Ill.
- President-elect:* JOE BEN WHEAT, University of Colorado Museum, Boulder, Colo.
- Secretary:* E. MOTT DAVIS, Department of Anthropology, University of Texas, Austin, Tex.
- Treasurer:* NATHALIE F. S. WOODBURY, U.S. National Museum, Washington, D.C.
- Editor:* T. N. CAMPBELL, Department of Anthropology, University of Texas, Austin, Tex.
- Editor-elect:* ROBERT E. BELL, Department of Anthropology, University of Oklahoma, Norman, Okla.
- Executive Committee Members:* JOHN M. CORBETT (to 1967), National Park Service, Washington, D.C.; RICHARD S. MACNEISH (to 1966), Department of Anthropology, University of Alberta at Calgary, Calgary, Alta.; MOREAU S. MAXWELL (to 1966), Department of Anthropology, Michigan State University, East Lansing, Mich.; and WILLIAM MULLOY (to 1967), Department of Economics, Sociology, and Anthropology, University of Wyoming, Laramie, Wyo.

EDITORIAL STAFF OF AMERICAN ANTIQUITY

- Editor:* T. N. CAMPBELL, Department of Anthropology, University of Texas, Austin, Tex.
- Associate Editor for Reviews:* ROBERT E. BELL, Department of Anthropology, University of Oklahoma, Norman, Okla.
- Associate Editor for Current Research:* CHARLES E. BORDEN, Laboratory of Archaeology, University of British Columbia, Vancouver, British Columbia.
- Assistant Editors for Current Research:* ARCTIC—JOHN M. CAMPBELL, Department of Anthropology, University of New Mexico, Albuquerque, N. Mex.; CALIFORNIA—FRANCIS A. RIDDELL, History Section, State Division of Beaches and Parks, Box 2390, Sacramento, Calif.; CARIBBEAN—RIPLEY P. BULLEN, Florida State Museum, Gainesville, Fla.; CENTRAL AMERICA—WOLFGANG HABERLAND, Hamburgisches Museum für Völkerkunde und Vorgeschichte, Binderstrasse 14, Hamburg 13, Germany; EASTERN MESOAMERICA—GARETH W. LOWE, Brigham Young University-New World Archaeological Foundation, 13a Calle Poniente No. 2, Tuxtla Gutierrez, Chiapas, Mexico; GREAT BASIN—WILBUR A. DAVIS, Department of Anthropology, University of Nevada, Reno, Nev.; HIGHLAND SOUTH AMERICA—THOMAS C. PATTERSON, Department of Anthropology, Harvard University, Cambridge, Mass.; LOWLAND SOUTH AMERICA—BETTY J. MEGGERS, U.S. National Museum, Washington, D.C.; NORTHEAST—JOHN L. COTTER, Region Five, National Park Service, 143 South 3rd St., Philadelphia, Pa.; NORTHERN MISSISSIPPI VALLEY—ROBERT L. HALL, Illinois State Museum, Springfield, Ill.; NORTHWEST—RICHARD D. DAUGHERTY, Department of Sociology and Anthropology, Washington State University, Pullman, Wash.; PLAINS—ROBERT W. NEUMAN, River Basin Surveys, 1835 P St., Lincoln, Neb.; SOUTHEAST—HESTER A. DAVIS, University of Arkansas Museum, Fayetteville, Ark.; SOUTHWEST—DAVID A. BRETERNITZ, Department of Anthropology, University of Colorado, Boulder, Colo.; WESTERN MESOAMERICA—JOHN PADDOCK, Department of Anthropology, University of the Americas, Km. 16 Carretera México-Toluca, México 10, D.F.

Editorial Assistant: LORENE G. CAMPBELL, 2209 Quatty Road, Austin, Tex.

AMERICAN ANTIQUITY publishes original papers on the archaeology of the New World and closely related subjects. Articles and "Facts and Comments" should be submitted to the Editor, publications for review to the Associate Editor for Reviews, and information for "Current Research" to the appropriate Assistant Editor for Current Research. Contributors to AMERICAN ANTIQUITY should consult "Information for Authors," which is published at least once a year. AMERICAN ANTIQUITY is not available for exchange.

AMERICAN ANTIQUITY is published quarterly in July, October, January, and April by the Society for American Archaeology at the University of Utah Printing Service, Salt Lake City, Utah 84112. Entered as second-class matter June 1, 1951, at the Post Office, Salt Lake City, Utah, under the Act of March 3, 1879. Subscription is by membership in the Society for American Archaeology. Annual dues for individual members are \$10.00; for institutional members, \$12.00. Both types of members receive AMERICAN ANTIQUITY and other regular publications of the Society as issued. Address requests for membership or other information to the Secretary. Send instructions for change of address to Society for American Archaeology, 1530 P Street, N.W., Washington, D.C., 20005. See inside back cover for information on ordering back issues of AMERICAN ANTIQUITY and other publications of the Society that are still in print.

