Edited by JOHN B. BOOTH

Assistant Editors NEIL WEIR, PATRICK BEASLEY, CAROL WENGRAF, RICHARD RAMSDEN,
IOLO GRIFFITH & PETER RHYS EVANS

Editorial Assistant CAROLINE BARRETT

INSTRUCTIONS FOR AUTHORS

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made. Normally an original main article should not exceed 7500 words.

Longer articles or theses will be considered for publication as *Supplements*, at the expense of the authors or their employing authorities.

2. Manuscripts should be typewritten in **duplicate** on one side only of the paper (A4 297x210 mm) and double spaced, with wide margins.

Begin each component on a new page in the following sequence: title page, abstract, text, acknowledgements, references, tables and legends.

(a) **Abstract**—This should contain not more than 150 words and include a statement of the problem, the method of study, results and conclusions; a 'summary' section should **not** be included in the main manuscript.

(b) **Key Words**—only those appearing as Medical Subject Headings (MeSH) in the supplement to the Index Medicus may be used; where no appropriate word(s) are listed those dictated by common sense/usage should be supplied.

(c) **Text**—Suggested outline—(1) introduction, (2) materials and methods, (3) results, (4) discussion, (5) conclusion.

(d) **Tables** are adjuncts to the text and should not repeat material already presented.

(e) **Illustrations**—**Two** sets of illustrations, one with each copy of the manuscript, must be submitted and all authors should remember that the single column width is 80mm. One set of illustrations should, therefore, not exceed this width and they should ensure that the essential features are illustrated within this dimension.

Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

Written permission from the publisher must be provided to the *Journal* in order to republish material with copyright elsewhere and also from the senior author where necessary.

(f) **Measurements** must be in metric units, with Système Internationale (SI) equivalents given in parentheses.

(g) **References**—For *Journal* articles, The Harvard system of recording references should be used, e.g. Green, C. and Brown, D. (1951). The tonsil problem. *Journal of Laryngology and Otology* 65: 33–38. A paper written by more than two authors should be abbreviated in the text, e.g. Green *et al.* (1951), but **all** the authors should be given in the list of references. The titles of all *Journals* should be given without abbreviation. **References should be listed in alphabetical order**; use of the Vancouver system will **not** be accepted.

For single-author books, the following style should be used: Green, C. (1951). *The tonsil problem*, 2nd edn., vol. 1, Headley Brothers Ltd., Ashford, Kent, p 33–38.

For papers in multi-author books with one or more editors, the reference should include the title of the chapter and the names of the editors, together with the number of the edition as eg: Brown, D. (1951) Examination of the ear. In *Diseases of the Ear, Nose and Throat*. 2nd Edition. (White, A., Black, B., eds.), Headley Brothers Ltd, Ashford, Kent, p 33–38.

It is most important that authors should verify personally the accuracy of every reference before submitting a paper for publication. The names of authors cited in the References should be given in alphabetical order.

(h) **Meetings**—If the manuscript was presented at a meeting, the place where it was held, and the date on which it was read must be included and should appear at the foot of the title page.

(i) **Financial disclosures**—In the submission letter to the Editor, the authors must list all affiliations with or financial involvement in, organizations or entities with a direct financial interest in the subject matter or material of the research discussed in the manuscript.

(j) **Rejections**—All manuscripts which are rejected will no longer be returned to the authors. Those submitting papers should, therefore, ensure that they retain at least one copy and the reference numbers, if any, of the illustrations. The only exception to this will be those manuscripts with colour illustrations which will be returned *automatically* by Surface Mail.

(k) **Facsimile (FAX)**. All authors should send a Facsimile number whenever possible to speed communication; this particularly applies to those outside the United Kingdom. Manuscripts with no visual illustrations (X-rays/pathology) may be sent by facsimile.

3. Page proofs are sent to authors for corrections, which should be kept to a minimum; they must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Orders for reprints must be sent when returning page proofs, and for this purpose special forms are supplied.

5. Editorial communications may be addressed to **The Editor, Journal of Laryngology and Otology, c/o Headley Brothers Ltd., The Invicta Press, Ashford, Kent TN24 8HH or sent by FAX (071-224 1645).**

6. **The annual subscription is £80.00 Institutions & Libraries US\$200.00; £75.00 Individuals US\$187.50; £45.00 Registrars, Residents and Interns.** (Those in training should submit a certificate from The Head of the Department giving details of their appointment; those who qualify must supply their *home* address for mailing direct). Claims to be made for missing issues within 6 months of each publication date.

