

PROCEEDINGS
OF THE
ROYAL SOCIETY OF EDINBURGH

PROCEEDINGS
OF
THE ROYAL SOCIETY
OF EDINBURGH

Section A (Mathematical and Physical Sciences)

VOL. LXV

1957-1961

PUBLISHED BY THE
ROYAL SOCIETY OF EDINBURGH
22 GEORGE STREET
EDINBURGH 2

1962

CONTENTS

NO.	PAGE
1. On the Geometry of Metrisable Lie Algebras. By H. S. Ruse, University of Leeds. Issued separately November 30, 1957,	1
2. On Certain Moduli of Rectangular Matrices. By C. R. Marathe, Muslim University, Aligarh, India. <i>Communicated by</i> Professor S. M. Shah, F.R.S.E. Issued separately November 30, 1957,	13
3. On the Moments and Regression Equations of the Fourfold Negative and Fourfold Negative Factorial Binomial Distributions. By A. J. B. Wiid, National Physical Laboratory, South African Council for Scientific and Industrial Research, Pretoria, South Africa. <i>Communicated by</i> Professor A. C. Aitken, F.R.S. Issued separately January 16, 1958,	29
*4. The Differential Equations Associated with the Uniformization of Certain Algebraic Curves. By R. A. Rankin, Department of Mathematics, Glasgow University. Issued separately January 16, 1958,	35
5. On Certain Classes of Linear Algebras of Genus One. By E. M. Patterson, University of Leeds. <i>Communicated by</i> Dr D. E. Rutherford. Issued separately June 7, 1958,	63
6. Complex Four-dimensional Lie Algebras. By E. W. Wallace, Department of Pure Mathematics, University of Liverpool. <i>Communicated by</i> Professor A. G. Walker, F.R.S. Issued separately June 7, 1958,	72
*7. Entropic Functions for Linear Algebras. By I. M. H. Etherington, University of Edinburgh. Issued separately June 7, 1958,	84
*8. The Central Limit Theorem for a Convergent Non-homogeneous Finite Markov Chain. By J. L. Mott, Department of Mathematics, University of Edinburgh. <i>Communicated by</i> Professor A. C. Aitken, F.R.S. Issued separately February 19, 1959,	109
*9. The Propagation of Thermal Stresses in Thin Metallic Rods. By I. N. Sneddon, The University of Glasgow. Issued separately February 19, 1959,	121
*10. The Dynamic Stresses Produced in Elastic Bodies by Uneven Heating. By G. Eason, King's College, Newcastle upon Tyne, and I. N. Sneddon, The University of Glasgow. Issued separately October 26, 1959,	143
*11. The Free Commutative Entropic Logarithmic. By H. Minc, M.A.(Edin.). <i>Communicated by</i> Dr I. M. H. Etherington. Issued separately October 26, 1959,	177

NO.	PAGE
*12. Solution of the Equation $ze^z = a$. By E. M. Wright, University of Aberdeen. (With One Text-figure.) Issued separately October 26, 1959,	193
*13. A Remark on Coefficients in Certain Asymptotic Expansions. By E. E. Morrison, University of Aberdeen. <i>Communicated by</i> Professor E. M. Wright. Issued separately October 21, 1960,	205
*14. On Analysing the Physical Evolution of Galaxies. By V. C. Reddish, University of Edinburgh. <i>Communicated by</i> Professor H. A. Brück. Issued separately October 21, 1960,	207
*15. The Synthesis of Derivatives of Flourene and Fluoranthene. By Neil Campbell, John T. Craig and Kenneth Nichol, Department of Chemistry, University of Edinburgh. Issued separately October 21, 1960,	223
*16. The Synthesis of 1, 6-Naphthyridine. By Miss B. M. Ferrier and Neil Campbell, Department of Chemistry, University of Edinburgh. Issued separately October 21, 1960,	231
*17. Inherited Measures. By A. M. Macbeath and S. Swierczkowski, Queen's College, Dundee, and Department of Mathematics, University of Glasgow. Issued separately January 27, 1961,	237
*18. Energy Levels of B^{10} : Evidence from the B^{10} ν -ray Spectrum. By R. B. Galloway and R. M. Sillitto, Department of Natural Philosophy, University of Edinburgh. <i>Communicated by</i> Professor N. Feather, F.R.S. (With Six Text-figures and Five Tables.) Issued separately May 1, 1961,	247
*19. On the Radicals of Certain Rings of Infinite Matrices. By E. M. Patterson, King's College, Aberdeen. Issued separately May 3, 1961,	263
20. On the Numerical Evaluation of a Class of Multivariate Normal Integrals. By Harold Ruben, Columbia University, New York, U.S.A. <i>Communicated by</i> Professor A. C. Aitken, F.R.S. Issued separately May 5, 1961	272
*21. The Evaluation of a Definite Integral Which Occurs in Asymptotic Partition Theory. By M. M. Robertson, Department of Mathematics, University of Aberdeen. <i>Communicated by</i> Professor E. M. Wright. Issued separately November 20, 1961,	283
22. Some Nilpotent Algebras with Centres of Given Dimension. By E. W. Wallace, Department of Mathematics, University of Leeds. <i>Communicated by</i> Professor H. S. Ruse. Issued separately November 20, 1961,	310
*23. Representations of a Number as the Sum of a Large Number of Squares. By R. A. Rankin, Department of Mathematics, University of Glasgow. Issued separately April 13, 1962,	318