Contents

	<i>Page</i>
1. INTRODUCTION	DOUGLAS OSBORNE 1
2. ANTHROPOLOGY	
An Early Occupied Cave: Site 1205	ALDEN C. HAYES 5
Mummy Lake Gray:	
A New Pottery Type ..	ARTHUR H. ROHN AND JERVIS D. SWANNACK, JR. 14
Edge-abraded Flakes, Blades, and Cores in the Puebloan Tool Assemblage	RICHARD P. WHEELER 19
Chipping Remains as an Indication of Cultural Change at Wetherill Mesa	DOUGLAS OSBORNE 30
The Preparation of Yucca Fiber:	
An Experimental Study	CAROLYN M. OSBORNE 45
A Large Hewn Plank from Mesa Verde, Colorado ...	ROBERT F. NICHOLS 51
Evidence of Prehistoric Cultivation of Douglas-fir Trees at Mesa Verde	ROBERT F. NICHOLS AND DAVID G. SMITH 57
Postulation of Socio-economic Groups from Archaeological Evidence	ARTHUR H. ROHN 65
The Pueblos and the Turkey:	
Who Domesticated Whom?	JEAN M. PINKLEY 70
Ute Linguistics and Anasazi Abandonment of the Four Corners Area	JAMES A. GOSS 73
Phantoms in the Pinyon: An Investigation of Ute-Pueblo Contacts	JOYCE KAYSER 82
3. THE NATURAL SCIENCES	
The Mesa Verde Loess	GUSTAF ARRHENIUS AND ENRICO BONATTI 92
The Biological Model for Paleoclimatic Interpretation of Mesa Verde Tree-ring Series	HAROLD C. FRITTS, DAVID G. SMITH, AND MARVIN A. STOKES 101
Pollen and Archaeology at Wetherill Mesa	PAUL S. MARTIN AND WILLIAM BYERS 122
Corn and Cucurbits from Wetherill Mesa	HUGH C. CUTLER AND WINTON MEYER 136
Beans of Wetherill Mesa	LAWRENCE KAPLAN 153

	Page
Archaeological Bird Bones from Chapin Mesa, Mesa Verde National Park	LYNDON L. HARGRAVE 156
Turkey Bones from Wetherill Mesa	LYNDON L. HARGRAVE 161
Entomology: An Aid in Archaeological Studies	SAMUEL A. GRAHAM 167
Parasitological Study of Long-dried Fecal Samples	ROBERT SAMUELS 175
 4. TECHNIQUES	
Trials of the ELSEC Proton Magnetometer at Two Sites on Wetherill Mesa	RICHARD B. JOHNSTON 180
The Feasibility of Micro-analysis in Southwestern Archaeological Sites	RICHARD H. BROOKS 182
Screening Soil and Fecal Samples for Recovery of Small Specimens	MARILYN COLYER AND DOUGLAS OSBORNE 186
Biological Techniques in Archaeology	CHARLES L. DOUGLAS 193
Identification of Feather Fragments by Microstudies	LYNDON L. HARGRAVE 202
Methods Used for Identification of Feather Remains from Wetherill Mesa	NORMAN G. MESSINGER 206
Three Applications of Edge-punched Cards for Recording and Analyzing Field Data	EMMA LOU DAVIS 216
The View Camera in Archaeological Photography	FRED E. MANG, JR. 227

TABLES

<i>Wheeler: Edge-abraded Flakes, Blades, and Cores in the Puebloan Tool Assemblage</i>		Page
Number		
1	Edge-abraded and other utilized flakes, blades, and cores from sites on Wetherill Mesa	20
2	Dimensions of flakes, blades, and cores from Wetherill Mesa sites	24
3	Stage/age assignment of edge-abraded flakes from sites on Wetherill Mesa	25
4	Stage/age assignment of edge-abraded blades and cores from sites on Wetherill Mesa	26
5	Stage/age assignment of edge-abraded flakes and blades from sites on Chapin Mesa	27
 <i>D. Osborne: Chipping Remains as an Indication of Cultural Change at Wetherill Mesa</i>		
1	Frequencies of cores and flakes in Wetherill Mesa sites	35
2	Percentages of cores at Wetherill Mesa sites	37
3	Percentages of flakes at Wetherill Mesa sites	38
 <i>Nichols: A Large Hewn Plank from Mesa Verde, Colorado</i>		
1	Comparison of some larger planks from Southwestern sites	55

