## COLLINGWOOD AND THE REFORM OF METAPHYSICS

a study in the philosophy of mind

LIONEL RUBINOFF

This is a masterly exposition of the systematic development of Collingwood's thought, emphasizing his theory of the relationship between philosophy and history. The author refutes the classical view that Collingwood's thought underwent a radical conversion; he argues that the philosopher's writings have a dialectical unity based on his early *Speculum Mentis*. \$12.50

SEARLE.* This is the latest addition to the *Oxford Readings in Philosophy*, a series that brings together important and recent writings in major areas of philosophical enquiry selected from a variety of sources, many of which are not conveniently available to the student or general reader.