Contents

vi

NO.	PAGE
*24. Sets of Integers Containing not more than a Given Number of Terms in Arithmetical Progression. By R. A. Rankin, Department of Mathematics, University of Glasgow. Issued separately April 13, 1962,	332
25. Properties of I-extensions of Anti-commutative Algebras. By E. W. Wallace. <i>Communicated by</i> Professor H. S. Ruse. Issued separately April 13, 1962,	345
*26. Solution of the Equation $(z + b)e^{z+a} = \pm(z - b)$. By E. M. Wright. Issued separately April 20, 1962,	358
*27. Hydrogenated 1-Naphthoic Acid Derivatives. By Neil Campbell, David Kidd and Alexander J. Pollock, Department of Chemistry, University of Edinburgh, and St. Modan's High School, Stirling. Issued separately April 20, 1962,	372
*28. The Synthesis of 7-Substituted Fluoranthenes. By Neil Campbell and Douglas A. Crombie, Department of Chemistry, University of Edinburgh. Issued separately April 20, 1962,	376

* The thanks of the Society are due to the Carnegie Trust for the Universities of Scotland for grants towards the costs of these papers.

INSTRUCTIONS TO AUTHORS (*continued*)

The overall space available for figures and plates is $9\frac{1}{2}'' \times 7\frac{1}{2}''$ in *Transactions* and $7\frac{1}{2}'' \times 4\frac{1}{2}''$ in *Proceedings*.

Photographs should be unmounted glossy black and white prints, marked on the back with the name of the author, number of the figure, and an indication of the top. Prints should not be trimmed or cut out. Authors should suggest the arrangement of the figures on each plate, either by a diagram or a paste-up of rough prints, with indication of any lettering to be inserted.

Lettering must be in black ink in neat and legible style, or lightly written in pencil.

Indicating Lines and Arrows required on wash drawings or photographs should have the point marked by a pin-hole, and must be drawn on the back or on a covering tissue and not on the photograph or drawing. On line drawings such lines should be drawn thin but firmly.

Graphs should be drawn on white Bristol board or on squared paper ruled in faint blue lines: no other colour ruling is suitable. Since blue lines do not appear in reproductions, any cross-lines required must be drawn. If a tracing of a graph constructed on an unsuitable grid is submitted, white tracing paper should be used.

Numerical values. In papers concerned with the biological sciences ALL numerical values must be accompanied by their decimal equivalents.

Tables. Tabular matter must be kept to a minimum. No paper should present both tables and corresponding graphs, except where good reason can be given.

Duplicates. When the author can conveniently do so, it is desirable that duplicates of illustrations should be supplied for the use of the referees.

Proofs of papers will be sent to authors or communicators to the addresses indicated in correspondence or on MSS. The cost of authors' corrections in excess of 5 per cent of the printer's charges for the setting of a particular paper will be charged to the authors. Proofs should, if possible, be returned within one week to *The Secretary, Royal Society of Edinburgh, 22 George Street, Edinburgh, 2*, and *not to the printer*. To prevent delay, authors who are abroad should, if possible, appoint someone in this country to correct proofs.

Offprints. As soon as a *Transactions* paper, or the sheet in which the last part of a *Proceedings* paper appears, is ready for press, copies of offprints, in covers bearing the title of the paper and the name of the author, are printed and placed on sale. The date of such separate publication is printed on each paper. Authors of papers will receive twenty-five offprints free, if they so desire. Additional offprints may be obtained at a fixed scale of prices given on a form attached to the first proof. To prevent disappointment, especially if a paper contains plates, authors should, as soon as possible, notify the Secretary of the number of additional copies required.

Indexes. To facilitate the compilation of indexes, and to secure due attention being given to the important points of a paper in Catalogues of Scientific Literature, authors are requested to supply to the Secretary, with the final proofs of papers, a brief index (on the model given below) of the points in a paper which are considered new or important. Indexes will be edited by the Secretary for publication in each volume of the *Transactions* and *Proceedings*.

MODEL INDEX

- Houstoun, R. A.—A measurement of the velocity of light. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.
Light, A measurement of the velocity of.
R. A. Houstoun. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.
Velocity of Light, A measurement of the.
R. A. Houstoun. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.

Authors are advised, before sending in papers, to consult *Notes on the Preparation of Papers to be communicated to the Royal Society of London* (1951), and especially the chapters dealing with symbols, signs, and abbreviations recommended for British Scientific Publications. A copy may be had on application to the Secretary.

NO.		PAGE
XXVI.	Solution of the Equation $(z + b)e^{z+a} = \pm(z - b)$. By E. M. WRIGHT	358
	<i>(Issued separately April 20, 1962)</i>	
XXVII.	Hydrogenated 1-Naphthoic Acid Derivatives. By NEIL CAMPBELL, DAVID KIDD and ALEXANDER J. POLLOCK, Department of Chemistry, University of Edinburgh, and St. Modan's High School, Stirling	372
	<i>(Issued separately April 20, 1962)</i>	
XXVIII.	The Synthesis of 7-Substituted Fluoranthenes. By NEIL CAMPBELL and DOUGLAS A. CROMBIE, Department of Chemistry, University of Edinburgh	376
	<i>(Issued separately April 20, 1962)</i>	

Title, Contents, and Index to Volume

The Papers published in this part of the PROCEEDINGS may be purchased separately at the following Prices:

No. XXI	Price 7s. od.	No. XXV	Price 4s. od.
No. XXII.	„ 2s. 6d.	No. XXVI	„ 4s. od.
No. XXIII	„ 2s. 6d.	No. XXVII	„ 2s. 6d.
No. XXIV	„ 4s. od.	No. XXVIII	„ 2s. 6d.

Fellows of the Society purchasing publications for their own use will be allowed a special discount of 33½ per cent on the stated prices (see Law XVI).
