

INDIAN JOURNAL OF DAIRY SCIENCE

CONTENTS

Vol. XXXI, No. 2

June, 1978

- Evaluation of green oats by *in vitro* and *in vivo* techniques. V. D. MUDGAL AND NAWAB SINGH
- Influence of antimycin as a feed additive on growth and milk production. J. S. GULIA, MISS HARJIT KAUR AND S. P. ARORA
- The effect of various protein supplements to alkali treated paddy straw on feed utilization and growth rate of crossbred male calves. D. G. NAIK AND M. SINGH
- Effect of drugs on the rumino-reticular motility in the buffalo. M. MOHSIN AND S. C. SUD
- Draftability of Haryana bullocks. D. S. K. DEVADATTAM AND N. L. MAURYA
- Loose-housing versus conventional tie-barns for lactating crossbred and buffalo cows during winter under two levels of feeding. C. K. THOMAS, V. N. TRIPATHI, N. S. R. SHASTRY, R. S. YADAV, L. R. GUPTA, KRIPAL SINGH AND R. N. PAL
- Relation of body measurements with some economic traits in dairy cows. M. MISHRA, P. K. MISHRA AND J. B. NAYAK
- Genetic and phenotypic correlation among traits of growth and production for Sahiwal and Sahiwal x Holstein crossbreds. V. K. TANEJA, P. N. BHAT AND R. C. GARG
- Studies on uterine involution and post partum estrus in dairy cows. DHIRENDRANATH JANA AND R. R. MISHRA
- Isolation and characterization of nisinase producing bacteria from processed cheese. G. R. RALHAN, K. J. SASTRY AND D. M. MATHUR
- Bacterial quality of the raw buffalo milk marketed in and around Patna and its public health importance. S. KUMAR, BASANT K. SINHA AND B. N. SAHAJ
- Further studies on the release of components from casein micelles on acid-treatment. M. P. GUPTA AND N. C. GANGULI
- Effective inhibition of milk lipases and control of lipolytic rancidity in milk. TAPAS K. RAY, G. P. SINGH AND J. CHATTARAJ
- Short Communications*
- The use of Pro Milk (MK-II) for analysis of raw, treated and reconstituted milks under variable conditions. S. KRISHNA RAO, M. K. RAMA MURTHY, K. D. V. V. DOSS AND R. VENKATESWARA RAO.
- A note on ³¹P uptake by abomasum. I. A. ANGELO
- Effects of lactation number and stage of lactation on milk fat percentage of Karan Swiss cattle. D. K. SADANA, S. B. BASU AND K. L. BHATIA
- Relationship between methylene blue, resazurin and nitrate reduction times of fresh and stored pasteurised milk. T. S. SUDARSANAM, R. N. SINHA AND V. K. N. NAMBU DRIPAD
- Total estrogens and progesterone levels in the blood of the buffaloes during the last two months of pregnancy. B. R. RAO, Y. G. DUGWEKAR, S. T. BAPAT, K. G. GUJARATHI AND P. N. VARMAN
- Effect of oestral mucus of repeat breeders on spermatozoal motility and viability. S. R. PATTABIRAMAN AND V. VENKATASWAMI.
- Factors affecting some production traits in Rajasthani goats. N. K. BARHAT AND M. S. CHOWDHARY
- Comparative study of economic traits of Brown Swiss x Zebu crossbreds. V. K. TANEJA AND D. S. CHAWLA
- Subscription: Rs. 40/- (inland) £4.00 or \$10.00

DIRECTIONS TO CONTRIBUTORS

GENERAL

Two copies of manuscripts should be sent to Dr M. E. Sharpe (*The Journal of Dairy Research*), National Institute for Research in Dairying, Shinfield, Reading, RG2 9AT, England. Submission of a paper will be held to imply that it reports unpublished original work, that it is not under consideration for publication elsewhere, and that if accepted for the *Journal* it will not be published elsewhere in any language, without the consent of the Editors.

FORM OF PAPERS

The author should follow these directions carefully, and consult a current issue of the *Journal* for guidance on details of typographical and other conventions.

Every paper should be headed with its title, the names and initials of the authors (each author supplying one given name) and the name and address of the laboratory where the work was done.

Papers should be in English, using the spelling of the *Shorter Oxford English Dictionary*. They should be typed with double spacing, on one side only of the sheets, and with ample margins for editorial annotations.

Papers should in general be divided into the following parts in the order indicated: (a) Summary, brief and self-contained; (b) Introductory paragraphs, briefly explaining the object of the work but without giving an extensive account of the literature; (c) Experimental or Methods; (d) Results; (e) Discussion and Conclusions; (f) Acknowledgements without a heading; (g) References. With some types of material headings other than (c), (d) and (e) may be preferable.

The use of footnotes should be avoided if possible. Underlining should be used only to indicate italics. Proper nouns, including trade names, should be given a capital initial letter. Wherever possible numerals should be used unless this leads to ambiguity. The typescript should carry the name and address of the person to whom the proofs are to be sent, and give a shortened version of the paper's title, not exceeding 45 letters and spaces, suitable for a running title in the *Journal*.

TABLES

Tables should be numbered and should carry headings describing their content. They should be comprehensible without reference to the text. They should be typed on separate sheets and their approximate positions in the text indicated. *To minimize the cost of printing, the number and size of tables should be kept to an absolute minimum.*

ILLUSTRATIONS

Line drawings, which must be originals, should be numbered as Figures and photographs as Plates, in Arabic numerals. Drawings should be in Indian ink, on Bristol board or cartridge paper. However, a technique which may be more convenient to authors is to use a double-sized piece of tracing paper, or translucent graph paper faintly lined in blue or grey, folded down the centre with the drawing on one half and the other half acting as a flyleaf.

