NOTES ON THE PREPARATION OF PAPERS FOR THE TRANSACTIONS AND PROCEEDINGS OF THE SOCIETY

A PAPER by a non-Fellow must be communicated by a Fellow or Honorary Fellow of the Society. The communicator should satisfy himself that the paper is suitable for presentation to the Society.

A paper by more than one author must be submitted with a statement, *signed by each author*, to the effect that the paper in its entirety is approved by the joint authors, and naming the author who will be responsible for the correction of proofs.

In view of the high cost of publication, authors must write their papers as concisely as possible, and avoid excess of illustrations. The MS. must be easily legible, preferably type-written on one side of quarto or foolscap paper, and with pages numbered throughout. It must be in its final form for printing. Authors are advised to retain copies of their papers as the Society cannot accept responsibility for safe custody.

Every paper must be accompanied by a synopsis, in general not exceeding 200 words, which will be printed in small type at the beginning of the paper, immediately after the title. The synopsis will not necessarily replace a 'Summary of Conclusions' which, if required, will be printed in ordinary type at the end of the paper.

In the case of a long paper a table of contents should be supplied. References to plates, etc., should be inserted in the MS. where required. Positions for the insertion of illustrations appearing in the text should be indicated. Names of genera and species should be in italics. Footnotes should be avoided where possible.

Additions to a paper after it has been finally passed for printing will, if accepted by the Council, be treated and dated as separate communications, and may, or may not, be printed immediately after the original paper.

References to Literature cited in the text should be listed at the end of a paper. They should be arranged alphabetically under the authors' names, with titles of journals abridged as given in the *World List of Scientific Periodicals*, except that in periodicals with English titles the ordinary English use of capital letters should be followed, e.g. *Proc. Linn. Soc.* Titles of papers, if inserted, should be quoted exactly. The undernoted are examples:

- AITKEN, A. C., 1946. 'On the estimation of many statistical parameters', *Proc. Roy. Soc. Edinb.*, A, 63, 369–377.
GUTHRIE, D., 1945. *A History of Medicine*. London.
ROGERS, G. L., 1952. *Proc. Roy. Soc. Edinb.*, A, 63, 193–221.

References in the text should be made by quoting the name of the author and year of publication, thus: (Rogers 1952) or (Guthrie 1945), adding the page when necessary. When two or more papers, published by the same author in any one year, are listed, each paper should be distinguished by a small letter *a*, *b*, etc., placed after the date, thus: (Rogers 1952*a*). All references should be carefully checked before the paper is submitted.

Illustrations. These should preferably be line drawings (shaded by dotting, hatching, etc., if necessary). Alternatively wash drawings or photographs, which are usually reproduced as plates, may be accepted. All illustrations must be in a form suitable for reproduction.

Line drawings should be made with indian ink on white Bristol board. Lines or dots, etc., used for shading, should be firm and black and no washes or colour should be used. Areas where lines, stipples, etc., are to be added by the engraver should be marked *lightly* in *blue pencil*, and the type of shading indicated.

Wash drawings should be shaded in monochrome (black or sepia), and drawn on white paper or white Bristol board.

All drawings, should, where possible, allow of reduction to about two-thirds the linear dimensions, and the amount of the reduction should be considered, during drafting, with regard to the size and strength of shading, lettering, lines, etc. Drawings should be submitted, if possible, flat, not rolled.

PROCEEDINGS
OF
THE ROYAL SOCIETY
OF EDINBURGH

Section A (Mathematical and Physical Sciences)

VOL. 70

1971–1972

Dedicated to

NORMAN FEATHER

to mark twenty-five years of his tenure of the
Chair of Natural Philosophy in the University of Edinburgh

PUBLISHED BY
THE ROYAL SOCIETY OF EDINBURGH
22 GEORGE STREET
EDINBURGH EH2 2PQ

1972

The Council of the Royal Society of Edinburgh, in publishing this collection in its *Proceedings*, is glad to acknowledge the debt which the Society owes to Professor NORMAN FEATHER, for nineteen years a Member of the Society's Council—ten of these as General Secretary and three as President.

(Issued October 1972)

CONTENTS

NO.		PAGE
1	Introduction—Personal Reflections. By P. I. DEE	5
2	The Proportional Counter as a Position-Sensitive Device. By T. H. BRAID	9
3	Solid-state Systematics. By A. F. BROWN	27
4	Search for Branching in the β^+ Decay of the ^{42}Sc Ground State. By W. E. BURCHAM, G. E. MURRAY, D. C. ROBINSON, J. M. FREEMAN and J. G. JENKIN	39
5	Adiabatic Motion in a Charged Particle Trap. By J. BYRNE	47
6	Electron Diffraction and Electron Mobility in Non-polar Crystals. By W. COCHRAN	63
7	Beta-spectra Shape Factors in the Decay of ^{140}La and ^{72}Ga . By R. D. CONNOR, T. J. GOLDMAN and I. L. FAIRWEATHER	67
8	The Temperature Dependence of Localised Magnons. By R. A. COWLEY	75
9	Plant Cell-Water Relations: the Elasticity of the Cell Wall. By J. DAINTY	89
10	Understanding Physics through its History. By S. DEVONS	96
11	The Symmetry of Crystal Vibrations in KH_2PO_4 . By H. MONTGOMERY and G. L. PAUL	107
12	The National Physical Laboratory. By J. V. DUNWORTH and P. DEAN	125
13	A Search for the Quark in Extensive Air Showers, using a Counter-controlled Cloud Chamber. By G. R. EVANS, N. E. FANCEY, J. MUIR and A. A. WATSON	143
14	Ground State Rotational bands of ^{158}Dy , ^{160}Dy and ^{162}Dy observed in $(\alpha, xn\gamma)$ Reactions. By G. T. EWAN and G. I. ANDERSSON	155
15	On a Source of Polarised Electrons. By D. M. CAMPBELL, H. M. BRASH and P. S. FARAGO	165
16	Fast Neutron Polarisation. By R. B. GALLOWAY	181
17	Remarks on the Prehistory of the Discovery of Slow Neutrons. By M. GOLDBABER	191
18	A Kinetic Approach to the Irreversible Thermodynamics of Membrane Transport. By J. HOGG and E. J. WILLIAMS	197
19	Classical Electromagnetism—How should One Teach it Today? By N. KEMMER	207
20	Energy in the Future—the Role of Nuclear Fission and Fusion. By W. B. LEWIS	219
21	Riding Motion and Higher Cumulants in Crystallographic Models. By G. S. PAWLEY	225

NO.		PAGE
22	Organic Scintillators with Improved Timing Characteristics. By J. B. BIRKS and R. W. PRINGLE	233
23	Coincidence Studies of ^{144}Pr with an X-ray Detector. By R. K. MISHRA, H. O. W. RICHARDSON, R. N. THOMAS and R. V. THOMAS	245
24	Eigenvalue and Eigenvector Solutions of a Wave System in a Non-linear Dissipative Medium. By M. A. S. ROSS and D. F. CORNER	251
25	Soft Mode Spectroscopy of NdAlO_3 . By J. F. SCOTT	263
26	Recent Light on Optical Interference. By R. M. SILLITTO	267
27	The Zeros of Optical Coherence Functions and their Utility in the Study of Spectra. By G. M. THOMAS	281
28	Comments on Ternary Fission: Post-scission α -Particle emission. By D. G. VASS	295
29	The Possibility of Second-class Currents in Gamow-Teller β -Decay. By D. H. WILKINSON	307
