

CLAY MINERALS

VOLUME 23, NUMBER 2, JUNE 1988

CONTENTS

M. J. PEARSON and J. S. SMALL. Illite-smectite diagenesis and palaeotemperatures in Northern North Sea Quaternary to Mesozoic shale sequences	109
A. BOUCHET, D. PROUST, A. MEUNIER and D. BEAUFORT. High-charge to low-charge smectite reaction in hydrothermal alteration processes	133
B. A. GOODMAN, P. H. NADEAU and J. CHADWICK. Evidence for the multiphase nature of bentonites from Mössbauer and EPR spectroscopy	147
E. MURAD, L. H. BOWEN, G. J. LONG and T. C. QUIN. The influence of crystallinity on magnetic ordering in natural ferrihydrites	161
M. A. WILSON, K. WADA, S. I. WADA and Y. KAKUTO. Thermal transformations of synthetic allophane and imogolite as revealed by nuclear magnetic resonance	175
R. C. MACKENZIE, L. HELLER-KALLAI, A. A. RAHMAN and H. M. MOIR. Interaction of kaolinite with calcite on heating: III. Effect of different kaolinites	191
J. CENENS and R. A. SCHOONHEYDT. Tryptophan photo-oxidation by clay-adsorbed sensitizers	205
J. Y. BOTTERO, M. BRUANT and J. M. CASES. Interactions between hydroxy-aluminium species and homoionic Na- and Ca-montmorillonite particles, as manifested by ζ potential, suspension stability and X-ray diffraction	213
D. RIGHI and P. JADAULT. Improving soil clay minerals studies by high-gradient magnetic separation	225
Book Reviews	233
Corrigendum	235
Referees for volume 22	235