Attached to every figure and plate there should be a translucent flyleaf cover on the outside of which should be written legibly: (a) title of paper and name of author; (b) figure or plate number; (c) the figures and lettering,

which are intended to appear on the finished block, in the correct positions relative to the drawing underneath. Each paper should have a separate typed sheet listing figure and plate numbers with their legends, and the approximate positions of illustrations should be indicated in the text.

The photographs and diagrams should be about twice the size of the finished block and not larger overall than the sheets on which the paper itself is typed. For a figure measuring 250 mm × 150 mm all lines, axes and curves should be 0.4 mm thick, thus , Graph symbols in order of preference are ○ ●, △ ▲, □ ■, × +, and for a 250 mm × 150 mm graph the circles should be 3 mm in diam. The triangles should be equilateral of 3 mm side, and the squares also of 3 mm side. The crosses should have lines 3 mm long at right angles. Scale marks on the axes should be on the inner side of each axis and should be 3 mm long.

SHORT COMMUNICATIONS

Short communications or notes of not more than 2500 words or the equivalent space in print and without a summary will also be published.

REFERENCES

In the text, references should be quoted by whichever of the following ways is appropriate: Arnold & Barnard (1900); Arnold & Barnard (1900a); Arnold & Barnard (1900a, b); (Arnold & Barnard, 1900). Give all the surnames of 3 authors at the first mention, but in subsequent citations and in all cases where there are more than 3 authors give only the first surname (e.g. Brown *et al.*) provided that there is no possible ambiguity.

References should be listed alphabetically at the end of the paper. Titles of journals should be given in full, authors' initials should be included, and each reference should be punctuated in the typescript thus: Arnold, T. B., Barnard, R. N. & Compound, P. J. (1900). *Journal of Dairy Research* 18, 158. References to books should include names of authors, year of publication, title, names of editors, town of publication and name of publisher in that order, thus: Arnold, T. B. (1900). *Dairying*. London: Brown and Chester.

It is the duty of the author to check all references.

UNITS, SYMBOLS AND ABBREVIATIONS

SI units must be used, as explained in British Standards Institution publication PD 5686:1972, *The use of SI units*. Until SI units are widely understood, it is permissible to give the equivalent value in other units in parenthesis. Symbols and abbreviations used are those of British Standard 1991: Part 1: 1967. *Letter Symbols, Signs and Abbreviations*.

DESCRIPTIONS OF SOLUTIONS

Normality and molarity should be indicated thus: N-HCl, 0.1 M-NaH₂PO₄. The term '%' means g/100 g solution. For ml/100 ml solution the term '% (v/v)' should be used and for g/100 ml solution the correct abbreviation is '% (w/v)'.

OFFPRINTS

Order forms giving quotations for offprints are sent to authors with their proofs

CONTENTS

ORIGINAL ARTICLES

- The health and performance of cows fed large amounts of urea
R. J. TREACHER, A. J. STARK and K. A. COLLIS pages 1-14
- Dynamic responses of the dairy cow's teat to step changes in pressure
S. Y. REITSMA and N. R. SCOTT 15-25
- A frequency response of the dairy cow's teat
S. Y. REITSMA and N. R. SCOTT 27-33
- Changes in the activity of lactose synthetase in the goat udder during pregnancy
E. A. JONES 35-40
- Inhibitory effect of adrenaline on oxytocin release in the ewe during the milk-ejection reflex
T. BAROWICZ 41-46
- Metabolism of [U-¹⁴C; 2,3-³H]-L-valine by the isolated perfused goat udder
E. ROETS, A.-M. MASSART-LEËN, R. VERBEKE and G. PEETERS 47-57
- Effects of increased supply of essential amino acids on the metabolism of the isolated perfused guinea-pig mammary gland
A. R. PETERS, S. ALEXANDROV and T. B. MEPHAM 59-67
- Effects of restriction of amino acid supply to the isolated perfused guinea-pig mammary gland
T. B. MEPHAM, A. R. PETERS and S. ALEXANDROV 69-73
- Stereospecific distribution of fatty acids in bovine milk fat triglycerides
P. W. PARODI 75-81
- Serological and fluorescence studies of the heat stability of bovine lactoferrin
A. BAER, M. OROZ and B. BLANC 83-93
- Whey protein denaturation in heated milk and cheese whey
R. M. HILLIER and R. L. J. LYSTER 95-102
- Thermal denaturation of α -lactalbumin and β -lactoglobulin in cheese whey: effect of total solids concentration and pH
R. M. HILLIER, R. L. J. LYSTER and G. C. CHEESEMAN 103-111
- Effect of proteose-peptone on the heat gelation of whey protein isolates
R. M. HILLIER and G. C. CHEESEMAN 113-120
- Strains of *Streptococcus lactis* which contain β -galactosidase
J. A. E. FARROW and E. I. GARVIE 121-125
- SHORT COMMUNICATION
- Taxonomic relationships between *Streptococcus thermophilus* and some other streptococci
G. OTTOGALLI, A. GALLI and F. DELLAGLIO 127-131
- Reviews of the progress of Dairy Science: Swiss-type cheese
G. MOCQUOT 133-160
