UNION ASTRONOMIQUE INTERNATIONALE

COSMIC CHEMICAL EVOLUTION

PROCEEDINGS OF THE 187TH SYMPOSIUM OF THE
INTERNATIONAL ASTRONOMICAL UNION,
HELD AT KYOTO, JAPAN, 26–30 AUGUST 1997

EDITED BY

K. NOMOTO

*School of Science,
Department of Astronomy & Research Center for the Early Universe,
Tokyo, Japan*

and

K. W. TRURAN

*University of Chicago & Enrico Fermi Institute,
Chicago, U.S.A.*

KLUWER ACADEMIC PUBLISHERS

DORDRECHT / BOSTON / LONDON

A C.I.P. Catalogue record for this book is available from the Library of Congress.

ISBN 1-4020-0448-6 (HB)

ISBN 1-4020-0449-4 (PB)

*Published on behalf of
the International Astronomical Union
by
Kluwer Academic Publishers, P.O. Box 17, 3300 AA Dordrecht, The Netherlands.*

*Sold and distributed in North, Central and South America
by Kluwer Academic Publishers,
101 Philip Drive, Norwell, MA 02061, U.S.A.*

*In all other countries, sold and distributed
by Kluwer Academic Publishers,
P.O. Box 322, 3300 AH Dordrecht, The Netherlands.*

Cover figure:
**“Hubble’s Deepest-Ever View of the Universe Unveils Myriad Galaxies
Back to the Beginning of Time
STScI-PRC96-01a – January 15, 1996, R. Williams and the HDF Team (ST ScI
and NASA)”**

Contents

Preface	xi
Conference Papers in order of Presentation:	
Big Bang Nucleosynthesis <i>D.N. Schramm</i>	1
Light Elements Abundances: New Insights on Stellar Mixing and Galactic Production <i>F. Primas</i>	17
The First Stars <i>D. Arnett</i>	23
Type 1A Supernovae and Chemical Evolution of Galaxies <i>K. Nomoto, C. Kobayashi, and H. Umeda</i>	33
The Chemical Evolution of Light Elements in Our Galaxy <i>N. Prantzos</i>	47
Nucleosynthesis in Red Giant Stars <i>N. Mowlavi</i>	57
Fluorine Production from AGB and WR Stars <i>N. Mowlavi and G. Meynet</i>	71
Deuterium Abundance in the Local ISM <i>J.L. Linsky and B.E. Wood</i>	75
Abundances in Halo Population Stars <i>C. Sneden</i>	81
Abundances in the Galactic Disk <i>B. Edvardsson</i>	91
Abundances in a Hot Horizontal-Branch Star in the Old Open Cluster NGC/6791 <i>R.C. Peterson and E.M. Green</i>	97

On the Progenitors of Type Ia Supernovae <i>X.-D. Li and E.P.J. van den Heuvel</i>	103
Abundances from $z = 0$ to $z = 5$ <i>D.G. York</i>	109
Enrichment of Heavy Elements in Clusters of Galaxies <i>Y. Ishimaru</i>	117
On the Origin of Metallicity in Lyman-Alpha Forest Systems <i>M. Chiba and B.B. Nath</i>	123
A Metal Enriched Dark Cluster of Galaxies at $Z = 1$ <i>M. Hattori</i>	129
Are Elliptical Galaxies Really Metal-Rich? <i>M. Loewenstein and R.F. Mushotzky</i>	139
Chemical Evolution of Spiral Galaxies from Redshift 4 to the Present <i>U. Fritze-v. Alvensleben, U. Lindner, and K.J. Fricke</i>	147
Age Problem Based on the Abundance Ratio from a High-Redshift QSO <i>T. Tsujimoto, Y. Yoshii, and K. Kawara</i>	153
Stellar Yields and Chemical Evolution <i>B.K. Gibson</i>	159
The Formation of First Generation Stars and Globular Clusters in Protogalactic Clouds <i>D.N.C. Lin and S.D. Murray</i>	165
Constraints on Galaxy Formation from Extragalactic Globular Clusters <i>J.P. Brodie</i>	175
The Evolution of Old Stellar Populations in Our Galaxy <i>S.R. Majewski</i>	185

