

Copying. This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to C.C.C. of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-1145/90 \$5.00 + .00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

The Proceedings of the Nutrition Society, published by the Cambridge University Press, in part record meetings of the Symposium type, at which experts in a particular field are invited by Council to make contributions on specific parts of it and at which general discussion follows these invited contributions. The contributions will be published *in extenso*; such summaries of the ensuing discussions as circumstances warrant may also be published. The Society also holds scientific meetings at which papers are communicated by members and others on original work carried out by them. It is proposed at present to publish summaries of the papers read at each meeting, each communication being recorded in the Society's *Proceedings* by means of an abstract not exceeding in length 400 words or the equivalent space in print. The *Proceedings* are published three times a year.

The subscription to the *Proceedings* is £81 in UK, £85 elsewhere net (US \$180.00 in USA and Canada). Single issues are £29.00 (US \$69.00 in the USA and Canada) each; postage extra.

Metabolism in Ruminants

Resistance of leaf and stem fractions of tropical forage to chewing and passage in cattle. <i>McLeod M. N., Kennedy P. M. & Minson D. J.</i>	105-119
Excretion of purine derivatives by ruminants: endogenous excretion, differences between cattle and sheep. <i>Chen X. B., Ørskov E. R. & Hovell F. D. DeB.</i>	121-129
Excretion of purine derivatives by ruminants: effect of exogenous nucleic acid supply on purine derivative excretion by sheep. <i>Chen X. B., Hovell F. D. DeB., Ørskov E. R. & Brown D. S.</i>	131-142

CONTENTS

Obituary Notice

Obituary notice: Sir David P. Cuthbertson (1900–1989). *Fleck A.* 1–4

Editorial

Gurr M. I. 5–6

Carbohydrate Digestion by Colonic Microflora

Metabolism of maltitol by conventional rats and mice and germ-free mice, and comparative digestibility between maltitol and sorbitol in germ-free mice. *Würsch P., Koellreutter B., Gétaz F. & Arnaud M. J.* 7–15

The effect of lactulose, pectin, arabinogalactan and cellulose on the production of organic acids and metabolism of ammonia by intestinal bacteria in a faecal incubation system. *Vince A. J., McNeil N. I., Wager J. D. & Wrong O. M.* 17–26

Amino Acid Metabolism

Tryptophan metabolism in vitamin B₆-deficient mice. *Bender David A., Njagi Eliud N. M. & Danielian Paul S.* 27–36

Human Metabolic Responses to Food

Minor difference in postprandial responses of men between starch and sugar when replacing fat in a normal meal. *Van Amelsvoort J. M. M., Van Stratum P., Kraal J. F., Lussenburg R. N. & Dubbelman G. P.* 37–51

The effect of a 48 h fast on the physiological responses to food ingestion in normal-weight women. *Gallen I. W., Macdonald I. A. & Mansell P. I.* 53–64

Mineral Nutrition

The effect of diets adequate and deficient in calcium on blood pressures and the activities of intestinal and kidney plasma membrane enzymes in normotensive and spontaneously hypertensive rats. *Blakeborough Peter, Neville Sheila G. & Rolls Brian A.* 65–78

Forms of soluble iron in mouse stomach and duodenal lumen: significance for mucosal uptake. *Simpson Robert J. & Peters T. J.* 79–89

Breast milk zinc and copper concentrations in Bangladesh. *Simmer Karen, Ahmed Shameen, Carlsson Linda & Thompson R. P. H.* 91–96

Ontogenic changes in hepatic glutathione and metallothionein in rats and the effect of a low-sulphur-containing diet. *Taniguchi Misako & Cherian M. George* 97–103