*Nichols and Smith: Evidence of Prehistoric Cultivation of
Douglas-fir Trees at Mesa Verde*

Number		Page
1	Tree-ring dates for three old Douglas-firs	63

Goss: Ute Linguistics and Anasazi Abandonment of the Four Corners Area

1	Comparison of 100-word Swadesh lists for Southern Paiute and Ute	78
---	--	----

*Fritts, Smith, and Stokes: The Biological Model for Paleoclimatic
Interpretation of Mesa Verde Tree-ring Series*

1	Number of live and dead pinyon pine roots per square inch of exposed soil, Mesa Verde National Park	108
2	Selected statistical characteristics of tree-ring chronologies from four balanced samples, Mesa Verde National Park	109
3	Per cent variance components calculated from estimated mean squares for four balanced tree-ring samples, Mesa Verde National Park	111
4	Final adjusted multiple correlation coefficients obtained in analysis of four selected tree-ring samples using different climatic variables, Mesa Verde National Park	112
5	Final stepwise regression equations for predicting indices of four samples by using precipitation and maximum temperature data, Mesa Verde National Park	113
6	Variance analyses for final stepwise regressions of ring indices against weather data, Mesa Verde National Park	114
7	Calculated effect of departure from the mean for precipitation and temperature during selected intervals throughout the year on tree-ring indices in per cent	116
8	Climatic conditions which produce narrow rings in three species at Mesa Verde National Park	119

Martin and Byers: Pollen and Archaeology at Wetherill Mesa

1	Proposed correlation of pollen units at Wetherill Mesa	125
---	--	-----

Cutler and Meyer: Corn and Cucurbits from Wetherill Mesa

1	Corn and <i>Cucurbita</i> from Step House	143
2	Corn and <i>Cucurbita</i> from Long House	144
3	Corn and <i>Cucurbita</i> from selected rooms and areas of Mug House	147
4	Corn and <i>Cucurbita</i> from Mesa Verde sites	148
5	Per cent of cobs of each row number found in selected sites and levels	149
6	Analyses of cobs from selected Southwestern sites	149

Kaplan: Beans of Wetherill Mesa

1	Frequencies of bean samples from Wetherill Mesa	155
2	Occurrences of Wetherill Mesa beans at other locales	155

ILLUSTRATIONS

<i>Figure</i>	<i>Hayes: An Early Occupied Cave: Site 1205</i>	<i>Page</i>
1	Map showing location of Site 1205 on Wetherill Mesa	6
2	View of Site 1205 from north	6
3	Ground plan, Site 1205	7
4	Profile at Site 1205	8
5	Profile at Site 1205	9
6	Stone and bone artifacts from Site 1205	9
7	Pottery from Strata A and B, Site 1205	10
8	Black-on-white bowls with burial in Stratum B, Site 1205	11
9	Notched hammer and mano from Stratum B, Site 1205	12
10	Retaining wall at rear of cave, Site 1205	12
<i>Rohn and Swannack: Mummy Lake Gray: A New Pottery Type</i>		
1	Vessels of Mummy Lake Gray	15
2	Interior and exterior of a Mummy Lake Gray rim sherd	17
<i>Wheeler: Edge-abraded Flakes, Blades, and Cores in the Puebloan Tool Assemblage</i>		
1	Edge-abraded flakes, blades, and cores from sites on Wetherill Mesa	21
2	Edge-abraded flakes and blade from sites on Chapin Mesa	22
3	Division of a sandstone slab	28
<i>D. Osborne: Chipping Remains as an Indication of Cultural Change at Wetherill Mesa</i>		
1	Examining Wetherill Mesa flakes under illuminated lens	31
2	Wetherill Mesa flakes	32
3	Large cores and nodules from Wetherill Mesa	33
4	Partially reconstructed core of dark gray-green claystone from Wetherill Mesa	34
5	Small flakes and cores from Wetherill Mesa	36
6	Partially restored chert core from Two Raven House	39
7	Small and medium cores from Wetherill Mesa	40
8	Graphic presentation of core characteristics, Wetherill Mesa	41
9	Graphic presentation of flake characteristics, Wetherill Mesa	42
<i>C. M. Osborne: The Preparation of Yucca Fiber: An Experimental Study</i>		
1	Scraping green yucca leaf with humerus scraper against cobble anvil	46
2	Lifting scraped yucca fibers from opposite, unscraped surface	48
3	Scraping <i>Yucca baccata</i> leaf with stone flake on cobble anvil	48
4	Comparison of laboratory-produced <i>Yucca baccata</i> twine with archaeological specimen	49

