An aerial, high-angle photograph of a large crowd of runners participating in a marathon on a paved road. The runners are spread across the width of the road, moving away from the camera. The road has white lane markings. The surrounding area is filled with trees and greenery, suggesting a park or suburban setting. The overall tone is grey and somewhat desaturated.

DID YOU KNOW...

Prehospital and Disaster Medicine has published more manuscripts about mass gatherings than any other journal?

A compendium of all of these papers, with introductory comments by Paul Arbon will be available soon.

If you would like more information about this compendium, please contact the PDM Editorial Office at pdm@medicine.wisc.edu.
