No. 1 (February 1996)

PAGE

Milkability of Murciano–Granadina dairy goats. Milk partitioning and flow rate during machine milking according to parity, prolificacy and mode of suckling S. PERIS, X. SUCH and G. CAJA	1
Effect of propylene glycol supplementation around parturition on milk yield, reproduction performance and some hormonal and metabolic characteristics in dairy cows A. FORMIGONI, M.-C. CORNIL, A. PRANDI, A. MORDENTI, A. ROSSI, D. PORTETELLE and R. RENAUVILLE	11
Evidence for an interaction between cationic and neutral amino acids at the blood-facing aspect of the lactating rat mammary epithelium D. T. CALVERT and D. B. SHENNAN	25
Effects of heat treatment and acidification on the dissociation of bovine casein micelles A. J. R. LAW	35
Occurrence of five α_{s1} -casein variants in ovine milk L. CHIANESE, G. GARRO, R. MAURIELLO, P. LAEZZA, P. FERRANTI and F. ADDEO	49
Comparative study of methods for the isolation and purification of bovine κ -casein and its hydrolysis by chymosin K. P. COOLBEAR, D. F. ELGAR, T. COOLBEAR and J. S. AYERS	61
Microparticle-enhanced nephelometric immunoassay for caseinomacropptide in milk C. PRIN, N. EL BARI, P. MONTAGNE, M.-L. CULLIERE, M.-C. BENE, G. FAURE, G. HUMBERT and G. LINDEN	73
Effects of pH and temperature on the water-holding capacity of casein curds and whey protein gels C. T. TEO, P. A. MUNRO, H. SINGH and R. C. HUDSON	83
Effects of physicochemical factors on the secondary structure of β -lactoglobulin J. I. BOYE, A. A. ISMAIL and I. ALLI	97
Effect of high hydrostatic pressure on the enzymic hydrolysis of β -lactoglobulin B by trypsin, thermolysin and pepsin H. STAPELFELDT, P. H. PETERSEN, K. R. KRISTIANSEN, K. B. QVIST and L. H. SKIBSTED	111
Bovine milk procathepsin D and cathepsin D: coagulation and milk protein degradation L. B. LARSEN, C. BENFELDT, L. K. RASMUSSEN and T. E. PETERSEN	119
Purification of tributyrin esterase from <i>Lactococcus lactis</i> subsp. <i>cremoris</i> E8 R. HOLLAND and T. COOLBEAR	131
Development of an immunological method for studying the incorporation of ripening enzymes in cheese curd E. LALOY, J.-C. VUILLEMARD, M. EL ABBOUDI, I. FLISS, E. DE GRACE and R. E. SIMARD	141
Enumeration of starter cultures in fermented milks H. B. GHODDUSI and R. K. ROBINSON	151
Cholesterol oxidation in butter and dairy spread during storage J. H. NIELSEN, C. E. OLSEN, C. JENSEN and L. H. SKIBSTED	159

Short communications

- Effect of microwave heating on vitamins A, E, B₁, B₂ and B₆ in milk R. SIEBER,
P. EBERHARD, D. FUCHS, P. U. GALLMANN and W. STRAHM 169
- Effects of ageing on the properties of acid casein C. J. THOMPSON 173

No. 2 (May 1996)

- Teat thickness changes may provide biological test for effective pulsation
J. HAMANN and G. A. MEIN 179
- Milk yield, oxytocin and β -endorphin gradually normalize during repeated milking
in unfamiliar surroundings R. M. BRUCKMAIER, H.-U. PFEILSTICKER and
J. W. BLUM 191
- Simultaneous recording of oxytocin release, milk ejection and milk flow during
milking of dairy cows with and without prestimulation R. M. BRUCKMAIER
and J. W. BLUM 201
- Leucine and protein metabolism in the lactating dairy cow mammary gland:
responses to supplemental dietary crude protein intake B. J. BEQUETTE,
J. A. METCALF, D. WRAY-CAHEN, F. R. C. BACKWELL, J. D. SUTTON,
M. A. LOMAX, J. C. MACRAE and G. E. LOBLEY 209
- Application of numerical analysis to a number of models for chymosin-induced
coagulation of casein micelles D. B. HYSLOP and K. B. QVIST 223
- Iron-supplemented caseins: preparation, physicochemical characterization and
stability F. GAUCHERON, M.-H. FAMELART and Y. LE GRAËT 233
- Detection and localization of peptidases in *Lactococcus lactis* with monoclonal
antibodies H. LAAN, R. E. HAVERKORT, L. DE LEIJ and W. N. KONINGS 245
- Immunomodulatory activities of whey fractions in efferent prefemoral lymph of
sheep C. W. WONG, G. O. REGESTER, G. L. FRANCIS and D. L. WATSON 257
- Effects of somatic cell count and stage of lactation on raw milk composition and the
yield and quality of Cheddar cheese M. J. AULDIST, S. COATS,
B. J. SUTHERLAND, J. J. MAYES, G. H. McDOWELL and G. L. ROGERS 269
- Milk protein standardization by ultrafiltration for Cheddar cheese manufacture
T. P. GUINEE, D. J. O'CALLAGHAN, E. O. MULHOLLAND and D. HARRINGTON 281
- Survival and residual activity of *Lactobacillus acidophilus* frozen cultures under
different conditions R. FOSCHINO, E. FIORI and A. GALLI 295