Chemical Evolution of the Magellanic Clouds <i>B. Barbuy, J.A. de Freitas Pacheco, and T. Idiart</i>	195
Global Evolution of the Stars, Gas, Metals, and Dust in Galaxies <i>S.M. Fall</i>	201
Conference Summary <i>B.E.J. Pagel</i>	209
Conference Abstracts in Alphabetical Order	
Nitrogen Abundance in Oxygen-Rich Giants through K to late M <i>W. Aoki and T. Tsuji</i>	219
Asymmetrical Delayed Detonation From a 3D Hydrosimulation of a White Dwarf Explosion <i>E. Bravo ad D. García-Senz</i>	220
Numerical Simulations of the Chemical Evolution of Galaxies Using Treecode-SPH <i>D.K. Churches, A.H. Nelson, and M.G. Edmunds</i>	221
Chemical Evolution of Damped Lyman α Systems <i>K. Denda</i>	222
Abundances in Metal-Rich Stars <i>S. Feltzing</i>	223
Abundance Pattern of Supergiants in the Field of the Small Magellanic Cloud and in the Cluster NGC 330 <i>V. Hill</i>	224
Age and Metallicity Distribution of the Disk Stars from Edge-on Galaxies <i>A. Just</i>	225
Evolution of the Colour-Magnitude Relation of Elliptical Galaxies <i>T. Kodama, N. Arimoto, A. Barger, and A. Aragón-Salamanca</i>	226

The Optical Properties of Carbon and Graphite depend on Crystal Structure and Temperature <i>C. Koike, H. Shibai, T. Tanabe, H. Suto, H. Sogawa, C. Kaito, Y. Ando, and M. Fukada</i>	227
Improved Theoretical Stellar Library for Population Synthesis Models <i>T. LeJeune and R. Buser</i>	228
Chemical and Spectrophotometric Evolution of Optically Identified QSO Absorption Systems <i>U. Lindner, U. Fritze-v. Alvensleben, C.S. Möller, and K.J. Fricke</i>	229
Comparison of Nucleosynthesis Models <i>O. Nakamura</i>	230
The Galactic Disc Age-Metallicity Relation <i>Y.K. Ng, G. Bertelli, G. Carraro, and L. Portinari</i>	231
Analysis of Elemental Carbon and Oxygen Abundances in Carbon Stars – They have turned out to be more Carbon-Rich than believed <i>K. Ohnaka and T. Tsuji</i>	232
Abundances in Evolved Intermediate Mass Stars <i>M. Perinotto, L. Morbidelli, and P. Patriarchi</i>	233
Spectral Energy Distributions of $z > 2$ Galaxies in the Hubble Deep Field <i>M. Sawicki and H.K.C. Yee</i>	234
Blue 'Elliptical' Galaxies in the Hubble Deep Field <i>Y. Shioya and T. Yamada</i>	235
The Symbiotic-Barium Stars Link <i>V.V. Smith, K. Cunha, A. Jorissen, and H.M.J. Boffin</i>	236
The Spectral Evolution of Elliptical Galaxies in FIR and beyond <i>T. Takagi and N. Arimoto</i>	237

Nucleosynthesis in ONEMG Novae: Comparison with Observations	238
<i>S. Wanajo, K. Nomoto, and M. Hashimoto</i>	
Constraints on Cosmic Chemical Evolution from the Gamma-Ray Background	239
<i>K. Watanabe, D.H. Hartmann, and M.D. Leising</i>	
Disk-Wind Models for Broad Absorption Line QSO's	240
<i>T.M. Yamamoto</i>	
Supernova Observing Web (SNOW) Project with the Public Astronomical Observatories in Japan	241
<i>H. Yamaoka, M. Doi, T. Shigeyama, N. Yasuda, and M. Watanabe</i>	
Element Abundances in Metal-Poor Stars	242
<i>G. Zhao and Y.Q. Chen</i>
