Nagoya Mathematical Journal is, in principle, the official organ of the Department of Mathematics, Nagoya University, designed solely for the publication of research papers. However, some invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German with sufficient space between lines, and special letters such as bold-face, German, Greek, and script should be clearly marked. All single letters used in formulas will appear in italic, and mathematical symbols will appear in the standard style usual for mathematical literature. Therefore, it is not required to mark such letters and symbols. Instructions which conflict with the general printing rules of the journal will not be accepted. For example, each paragraph title should appear in bold-face. Good reproductions of a typewritten manuscript are acceptable.

As soon as we receive a manuscript, a receipt will be sent to the author. When a manuscript has been sent to a referee, the author will receive another notice. These receipts and notices, however, do not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Each author, as well as each co-author, will have 100 reprints, while only one set of proof will be prepared per paper for proof-reading by the author(s). Therefore, a joint paper must carry instructions as to whom the proof should be sent. Attached to the proof, an order form will be sent to the author for the additional reprints which are available at approximately 3¢ per page.

The actual business of the Nagoya Mathematical Journal is performed by the managing editor with the cooperation of editors residing in Nagoya.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Department of Mathematics, Faculty of Science, Nagoya University, Chikusa-ku, Nagoya, 464, Japan.

CONTENTS

On the zeros of a conformal vector field	D. E. BLAIR	1
Geometric applications of critical point theory to submanifolds of complex projective space	T. E. CECIL	5
Siegel domains over self-dual cones and their automorphisms	T. TSUJI	33
On the semisimplicity of the algebra associated to a polarized algebraic variety	Y. KATO	81
On Lie algebras of vector fields with invariant submanifolds	A. KORIYAMA	91
Sur les cônes convexes de Riesz et les noyaux de convolution complètement sous-harmoniques	M. ITÔ	111
On some rationality properties of Hopf maps	T. ONO	145
Über eine Klasse von L -Funktionen algebraischer Zahlkörper	S.-N. KURODA	151
On weak concepts of stability	G. IKEGAMI	161
On a class of degenerate elliptic equations	Y. HASHIMOTO and T. MATSUZAWA	181
