

Weed Science Society of America Membership Application

Name _____

Employer _____

Department _____

Address _____

City _____

State/Zip/Country _____

Phone (Office) _____ (Fax) _____ (E-mail) _____

_____ % of Time devoted to Weed Science related activities

Mark all of the appropriate areas of involvement:

- | | |
|---|--|
| <input type="checkbox"/> a) Administration/Management | <input type="checkbox"/> g) Registration |
| <input type="checkbox"/> b) Contract Research | <input type="checkbox"/> h) Regulatory/Legal |
| <input type="checkbox"/> c) Extension | <input type="checkbox"/> i) Research |
| <input type="checkbox"/> d) Graduate Student | <input type="checkbox"/> j) Sales/Technical Services |
| <input type="checkbox"/> e) Private Practice | <input type="checkbox"/> k) Teaching |
| <input type="checkbox"/> f) Products Development/R&D | <input type="checkbox"/> l) Other |

If appropriate, indicate areas of specialization:

- | | |
|---|---|
| <input type="checkbox"/> 1) Agent | <input type="checkbox"/> 11) Non-cropland |
| <input type="checkbox"/> 2) Application Technology | <input type="checkbox"/> 12) Physiology |
| <input type="checkbox"/> 3) Aquatic Weeds | <input type="checkbox"/> 13) Plant Biotechnology/Genetics |
| <input type="checkbox"/> 4) Biological Control of Weeds | <input type="checkbox"/> 14) Residue Chemistry |
| <input type="checkbox"/> 5) Field Crops | <input type="checkbox"/> 15) Soil |
| <input type="checkbox"/> 6) Forage Crops | <input type="checkbox"/> 16) Specialists |
| <input type="checkbox"/> 7) Forestry | <input type="checkbox"/> 17) Sustainable Agriculture |
| <input type="checkbox"/> 8) Fruit and Vegetables | <input type="checkbox"/> 18) Toxicology |
| <input type="checkbox"/> 9) Integrated Pest Management | <input type="checkbox"/> 19) Turf/Ornamental |
| <input type="checkbox"/> 10) Modeling | <input type="checkbox"/> 20) Weed Biology/Ecology |

Type of membership: Regular (\$85)

Student (\$30) (Advisor must sign)

Weed Science Society of America

P.O. Box 1897, 810 East 10th St., Lawrence, KS 66044-8897. Ph: (800)627-0629 (U.S. and Canada), (785)843-1235;

Fax: (785)843-1274; E-mail: wssa@allenpress.com

Weed Science will publish short reports of important scientific advances. Such reports will not normally exceed 2,000 words and cannot be accompanied by more than one table or figure and should not include more than ten references. Each submission for rapid publication will be reviewed in less than one month. If accepted for publication, the manuscript will be published as soon as possible. The manuscripts will bypass the normal publication queue. Manuscripts must offer insights and be clear advances of our science. They might contain research results that are complete but characterized by a rather limited area or scope. Descriptions of new or improved techniques or equipment may be acceptable. Abstracts of no more than 100 words are mandatory. Each submission must be accompanied by a brief letter stating the reasons why the work should be considered for rapid publication. Manuscripts without an accompanying letter of justification will be returned or reviewed in the normal review process. Electronic submissions are welcome. Manuscripts should be sent directly to the Editor. It is not necessary to send copies to the *Weed Science* Managing Editor at Allen Press.

DIRECTIONS FOR CONTRIBUTORS TO *WEED SCIENCE*

Manuscripts on the biology, ecology, physiology, or management and control of weeds; and on herbicides, growth regulators, or related topics will be considered for publication in *Weed Science*. Each manuscript must contain original material constituting a logical unit of subject matter and must contribute to the advancement of knowledge.

Send two copies of the text and all illustrations to the Managing Editor, Allen Press, Inc., 810 East 10th Street, Lawrence, KS 66044-8897 and one copy to R. L. Zimdahl, Editor, *Weed Science*, Weed Research Laboratory, Colorado State University, Fort Collins, CO 80523-1177. In the accompanying cover letter provide: (1) the corresponding author's name, telephone number, and e-mail address, (2) five stick-on labels showing the name and address of the corresponding author (to Allen Press only), (3) the category which best describes the paper's content: Weed Management; Physiology, Chemistry, and Biochemistry; Weed Biology and Ecology; Soil, Air, and Water; or Special Topic, and (4) names, addresses, phone numbers, fax numbers, and e-mail addresses of several possible reviewers.

Authors are asked to pay a portion of publication costs (\$50 per page). Authors must send a disk copy with the final manuscript. *Weed Science* welcomes short concise review articles. Authors who wish to prepare a review should contact the current chair of the WSSA reviews committee or the journal editor.

