

# Primary Health Care Research & Development

VOLUME 10 | ISSUE 2 | APRIL 2009

## CONTENTS

### Editorial

- 81 Providing primary care for people with serious mental illness  
*Helen Lester*

### Development

- 83 Joining Up Self-Care: evaluation of a PCT-wide programme of support for self-care  
*Alison Blenkinsopp, Jeremy Holmes, Gopa Mitra and Mike Pringle*

### Research

- 98 Parents' perceptions of home injury risk and attitudes to supervision of pre-school children: a qualitative study in economically deprived communities  
*Jenny Ingram and Alan Emond*
- 109 Living with childhood asthma: parental perceptions of risk in the household environment and strategies for coping  
*Ann Crosland, Isabel Gordon and Annette Payne*
- 117 School-based tobacco control efforts and the smoking behaviour of high school students in Prince Edward Island, Canada: examining differences  
*Donna A. Murnaghan, Marja Sihvonen, Scott T. Leatherdale and P. Kekki*
- 130 Too little for early interventions? Examining the policy-practice gap in English health visiting services and organization  
*Sarah Cowley, Sandra Dowling and Woody Caan*
- 143 Non-consultation among community-dwelling older adults with knee pain: completing the picture  
*John Bedson, Sara Mottram and George Peat*
- 151 The impact of space and time on interprofessional teamwork in Canadian primary health care settings: implications for health care reform  
*Ivy F. Oandasan, Lesley Gotlib Conn, Lorelei Lingard, Allia Karim, Difat Jakubovicz, Cynthia Whitehead, Karen-Lee Miller, Natalie Kennie and Scott Reeves*

- 163 **Book review**

# PRIMARY HEALTH CARE RESEARCH & DEVELOPMENT

As primary health care continues to grow in importance in relation to the rest of health care provision, this journal provides a source of information on the growing body of knowledge concerning research and development issues in primary health care. This is the first journal aimed specifically at both researchers and practitioners in primary health care, thereby bridging the gap between the two areas. It provides a forum for the publication of international, interdisciplinary research and development in primary health care (PHC).

## Aims and Scope

- to disseminate evidence, information and practice examples of PHC research and developmental activities
- to analyse and debate the meaning of evidence and ways in which practice in PHC may be developed to reflect best practice, including clinical audit, quality issues and cost-effectiveness
- to draw on and promote the use of the full range of research methods in PHC research
- to provide a forum for communication between practitioners, researchers, educators and policy-makers concerned with achieving PHC-led services worldwide
- to involve user-groups as well as PHC professionals, thus reflecting accepted views on involvement of consumers in research and policy development
- to reflect and explore the political context of health care development
- to include work concerned with all aspects of PHC including prevention, health promotion, public health, education, clinical effectiveness, organizational and management issues, quality issues and policy development

## Networking

This section covers the work of research networks and other initiatives to promote collaboration or build capacity in primary care research. Articles can raise issues, inform or challenge, comment on current events, or seek collaborative partners. Articles of up to 1000 words will be subject to editorial review and published as quickly as space allows. Longer contributions will be subject to peer review, as are other papers submitted to the journal.

## Research

Research papers (normally up to 5000 words) will be considered as those which do one or more of the following:

- Report on primary data, either quantitative or qualitative
- Offer a critical analysis of research method(s)
- Provide a critical and systematic overview of previous studies
- Provide new theoretical/conceptual insights into phenomena
- Critically inform the evidence base for practice

## Development

Development papers (normally up to 5000 words) will be considered as those which do any one or more of the following:

- Report on a change in practice
- Demonstrate how evidence supports change
- Report on audit data or pilot study data
- Report on evaluation process
- Analyse policy which underpins change in practice

Advancing research. Increasing access.

Informed by detailed consultation with the library and research communities, we are constantly developing our industry-leading online journals platform.

Some recent advances include:

- **Refreshed site design**, facilitating rapid access to the most relevant content.
- **New advanced search interface** and a more detailed, fielded quick search function.
- **Enriched content** in the form of multimedia companions and editorial blogs.
- **Launch of Cambridge Open Option**, our open access initiative.

Visit [journals.cambridge.org/openoption](http://journals.cambridge.org/openoption) for more information.

# Advertising Opportunities