Short communications

- Cortisol and regulation of tight junctions in the mammary gland of the late-
pregnant goat G. E. THOMPSON 305
- Recommended method for measuring changes in thickness of the bovine teat with
spring-loaded calipers J. HAMANN, G. A. MEIN and B. NIPP 309

Non-Newtonian behaviour of whey protein solutions M. R. ALIZADEHFARD and D. E. WILEY	315
Carbon dioxide fixation by cells and cell-free extracts of <i>Streptococcus thermophilus</i> H. LOUAÏLÈCHE, P. BRACQUART, C. GUIMONT and G. LINDEN	321
<i>Saccharomyces unisporus</i> as the principal alcoholic fermentation microorganism of traditional koumiss G. MONTANARI, C. ZAMBONELLI, L. GRAZIA, G. K. KAMESHEVA and M. KH. SHIGAIEVA	327

Review article

PP3 component of bovine milk: a phosphorylated whey glycoprotein J.-M. GIRARDET and G. LINDEN	333
---	-----

No. 3 (August 1996)

Acute phase response in heifers with experimentally induced mastitis J. HIRVONEN, S. PYÖRÄLÄ and H. JOUSIMIES-SOMER	351
Field study on the relationship between teat thickness changes and intramammary infections A. ZECCONI, V. BRONZO, R. PICCININI, P. MORONI and G. RUFFO	361
Relationship between thickness, chapping and <i>Staphylococcus aureus</i> colonization of bovine teat tissue L. K. FOX and M. S. CUMMING	369
Effect of somatic cell count and stage of lactation on the quality and storage life of ultra high temperature milk M. J. AULDIST, S. J. COATS, B. J. SUTHERLAND, J. F. HARDHAM, G. H. McDOWELL and G. L. ROGERS	377
Electroacoustic determination of size and zeta potential of casein micelles in skim milk T. WADE, J. K. BEATTIE, W. N. ROWLANDS and M.-A. AUGUSTIN	387
Phosphopeptides interacting with colloidal calcium phosphate isolated by tryptic hydrolysis of bovine casein micelles V. GAGNAIRE, A. PIERRE, D. MOLLÉ and J. LÉONIL	405
Aggregation of β -lactoglobulin studied by <i>in situ</i> light scattering M. A. M. HOFFMANN, S. F. P. M. ROEFS, M. VERHEUL, P. J. J. M. VAN MIL and K. G. DE KRUIF	423
Effect of different heat treatments on the strong binding interactions between whey proteins and milk fat globules in whole milk M. CORREDIG and D. G. DALGLEISH	441
Synthesis of plasminogen activator inhibitor I by bovine mammary epithelial and myoepithelial cell lines B. ZAVIZION, C. W. HEEGARD, J. WHITE, F. CHELI and I. POLITIS	451
Screening and characterization of fungal cultures for a milk-clotting enzyme for use in an oriental style dairy product C.-W. LIN and H.-L. CHEN	459
Effect of incorporation of cottage cheese whey solids and <i>Bifidobacterium bifidum</i> in freshly made yogurt M. I. BAIG and V. PRASAD	467

Short communications

- Ten day composite milk samples give accurate somatic cell counts T. CLARKE, G. HEPWORTH and P. J. MOATE. 475
- Porcine β -lactoglobulin does not undergo thermally induced gelation D. P. GALLAGHER, M. G. LYNCH and D. M. MULVIHILL. 479
- Inhibition of mould growth by oligomycin during quantitative analysis of yeasts F. ELISKASES-LECHNER and H. PRILLINGER 483

Review article

- Open texture in cheese: the contributions of gas production by microorganisms and cheese manufacturing practices F. G. MARTLEY and V. L. CROW 489

No. 4 (November 1996)