PREPARING THE MANUSCRIPT

STYLE. Refer to a recent issue of *Weed Science* and the Directions for Contributors to *Weed Science* (issue 6 each year) for guidance on proper style. *Weed Science* follows *Scientific Style and Format, the CBE Manual for Authors, Editors, and Publishers*, 6th ed., Cambridge University Press, Cambridge, MA, 1994. The manuscript is usually assembled in the following order: title, author(s) and affiliation, abstract, nomenclature, key words, introduction, materials and methods, results and discussion, sources of materials, acknowledgments, literature cited, tables, captions for figures, and figures.

NUMBERING. Submit manuscripts on 21.6- by 27.9-cm (8 1/2- by 11-inch) bond paper with the lines numbered on each page. Number pages consecutively, including separate pages for literature cited, tables and captions for figures.

SPACING. Double-space everything, including text, tables, figure legends, footnotes, and literature citations.

TITLE. Capitalize only the first letter of the first word and others that must be capitalized (e.g., Genus). Use the scientific name without authority for all weeds.

AUTHORS. Use the given name for each author, note corresponding author, and include an e-mail address for that author. Give institutional affiliation for each author.

ABSTRACT. Begin the abstract on a new page. The abstract must be written as a single paragraph containing an informative digest of the significant findings.

NOMENCLATURE. Begin with common or code names for herbicides used in the title and abstract. For organisms use the Latin binomial name and the five-letter code. The order should be herbicides, weeds, and crops, alphabetized within each group. Example: Glyphosate, MCPA, *Poa annua* L. POANN, annual bluegrass; *Setaria faberii* Herrm. SETFA, giant foxtail; *Zea mays* L., corn; 'Pioneer 3732.' Note use of commas and semicolons.

KEY WORDS. Include words not in the title that describe the manuscript's content.

ABBREVIATIONS. Each nonstandard abbreviation and acronym

should be introduced in parentheses immediately after first use of the complete word or phrase.

MEASUREMENTS AND UNITS. Report all measurements in SI units or SI-derived units.

NUMBERS. Use arabic numerals for all numbers with two or more digits and for all measurements such as time, weight, length, area, concentration, or temperature.

PLANT AND ANIMAL NAMES. At the first mention of a plant not included in nomenclature, give its scientific name (typed in italics or underlined), the author of Latin binomial, crop cultivar name in single quotation marks followed in parentheses by its common name. For cultivar names that are registered trade names insert ®. At first occurrence only in nomenclature or text, use the appropriate five letter, WSSA-approved computer codes from *Composite List of Weeds*, 1989 for species important in the manuscript. Example: *Cyperus rotundus* L. (purple nutsedge), CYPRO. In subsequent mentions of these species use only the scientific name. The genus may be abbreviated in subsequent mention e.g., *C. rotundus*.

HERBICIDE AND OTHER PESTICIDE NAMES. At the first mention of a herbicide or other pesticide not in nomenclature, give its common name or other designation. Use common names as printed each year in the last issue of *Weed Science*.

SOIL TERMINOLOGY. Include the soil series with textural classification and the subgroup name, using the terminology of the U.S. Department of Agriculture and Soil Conservation Services publication, *Soil Taxonomy*, U.S. Government Printing Office, Washington, D.C., 1988.

STATISTICAL ANALYSES. Data must be analyzed statistically, and results of the analyses should be included in tables or figures where the data are presented. Multiple comparison tests (LSD and Duncan's multiple range) may be used when appropriate, but not on structured data such as quantitative series of treatments (e.g., herbicide rates in stepwise increments) or factorial treatments.

SOURCES OF MATERIALS. Use consecutive superscript numbers to provide sources of materials. The Sources of Materials section appears before Acknowledgments or Literature Cited. Provide a brief description of the item, model number (if applicable), company name, and complete postal address, including ZIP code.

LITERATURE CITATION. *Weed Science* uses the author-year system with complete citations listed alphabetically on a separate page after the text, followed by tables and figures. Abbreviate journal names using the most recent edition of *BIOSIS Serial Sources*, BIOSIS, Philadelphia, PA, and recent issues of *Weed Science*. In-text literature citations are listed alphabetically by author, then chronologically.

TABLES AND FIGURES. Tables should be no more than 120-character spaces wide. All text within each table should be in lower case letters except for the first word of a phrase or sentence. Proper nouns should have initial capitals. Use all caps for weed codes.

Experimental data may be presented in graphic or tabular form, but the same data will not be published in both forms. Data points and relevant equations must be included on figures. Number each figure on the back.

MANUSCRIPT REVIEW

Manuscripts will be reviewed by two or more anonymous reviewers and an Associate Editor. Communications concerning changes are with the Associate Editor. Final acceptance or rejection is the prerogative of the Editor. To facilitate timely publication of manuscripts, author proofs must be corrected and returned to the Managing Editor within 10 days of receipt.
