

Announcements/Chroniques

Philosophia Mathematica

The Canadian Society for History and Philosophy of Mathematics, which founded its historical journal *Historia Mathematica* in 1974, announces the publication of Series Three of *Philosophia Mathematica* as its philosophical journal. *Philosophia Mathematica* is the only journal devoted specifically to philosophy of mathematics, its learning (by research or instruction) and its application. It was founded in 1964 and edited until early 1992 through Series One and Two by J. Fang. The journal has been completely reorganized, with a new active Editorial Board, and will be published for the Society semi-annually from Spring 1993 by the University of Toronto Press.

Inquiries and submissions from authors will be welcomed by the new editor, Robert Thomas, Department of Applied Mathematics, University of Manitoba, Winnipeg, MB, Canada R3T 2N2.

Philosophy of Law

Work has begun on *The Philosophy of Law: An Encyclopedia*, to be edited by Christopher Berry Gray and published by Garland Publishing of New York. Scheduled to appear in June 1997, the book will comprise alphabetically arranged entries on all aspects of the philosophy of law and is intended to provide an overview of current scholarship in this field for students and researchers.

Inquiries should be addressed to: Dr. C. B. Gray, Department of Philosophy, Concordia University, 7141 Sherbrooke Street West, Montréal, PQ, Canada H4B 1R6.

Journal of Philosophical Logic

Published under the auspices of the Association for Symbolic Logic

Editors:

J. Michael Dunn, *Dept. of Philosophy, Indiana University, Bloomington, USA*; **Terence Parsons**, *Dept. of Philosophy, University of California, Irvine, CA, USA*; **Anil Gupta**, *Dept. of Philosophy, Indiana University, Bloomington, USA*

The *Journal of Philosophical Logic* publishes papers that utilize formal methods or that deal with topics in logical theory, such as:

- Contributions to branches of logical theory directly related to philosophical concerns, such as inductive logic, modal logic, deontic logic, quantum logic, tense logic, free logic, logic of questions, logic of commands, logic of preference, logic of conditionals, many-valued logic, and relevance logics.
- Contributions to philosophical discussions that utilize the machinery of formal logic, as in recent treatments of abstract entities, non-existent possibles, essentialism, existence, propositional attitudes, meaning and truth.
- Discussions of philosophical issues relating to logic and the logical structure of language, such as conventionalism in logic, ontic commitment, logical or semantic paradoxes, the logic of hypotheses and of pre-suppositions, constructivism, and extensionality.
- Philosophical work relating to specific sciences (such as linguistics, history of logic, or physics), with an emphasis on foundational problems, and making use of logical theory. Some instances of recent work of this kind are the treatments of universal grammar, pragmatics, conceptions of possibility, theories and mathematical truth in the history of philosophy, formalization of scientific theories, or logical structure in quantum mechanics.

The *Journal of Philosophical Logic* is published under the auspices of the Association for Symbolic Logic.

Journal of Philosophical Logic is surveyed by *Current Contents/Arts & Humanities*, *Arts & Humanities Citation Index*, *Informationsdienst für Philosophie*, *Linguistics & Language Behavior Abstracts*, *Mathematical Reviews*, *MLA International Bibliography*, *Referativnyi Zhurnal*, *Sociological Abstracts*, *The Philosopher's Index*, *Zentralblatt für Mathematik*, *IBZ/IBR*, *Linguistic Bibliography*.