Nichols: A Large Hewn Plank from Mesa Verde, Colorado

<i>Figure</i>		<i>Page</i>
1	Polished cross section of plank showing erratic tree-ring growth	52
2	Face A of plank	52
3	Face B of plank	53
4	Knot in Face A showing wavelike marks left by stone ax	53
5	Face B, Edge D, branch separating two large notches	54
6	Stone-ax-cut end E	54
7	Stone-ax-cut end I	54
8	Fire Temple, Mesa Verde National Park	55
9	Fire Temple, east wall with double doorway into second-story room	55

*Nichols and Smith: Evidence of Prehistoric Cultivation of
Douglas-fir Trees at Mesa Verde*

1	Schulman Old Tree stand of Douglas-fir trees	58
2	Map showing Old Tree area and major cliff dwellings on Chapin Mesa . . .	59
3	Schulman Old Tree Number 1	59
4	Base of Schulman Old Tree Number 1	60
5	Weathered limb end of Schulman Old Tree Number 1	60
6	Lancaster Old Tree Number 1	60
7	Schematic history of Lancaster Old Tree Number 1	61
8	Lancaster Old Tree Number 1 showing stone-ax-cut limbs and later growth	62
9	Lancaster Old Tree Number 2	62
10	Stone-ax-cut branches of Lancaster Old Tree Number 2	62
11	Stone-ax-cut limbs of Lancaster Old Tree Number 2	63

Rohn: Postulation of Socio-economic Groups from Archaeological Evidence

1	Mug House today	66
2	Suite 42/1 at Mug House	66
3	Suite 11/2 at Mug House	67
4	Suite 36/1 at Mug House	67
5	Suite 71 at Mug House	68
6	Mug House ground plan	68

Goss: Ute Linguistics and Anasazi Abandonment of the Four Corners Area

1	Distribution of aboriginal language families in the Anasazi area	74
2	Distribution of Shoshonean languages	75
3	The family tree of the Shoshonean languages	76
4	The Kawaiisu-Ute branch of the Numic languages	80

Arrhenius and Bonatti: The Mesa Verde Loess

<i>Figure</i>		<i>Page</i>
1	Map showing rainfall in Pacific Southwest and localities discussed	93
2	Lower loess formation with basal caliche, Chapin Mesa	94
3	Upper loess resting unconformably on lower loess, Mesa Verde National Park	94
4	Diagram showing location and activity of radiocarbon samples and stratigraphic subdivisions, Mesa Verde National Park	95
5	Grain size distribution with depth in the Juniper section, Mesa Verde National Park	95
6	Time distribution of dustfall over Mesa Verde National Park, July, 1963, to July, 1964	96

*Fritts, Smith, and Stokes: The Biological Model for Paleoclimatic
Interpretation of Mesa Verde Tree-ring Series*

1	Pinyon pine on mesa top selected for radial growth measurements and cambial sampling	102
2	Douglas-fir site in Navajo Canyon showing 260-year-old stand	103
3	Daily maximum and minimum stem sizes recorded by dendrographs	104
4	Average cumulative thickness and numbers of cells during growing season	105
5	Terminal branch from young pinyon pine showing numbers and lengths of needles formed each year	105
6	Growth curve (1963) for pinyon pine-needle elongation on lateral branches	107
7	Roots and soil horizons near base of pinyon pine	108
8	Yearly mean tree-ring indices in four chronologies selected for analysis	109
9	Diagram of proposed model for tree-ring growth and climate	115
10	Five-year running means of corrected tree-ring indices from Mesa Verde ..	118

Martin and Byers: Pollen and Archaeology at Wetherill Mesa

1	Location of archaeological sites studied by pollen analysis	123
2	Profile 3a from trash slope at Mug House	124
3	Profile 3b from trash slope at Mug House	126
4	Profile 2 from trash slope at Mug House	127
5	Profile 6 from Kiva D fill, Mug House	128
6	Profile 7 from Kiva G fill, Mug House	129
7	Profile 5 from trash on upper ledge in Mug House	130
8	Alluvium of agricultural terrace, Site 1539	131
9	Agricultural terrace, Site 1444	132
10	Accumulation of trash and drift, Site 1644	133

