SEPTEMBER 1972

THE
aeronautical
JOURNAL

THE ROYAL AERONAUTICAL SOCIETY

In ten years aerospace technology has halved Man's world in size...

The Anglo-French Concorde which will initiate supersonic airline services between Europe and the USA, the Orient and Australia

...today it is ready to conquer Man's last frontier

The Orbiter of the Space Shuttle will be able to land just as conventionally as Concorde. Its regular flights into orbit will enable it to service and repair satellites and so save huge sums of money

Many scientists and ecologists believe that the better management of the resources of our planet and the eventual control of pollution and other such ills depend upon the ready access to Space afforded by the Space Shuttle.

The NASA Shuttle has been described as "the DC3 of the Space Age", and British Aircraft Corporation is proud of the part it has already played in it as a member of the famous North American Rockwell team, which has now been awarded the Orbiter contract.

Cover picture:
Commonly known as the gold-plated area among airline pilots, the panel shown illustrates the latest fit of flight deck layout for the BOAC Concorde. Burrows and Miles in their paper in this issue draw attention to techniques of establishing standard patterns of cockpit indicators as a means of making rapid identification and isolation of component failures.

NOW AVAILABLE—
an Easy Binder for your copies of
THE AERONAUTICAL JOURNAL

Many members have told us they would welcome a quick and easy way to bind and protect the twelve issues of THE AERONAUTICAL JOURNAL they receive each year.

We are introducing a new binder for this purpose, strongly constructed of stiff board, covered externally with blue plastic and with a black satin PVC lining. The curved spine is attractively gold blocked with THE AERONAUTICAL JOURNAL as title and the crest of the Society, and self-adhesive numerals are being supplied in sets of three to cover 1972, 1973 and 1974. Copies of the Journal are secured in the binder on the plastic tape fittings provided. This is a splendid new way to keep all your Journals in perfect condition.

Write now to the Accounts Department, The Royal Aeronautical Society, 4 Hamilton Place, London W1V 0BQ, enclosing a cheque or postal order for £1.25 to secure your first binder.

Permanent binding of THE AERONAUTICAL JOURNAL is still available on quotation from the Lewes Press Ltd., Friars Walk, Lewes, Sussex.