- Cisternal milk in the dairy cow during lactation and after preceding teat stimulation H.-U. PFEILSTICKER, R. M. BRUCKMAIER and J. W. BLUM 509
- Influence of pulsationless milking on teat canal keratin growth and turnover S. J. LACY-HULBERT, J. E. HILLERTON and M. W. WOOLFORD 517
- Hyperkeratosis of the teat duct orifice in the dairy cow M. F. H. SHEARN and J. E. HILLERTON 525
- Distribution of the anthelmintic drug albendazole and its major metabolites in ovine milk and milk products after a single oral dose M. DE LIGUORO, F. LONGO, G. BRAMBILLA, A. CINQUINA, A. BOCCA and A. LUCISANO 533
- Cell cycle regulation of mammary epithelial cell detachment by *Staphylococcus aureus* B. ZAVIZION, A. J. BRAMLEY and I. POLITIS 543
- Reversibility of shrinkage of mineral acid casein curd as a function of ionic strength, pH and temperature C. T. TEO, P. A. MUNRO and H. SINGH 555
- Tocopherols, retinol, β -carotene and fatty acids in fat globule membrane and fat globule core in cows' milk S. K. JENSEN and K. N. NIELSEN 565
- New crystal form of β -lactoglobulin T. L. ROCHA, S. BROWNLOW, K. N. SADDLER, L. A. FOTHERGILL-GILMORE and L. SAWYER 575
- Growth characteristics of post-pasteurization contaminants isolated from pasteurized milk R. G. STEVENSON, G. B. WISDOM, M. T. ROWE and D. A. MCCONAGHY 585
- Effect of medium-chain fatty acids in moulded ripened cheese on the growth of *Listeria monocytogenes* J. L. KINDERLERER, H. E. MATTHIAS and P. FINNER 593
- Identification of starter cultures in thermally treated plain yogurt using gene probes and polymerase chain reaction S. LICK, M. KELLER, U. KRUSCH and K. J. HELLER 607
- Cholesterol oxidation in feta cheese produced from high-temperature bleached and from non-bleached butteroil from bovine milk J. H. NIELSEN, C. E. OLSEN, J. LYNDON, J. SØRENSEN and L. H. SKIBSTED 615

Short communications

Transepideral water loss of bovine teats J. E. BURMEISTER, L. K. FOX, D. D. HANCOCK, C. C. GAY, J. M. GAY, S. M. PARISH, J. W. TYLER and C. T. GASKINS	623

Effect of thiol reagents on the acid-heat-induced gelation of high-heat skim milk S. J. GODDARD	639
Distribution of proteins in concentrated skim milk reconstituted from low- and high-heat milk powders B. R. WARD, S. J. GODDARD, M.-A. AUGUSTIN and I. R. MCKINNON	643
Bacteriophage inactivation and starter-inhibiting properties of a peracetic acid disinfectant L. P. M. LANGEVELD and R. M. G. E. VAN MONTFORT-QUASIG . .	649

Experimental Agriculture

Experimental Agriculture publishes the results of analytical research into the agronomy of crops, particularly the food, forage and industrial crops of the warmer regions of the earth. International in scope, it is especially concerned with experimental work conducted in the field and is designed to explain agronomic results in biological and environmental terms. The journal publishes accounts of new methods of agricultural crop production and discussions of problems arising from the rapid expansion of agricultural production. Particular emphasis is placed on papers covering farming systems and sustainability in tropical regions. There are also regular book reviews.

A selection of recent articles

The Journal of Agricultural Science

Now published eight times a year, this leading journal is concerned with the advance of agriculture and the use of land resources throughout the world. It publishes original scientific work related to strategic and applied studies in all aspects of agricultural science, including agronomy and crop physiology, breeding, genetics and pathology, soil science, animal nutrition, physiology and genetics, and the mathematical and statistical methods used in experimentation and data analysis. The journal also publishes book reviews and invited short reviews of scientific topics of current relevance.

DIRECTIONS TO CONTRIBUTORS

NOTE

Full Directions to Contributors, of which this is a summary, appear in the first (February) issue of each volume.

GENERAL

The *Journal of Dairy Research* publishes reports on all aspects of dairy science from any country. Material for publication should be sent to the Editor: Dr B. A. Rolls, Institute of Food Research, Earley Gate, Whiteknights Road, Reading RG6 2EF, UK. Receipt of all material will be acknowledged. Submission of a paper will be taken to imply that it reports original unpublished work, that it is not under consideration elsewhere, and that if accepted by the *Journal* it will not be published elsewhere in any language without the consent of the Editors. Authors of accepted articles will be asked to assign their copyright, under certain conditions, to the *Journal*.

