INTERNATIONAL GLACIOLOGICAL SOCIETY

The Society was founded in 1936 to provide a focus for individuals interested in practical and scientific aspects of snow and ice. Membership is open to all individuals who have a scientific, practical or general interest in aspects of snow and ice study.

Papers on glaciology are printed in the *Journal of Glaciology*, which is published six times a year. The Society also publishes the *Annals of Glaciology*, a peer-reviewed, thematic journal, two to four times a year. The Society's news bulletin, *ICE*, is published three times a year.

The Society sponsors symposia, meetings and workshops in many countries throughout the year.

Journal of Glaciology publishes original articles and letters concerning scientific research into any aspect of ice and snow, and interactions between ice, snow, climate and other environmental phenomena including the biosphere and permafrost. Research techniques described in the Journal include, for example, field studies, remote sensing, computer modelling and laboratory studies. Research topics include the nature of and changes in mountain glaciers and ice sheets, including former ice sheets. For example, ice cores extracted from the glaciers and ice sheets reveal detailed information on past atmospheric composition and climate, and changes in the extent and thickness of the ice sheets are also related to climate change. The physical, chemical and crystallographic properties of ice and snow are included, especially but not only as they relate to the flow of ice and to past climate. The Journal also publishes studies of sea ice, and of icebergs, along with their interactions with climate on shorter time scales, and with the ocean. Snow and avalanche research is included in the Journal, with several recent articles investigating avalanche dynamics. Snow and ice on other planets is also within the realm of the Journal of Glaciology, as are studies of atmospheric ice.

Journal of **GLACIOLOGY**

CONTENTS Vol 64 No 243 2018

- 1 **Ian Joughin, Ben E. Smith, Ian M. Howat**
A complete map of Greenland ice velocity derived from satellite data collected over 20 years
- 12 **Roberto Garzonio, Biagio Di Mauro, Daniele Strigaro, Micol Rossini, Roberto Colombo, Mattia De Amicis, Valter Maggi**
Mapping the suitability for ice-core drilling of glaciers in the European Alps and the Asian High Mountains
- 27 **James H. Lever, Susan Taylor, Arnold J. Song, Zoe R. Courville, Ross Lieblappen, Jason C. Weale**
The mechanics of snow friction as revealed by micro-scale interface observations
- 37 **J. E. Kamintzis, J. P. P. Jones, T. D. L. Irvine-Fynn, T. O. Holt, P. Bunting, S. J. A. Jennings, P. R. Porter, B. Hubbard**
Assessing the applicability of terrestrial laser scanning for mapping englacial conduits
- 49 **Caroline Aubry-Wake, Dorian Zépher, Michel Baraer, Jeffrey M. McKenzie, Bryan G. Mark**
Importance of longwave emissions from adjacent terrain on patterns of tropical glacier melt and recession
- 61 **Mohd Farooq Azam, Patrick Wagnon, Etienne Berthier, Christian Vincent, Koji Fujita, Jeffrey S. Kargel**
Review of the status and mass changes of Himalayan-Karakoram glaciers
- 75 **Joanna C. Young, Anthony Arendt, Regine Hock, Erin Pettit**
The challenge of monitoring glaciers with extreme altitudinal range: mass-balance reconstruction for Kahiltna Glacier, Alaska
- 89 **Jizu Chen, Xiang Qin, Shichang Kang, Wentao Du, Weijun Sun, Yushuo Liu**
Effects of clouds on surface melting of Laohugou glacier No. 12, western Qilian Mountains, China
- 100 **Chris R. Stokes, Liss M. Andreassen, Matthew R. Champion, Geoffrey D. Corner**
Widespread and accelerating glacier retreat on the Lyngen Peninsula, northern Norway, since their 'Little Ice Age' maximum
- 119 **A. Viani, T. Condom, C. Vincent, A. Rabatel, B. Bacchi, J. E. Sicart, J. Revuelto, D. Six, I. Zin**
Glacier-wide summer surface mass-balance calculation: hydrological balance applied to the Argentière and Mer de Glace drainage basins (Mont Blanc)
- 132 **Hongbo Zhang, Fan Zhang, Guoqing Zhang, Yaoming Ma, Kun Yang, Ming Ye**
Daily air temperature estimation on glacier surfaces in the Tibetan Plateau using MODIS LST data
- 148 **Dieter Issler, James T. Jenkins, Jim N. McElwaine**
Comments on avalanche flow models based on the concept of random kinetic energy
- 165 **Perry Bartelt, Othmar Buser**
Avalanche dynamics by Newton. Reply to comments on avalanche flow models based on the concept of random kinetic energy
- Letter*
- 171 **Toby W. Meierbachtol, Joel T. Harper, Neil F. Humphrey**
Short duration water pressure transients in western Greenland's subglacial drainage system
