

Reading the Isotopic Clocks.

Your research in age determination and stable isotopes requires reliable data and custom service. Teledyne Brown Engineering Environmental Services has the expertise and experience to meet these requirements.

We have been pioneers in the industry since 1955 and are the only commercial laboratory that offers all major age determination techniques.

We can assure you of reliable data because of well-staffed and well-equipped labs, intercalibration with major universities and government facilities, and through use of N.B.S. and international standards.

For the most reliable reading of the isotopic clocks, come to the experts.

THE JUMANOS

Hunters and Traders of the South Plains

By Nancy Parrott Hickerson

Hickerson proposes that history has misused the
term "Jumano" as a generic name for a number
of North American tribes. Hickerson argues
that the Jumanos were a distinctive tribe which
played a crucial role among Spanish colonies.

HONOR AMONG THIEVES

A ZOOARCHAEOLOGICAL STUDY OF NEANDERTAL ECOLOGY
MARY C. STINER

LUKURMATA

HOUSEHOLD ARCHAEOLOGY IN PREHISPANIC BOLIVIA
MARC BERMANN

Mary Stiner uses ecological niche theory to analyze and interpret several Middle Paleolithic archaeological and paleontological sites in southern Europe. Her concern is with how the hunting, scavenging and foraging behavior of Neandertals compared and contrasted with the subsistence behavior of other large predators living in the region at the time—lions, hyenas, and wolves, for example—and with how Neandertal subsistence behavior related to the behavior of the anatomically modern humans who subsequently came to dominate the area in the Upper Paleolithic.

"Most of the contents of this book are new: new theoretical approaches, new methods of analysis, new analytical comparisons and a range of new behavioral interpretations. [Mary Stiner's] analytical approach is clear and rigorous, and 'scientific' in the best sense of the word."—Paul A. Mellars, University of Cambridge

"An important book."

—Robert Whallon, University of Michigan

43 halftones. 107 line illustrations.

Cloth: \$69.50 ISBN 0-691-03456-7

Household archaeology, together with community and regional settlement information, forms the basis for a unique local perspective of Andean prehistory in this study of the evolution of the site of Lukurmata, a pre-Columbian community in highland Bolivia. Presenting a "view from below" of Andean prehistory based on a remarkably extensive data set, *Lukurmata* is a rare case study of how prehispanic polities can be understood in new ways if prehistorians integrate the different lines of evidence available to them.

"This book offers one of the finest presentations of data from a deep archaeological sounding from any site in the Titicaca Basin. The interpretative framework is novel and important. The data are excellent."

—Charles Stanish, Field Museum of Natural History, Chicago

"Bermann does an admirable job in presenting new information and generating fresh ways to look at the archaeological record."

—Michael Moseley, University of Florida

The Prehistoric Exploration and Colonisation of the Pacific

Geoffrey Irwin

"Irwin's study is, quite simply, one of the best books written within the past ten years on the archaeology of the Pacific."

—Choice

Forty years of modern archaeology, experimental voyages in rafts and computer simulations have produced an enormous range of literature on the controversial subject of the exploration and colonization of the Pacific. This book represents a major advance in knowledge of prehistoric settlement.

NOTICE TO AUTHORS

American Antiquity publishes original papers on the archaeology of the New World, and on archaeological method, theory, and practice worldwide. Authors of papers on Latin American regional topics are encouraged to submit their work to *Latin American Antiquity*. However, papers on Latin American archaeology may be accepted in *American Antiquity* if they address broad methodological, theoretical, or comparative issues. Authors submit manuscripts to the editor for consideration as ARTICLES, REPORTS, COMMENTS, or FORUM essays. REVIEWS, BOOK NOTES, and OBITUARIES are solicited by the respective associate editors. Information regarding CURRENT RESEARCH should be directed to the managing editor or to the assistant editor for the appropriate region.

Authors should submit an original and four copies of their manuscripts, including all figures, tables, references, and notes. Detailed information on policy, style, and technical matters of manuscript preparation is given in the "Editorial Policy, Information for Authors, and Style Guide for *American Antiquity* and *Latin American Antiquity*," which appeared in the October 1992 issue (57[4]:749–770); for additional information, updates, or clarification consult the managing editor.

The editor reserves the right to evaluate manuscripts (with or without peer review) for appropriate subject matter, quality, length, and compliance with the style guide. Manuscripts may be returned to authors if they fail to meet expectations or conform to these guidelines. Manuscripts are evaluated by the editor in consultation with peer referees, or by the associate editors, as appropriate. The editor has the final responsibility for all decisions regarding manuscripts. The review process generally takes a minimum of two to four months. Authors will be notified as soon as a decision is reached to accept (outright or with revisions) or reject a manuscript.

To ensure the prompt receipt and handling of manuscripts, please send them to: Dr. Michael W. Graves, Editor, *American Antiquity*, Department of Anthropology, 2424 Maile Way, Porteus 346, University of Hawaii, Honolulu, HI 96822. Inquiries regarding the style guide and the production of the journal should be directed to: Janet Walker, Manager, Publications, Society for American Archaeology, 900 Second St., N.E., Suite 12, Washington, DC 20002; (202) 789-8200.
