

THE  
GEOLOGICAL MAGAZINE

VOL. LXXX OF WHOLE SERIES

JANUARY-DECEMBER, 1943

# GEOLOGICAL MAGAZINE

with which is incorporated

## THE GEOLOGIST

FOUNDED IN 1864 BY THE LATE DR. HENRY WOODWARD, F.R.S.

Edited by

R. H. RASTALL, M.A., Sc.D.

and

O. M. B. BULMAN, Sc.D., A.R.C.Sc., F.R.S.

*assisted by*

PROFESSOR W. S. BOULTON, D.Sc.

PROFESSOR C. E. TILLEY, Ph.D., F.R.S.

PROFESSOR W. G. FEARNSIDES, M.A.,  
F.R.S.

PROFESSOR W. W. WATTS, Sc.D., LL.D.,  
M.Sc., F.R.S.

SIR THOMAS H. HOLLAND, K.C.S.I.,  
D.Sc., F.R.S.

HENRY WOODS, M.A., F.R.S.

PROFESSOR O. T. JONES, M.A., D.Sc.,  
F.R.S.

SIR A. SMITH WOODWARD, LL.D.,  
F.R.S.

Vol. LXXX of Whole Series

# CONTENTS OF VOLUME LXXX, 1943

| No. 1                                                                                                                                                                                  | JANUARY-FEBRUARY | PAGE |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|------|
| J. B. SCRIVENOR. A Further Examination of Organic Remains in Rhyolite-Ash in Malaya . . . . .                                                                                          |                  | 1    |
| ETHEL D. CURRIE. Growth Stages in some Species of <i>Promicroceras</i> . . . . .                                                                                                       |                  | 15   |
| R. G. S. HUDSON. "Gerontic" Structures in the Carboniferous Coral <i>Rotiphyllum costatum</i> (McCoy) . . . . .                                                                        |                  | 23   |
| R. H. RASTALL. The Cleveland Axis . . . . .                                                                                                                                            |                  | 30   |
| REVIEWS.—South African Scenery : A Textbook of Geomorphology, 36 ; Some Refractory Materials in North-Eastern England, 38 ; Geology of the Forest of Dean Coal and Iron-ore Field, 38. |                  |      |
| ANNOUNCEMENT.—Clough Memorial Research Fund, 40.                                                                                                                                       |                  |      |
| No. 2.                                                                                                                                                                                 | MARCH-APRIL      |      |
| A. FOWLER. On Fluorite and Other Minerals in Lower Permian Rocks of South Durham . . . . .                                                                                             |                  | 41   |
| R. M. MACLENNAN. The Association of <i>Naiadites</i> and <i>Carbonicola</i> in a part of the Central Coalfield of Scotland . . . . .                                                   |                  | 52   |
| JAMES L. BEGG. Hypostomes of Some Girvan Trilobites and their Relationship to the Cephalo . . . . .                                                                                    |                  | 56   |
| O. T. JONES. A Comment on a New Area of Slumped Beds in Denbighshire . . . . .                                                                                                         |                  | 66   |
| F. R. C. REED. Notes on Certain Upper Devonian Brachiopods figured by Whidborne . . . . .                                                                                              |                  | 69   |
| CORRESPONDENCE.—The Cleveland Axis, 79.                                                                                                                                                |                  |      |
| No. 3                                                                                                                                                                                  | MAY-JUNE         |      |
| JAMES WRIGHT. <i>Pimlicocrinus</i> gen. nov. and two new species of <i>Amphocrinus</i> from the Carboniferous Limestone . . . . .                                                      |                  | 81   |
| F. R. C. REED. Notes on Certain Upper Devonian Brachiopods figured by Whidborne . . . . .                                                                                              |                  | 95   |
| M. AVNIMELECH. Transgressive Upper Eocene in Palestine . . . . .                                                                                                                       |                  | 107  |
| L. F. SPATH. Problems of Ammonite Nomenclature . . . . .                                                                                                                               |                  | 111  |
| REVIEW.—Climatic Accidents in Landscape-making, 117.                                                                                                                                   |                  |      |
| CORRESPONDENCE.—Mineralization of Permian Rocks of South Durham, 119 ; The Cleveland Axis, 120.                                                                                        |                  |      |
| No. 4                                                                                                                                                                                  | JULY-AUGUST      |      |
| DONALD PARKINSON. The Age of the Reef-Limestone in the Lower Carboniferous of North Derbyshire . . . . .                                                                               |                  | 121  |
| F. R. C. REED. Notes on Certain Upper Devonian Brachiopods figured by Whidborne . . . . .                                                                                              |                  | 132  |
| PHILIP LAKE. Restoration of the Original Form of Distorted Specimens . . . . .                                                                                                         |                  | 139  |
| N. E. ODELL. The So-called "Axial Granite Core" of the Himalaya : its Actual Exposure in Relation to its Sedimentary Cover . . . . .                                                   |                  | 148  |