Cutler and Meyer: Corn and Cucurbits from Wetherill Mesa

Figure	Page
1 Corn cobs from Basketmaker III period, Step House	137
2 Pueblo III corn cobs from Mug House	139
3 Pueblo III corn cobs from Step House	140
4 Lower parts of three corn plants from Step House	141
5 Small cob of 10-rowed cherry flint corn from Step House	141
6 Three shanks with husks from Long House	142
7 Diagram showing rows of grains and cupule width of corn cobs, Mug House	146
8 Diagram of number of rows of grains and cupule width of 25 carbonized corn cobs	146
9 Squash peduncles from Step House	150
10 Immature <i>Cucurbita pepo</i> peduncles and seeds from Long House	151

Kaplan: Beans of Wetherill Mesa

1 Varieties of <i>Phaseolus vulgaris</i> at Wetherill Mesa sites	154
2 Mass of cooked bean-pod fibers and stem segments, Wetherill Mesa	154

Hargrave: Turkey Bones from Wetherill Mesa

1 Turkey skull, presumably opened to remove brain	162
2 Turkey pelvis broken apart	162
3 Turkey bones with cancellous ends removed	162
4 Spongelike turkey bone, possibly used for food	163
5 Turkey foot showing severed tendons	163
6 Tibiotarsus of turkey showing cut marks	164
7 Turkey wishbones	164
8 Paired elements from juvenile prehistoric and modern turkeys	165

Samuels: Parasitological Study of Long-dried Fecal Samples

1 Pinworm ova and coiled larva	176
2 Pinworm eggshell ruptured but larva undamaged	176
3 Rhabditoid nematodes	177
4 Rhabditoid nematodes	177
5 Adult female rhabditoid, showing genital papillae and well-preserved viscera	178
6 Larva of mite (exoskeleton)	178
7 Adult mite	179
8 Mouthparts of adult mite	179

*Coyler and Osborne: Screening Soil and Fecal Samples
for Recovery of Small Specimens*

<i>Figure</i>	<i>Page</i>
1 Tyler standard screens	187
2 Directing stream of water over sample	187
3 Magnifying glass makes it easier to pick out tiny objects	188
4 Human feces from Step House before and after screening	188
5 Seeds recovered by screening	189
6 Shells recovered by screening	191

Douglas: Biological Techniques in Archaeology

1 Diagrammatic drawing of hair patterns in pelage of Colorado chipmunk ..	195
2 Cuticular patterns of mammalian guard hairs	196
3 Plant epidermis in surface view to illustrate types of stomatal arrangements	197
4 Plant epidermis in surface view to illustrate patterns formed by configuration of anticlinal cell walls	198
5 Photomicrography apparatus constructed from inexpensive materials	199
6 Diagram of photomicrography apparatus	200

*Messinger: Methods Used for Identification of
Feather Remains from Wetherill Mesa*

1 Generalized, diagrammatic sketches of down types	207
2 Photomicrographs of a distal barbule from the breast feather of a Turkey ..	207
3 Principal parts of a feather	208
4 Typical contour feather	208
5 Proximal half of barb of duck	209
6 Cross section of hypothetical barb	209
7 Diagrammatic distal barbules	210
8 Diagrammatic proximal barbule	210
9 Diagrammatic downy barbule	210
10 Photomicrograph of down typical of all families in the order Galliformes ..	211
11 Photomicrograph of down from body feather of the Turkey	212
12 Photomicrograph of a typical pennaceous distal end and proximal barbule of the Turkey	213
13 Photomicrograph of down from the Mourning Dove	214
14 Sketch showing "pronglets" found on the proximal-most hooklets of the flight feathers of the Mourning Dove	214

*Davis: Three Applications of Edge-punched Cards for
Recording and Analyzing Field Data*

<i>Figure</i>	<i>Page</i>
1 Ballpoint pen illustrations taken from site data sheet	217
2 Site data sheet designed for use on Mesa Verde surveys	218
3 UniSort 5- by 8-in. card used in conjunction with Mesa Verde survey data sheets	219
4 E-Z Sort 5- by 8-in. card used in pottery analysis	220
5 Frame type of card index designed for use with 5- by 8-in. UniSort cards ..	221
6 Key that shows how the 26 letters of the alphabet may be restricted to five card holes	222
7 Nichols' card index for general analysis of Step House materials	223
8 Osborne's card index for analysis of lithic flakes and cores from Wetherill Mesa sites	224

Mang: The View Camera in Archaeological Photography

1 Photograph showing detail in shadow area and corrected perspective	228
2 Jar photographed with 90-mm. lens	228
3 Jar photographed with 135-mm. lens	229
4 Jar photographed with 300-mm. lens	229
5 Wrong choice of lens can falsify artifact shape	229
6 Distortion used for better illustration of design	230