7. Single copies of current or back numbers (when available) will be on sale at £11.00 each (including postage).

8. All subscriptions, advertising and business communications should be sent to the publishers, or subscription agents.

Laryngology & Otology Publications

Available from the Publishers and from Agents throughout the world.

Prices include postage and packing.

The Journal of Laryngology and Otology

Edited by John B. Booth

A leading international journal, published monthly and containing original scientific articles and clinical records in all fields of Otolaryngology, Rhinology and Laryngology. Including occasional supplements.

Founded in 1886.

Annual subscription for 1990 (calendar year): £70.00 Agents £65.00 (US\$175.00 Agents \$162.50); Students rate £40.00

ISSN 0022 2151

Supplements still available separately.

Traité de L'Organe de L'Ouïe

by Nehemiah Asherson

This Bibliography of one of the earliest accurate descriptions of the organ of hearing, which first appeared in 1683, represents the culmination of a lifetime of historical research. It includes a biographical section on Du Verney, the author of the 'Traité'.

The ENT Surgeon looks at the Orbit

by D. F. N. Harrison

This supplement records in some detail Professor Harrison's 'personal experience over a period of 20 years dealing with a wide variety of clinical conditions in which entry into the orbit was a desirable or essential part of treatment'.

Pp 42 Printed 1980

Retail £4.00 Agents £3.50 (US\$8.00 Agents \$7.00)

Tinnitus

Chairman: Abraham Shulman

The Proceedings of The First International Tinnitus Seminar, which was held in New York in June 1979. Practically all the original papers are reproduced in full, and there are edited versions of all the Panel Discussions. The contributions, from an international group of experts, give comprehensive coverage to a subject of great current interest and importance.

Retail £4.00 Agents £3.50 (US\$8.00 Agents \$7.00)

Laryngology Applied to Singers and Actors

by Norman A. Punt

This fascinating monograph fills an obvious void in laryngological literature. The author, eminent in the field of vocal problems in the theatre and opera house, writes with understanding, knowledge and concern. When mixed with valuable advice and useful prescriptions, this monograph will serve to guide all who find themselves called upon to help these most sensitive individuals.

Nasal Mast Cells: A Preliminary Report on their Ultrastructure

by A. B. Drake-Lee, F.R.C.S.

The ultrastructural morphology of mast cells in the nose and the adenoids are compared. Normal cells have a very varied morphology with electron dense granules which have scrolls occasionally. Cells from patients with perennial allergic rhinitis show variable degranulation in all areas examined. Few cells were seen in the surface epithelium. Cells from the adenoids had different degrees of degranulation which suggests that mast cell reactions are not a constant feature.

For vertigo

due to Ménière's syndrome

At the recommended dosage of three 16mg tablets daily, new Serc-16 is a highly effective first-line therapy for vertigo due to Ménière's syndrome.

- Regression of symptoms — if therapy commences in the initial stages¹
- Not associated with Parkinsonian side-effects — unlike prochlorperazine²
- Non-sedative³

NEW

Serc-16

betahistine 16mg

Tackles the symptoms by treating the cause

Presentation: A white, flat round tablet imprinted '267' on one face, 'DUPHAR' on the reverse, each tablet containing 16mg betahistine dihydrochloride. Available in packs of 84 tablets. Basic NHS price £18.03. **Indications:** Vertigo, tinnitus and hearing loss associated with Ménière's syndrome. **Dosage and Administration:** *Adults:* Initially one tablet three times daily, taken preferably with meals. *Maintenance dose:* 24-48mg daily. *Children:* No dosage recommendations are made for children. **Contra-indications, Warnings, etc.:** *Contra-indications:* Phaeochromocytoma. *Precautions:* Clinical intolerance to Serc in bronchial asthma patients has not been shown, but caution should be exercised when administering this histamine analogue to bronchial asthma patients. Though an antagonism between Serc and antihistamines could be expected on a theoretical basis, no such

interactions have been reported. The usual precautions should be observed when administering Serc to patients in pregnancy. *Side-effects:* There has been a small number of reports of gastric upset. **Product Licence Number:** 0512/0088.
