## of the AUSTRALIAN MATHEMATICAL SOCIETY

Volume 37 Number 3

June 1988

Jordan derivations on prime rings M. Brešar and J. Vukman	321
On the weak*-Radon Nikodym property Elias Saab	323
Singleton arrays in coding theory Tatsuya Maruta, Isao Kikumasa and Hitoshi Kaneta	333
Fourth-order boundary value problems at nonresonance Yisong Yang	337
A linear complementarity problem involving a subgradient J. Parida, A. Sen and A. Kumar	345
Integrally closed factor domains Valentina Barucci, David E. Dobbs and S. B. Mulay	353
Multiobjective fractional duality Richard R. Egudo	367
On safety and rivals in power-structures John Boris Miller	379
Barrelled spaces and dense vector subspaces W. J. Robertson, S. A. Saxon and A. P. Robertson	383
The Dirichlet problem for degenerate elliptic 2-dimensional Monge-Ampère equation Kazuo Amano	389
An inversion theorem for set-valued maps D. Aze	411
On certain sequence of least squares approximants M. A. Bokhari	415
Quasi-continuity with respect to semi-regularisation topology Stanislaw Pysk	423
Sharp conditions for oscillations caused by retarded and advanced perturbations J. E. Bowcock and Y. H. Yu	429
On uniformly strongly prime gamma rings G. L. Booth and N. J. Groenewald	437
Extreme values for divisor functions R. A. MacLeod	447

### ABSTRACTS OF AUSTRALASIAN Ph.D. THESES

Theory of combinatorial designs with applications to encryption and the design of experiments D. G. Sarvate	467
Topological methods in equilibrium analysis Ghanshyam Mehta	469
Applications of symmetry groups and the Wahlquist-Estabrook procedure in general relativity Phillip Charles Harmsworth	471
Existence theorems for floorplans I. Rinsma	473
Orbits and chaos in dynamical systems Paul Cleary	477
Mahler's method in transcendence theory David Angell	479

B. D. Craven	J. R. Giles	P. E. Kloeden	G. Szekeres
Brian A. Davey	J. R. J. Groves	Sidney A. Morris	D. G. Tacon
P. M. Diamond	J. A. Hempel	G. B. Preston	E. U. Tarafdar
Colin J. Thompson	A. J. van der Poorten	N. C. Weber	

### Assistant Editors

K. G. Smith      G. A. Chandler

### INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to  
The Editor, Bulletin of the Australian Mathematical Society,  
Department of Mathematics, University of Queensland,  
St. Lucia, Queensland, 4067, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned. Note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification. (1985 Revision).

### Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