FORM OF PAPERS

Papers should be written in English using the spelling of the *Concise Oxford Dictionary* and should as far as possible be comprehensible to the non-specialist reader. They should be concise, but without omitting necessary material, and contain sufficient detail to allow repetition of the work.

Papers should be typed with wide margins on one side of A4 or quarto paper, double spaced throughout, including References, Figure legends and Table headings and footnotes. Submit a top copy and two good copies packed flat. A single copy will be accepted from outside Europe.

Authors should consult a recent issue of the *Journal of Dairy Research* to familiarize themselves with Journal conventions and layout. Attention to these and other details will speed publication.

LAYOUT OF PAPERS

The paper should generally be divided as follows. (a) *Cover sheet* with the title of the article, names of the authors each with one forename, together with their affiliations, a shortened version of the title suitable as a heading, and the name and address for correspondence. (b) A brief *Summary*, should encapsulate the whole paper, showing clearly the new knowledge acquired. (c) The introduction, without heading, should not contain a full literature review, but should indicate why the subject of enquiry is interesting or important, and why the authors have chosen the approach described. (d) The *Experimental or Materials and Methods* section should contain adequate descriptions of procedures or appropriate references; sources of all materials (including address, with post code) and sources or strains of animals, microorganisms and so on should be indicated. (e) *Results* should be as concise as possible, without repetition or inclusion of irrelevant material. Tables and illustrations should be used efficiently. (f) The *Discussion* should not repeat the results but discuss their significance. Acknowledgements are given in a separate paragraph without heading. It is the responsibility of the authors to ensure that individuals or organizations acknowledged as providing materials or otherwise are willing to be identified. (g) *References*. Note. For some types of paper, other divisions may be preferable.

REFERENCES

References should be given in the text as Brown & Jones (1987) or (Schmidt, 1985; Nakamura *et al.* 1989); the first author with *et al.* is used for papers with three or more

authors. Where necessary, papers are distinguished as Lenoir (1988*a*), (Litov *et al.* 1990*a, b*). When several references appear together in the text, cite them in chronological order, and alphabetically within years. The Reference list at the end of the paper, which should begin on a fresh page, is given in strict alphabetical order. Authors should refer to a recent issue for the format of references.

TABLES

Tables should be numbered and carry headings enabling them to be understood without reference to the text. Each Table should be typed on a separate sheet, but their approximate position in the text should be indicated. Symbols for footnotes should be in the order: †, ‡, §, ||, ¶, ††, etc. The use of *, **, etc, should be limited to indicating levels of significance.

ILLUSTRATIONS

Line drawings and photographs, which must be originals, should be numbered as Figures in Arabic numerals. Drawings should each be on a separate sheet, not larger overall than those on which the paper is typed, and packed flat. Curves or lines should not extend beyond the experimental points, which should be indicated, symbols used being, in order: ○, ●, △, ▲, □, ■, ×, +. Final lettering is done at the Press, so *there must be no letters or numerals on the drawing or photograph itself*. Their positions should be indicated either on a copy of the Figure, or on a translucent flyleaf firmly attached to the Figure. Each Figure should be provided with a legend such that with the Figure it is comprehensible without reference to the text. Figure legends should be typed on a separate sheet or sheets.

Photographs should be glossy black and white prints accompanied by a legend as above. Scale bars on the photograph should be used, not magnifications in the legend. Only one copy of each illustration is required, but authors should ensure that photocopies provided with the other copies of the paper are of adequate quality to allow referees to judge their value.

STATISTICAL TREATMENT

Individual results should not normally be given. The methods of statistical analysis should be clearly described; a suitable reference is adequate. Authors should make it clear whether they are quoting (e.g.) SD or SE. Any statement that two groups of values are different should be supported by the level of significance involved, as a single or range of *P* value: ($P = 0.008$) or ($P < 0.01$). Differences should not be claimed or implied if $P > 0.05$.

ETHICS OF EXPERIMENTS

Authors are expected to adhere to the relevant codes covering human subjects and the use of animals.

PROOFS

Authors will be advised when to expect proofs, which should be returned without delay to Mrs B. Gillian Day, Institute of Food Research, Earley Gate, Whiteknights Road, Reading RG6 2EF, UK. Proofs are sent for the correction of any printer's or editorial errors, not for addition of new material or revision of the text. Excessive alteration may have to be disallowed or made at the authors' expense, and may delay publication. Order forms for offprints are sent with proofs and should be returned directly to The University Press, Cambridge.
