

been made. Perhaps not before too long we shall begin to understand the molecular basis not only of neuropsychiatric disorders but also of normal behaviour. A truly exciting and challenging goal.

ALAN EMERY
Medical School,
University of Edinburgh

Molecular Evolutionary Genetics. By MASATOSHI NEI.
New York: Columbia University Press. 1989. Paper
\$34.00. ISBN 0 231 06321 0.

This is a softcover reprint of the original 1987 edition, whose cheaper price may well tempt the reader or

librarian. The hardcover edition was reviewed in *Genetical Research* **52**, 74–75 (1988).

Antibodies: A Laboratory Manual. By ED HARLOW and DAVID LANE. Cold Spring Harbor: Cold Spring Harbour Laboratory. New York 1988. 726 pages. Paper \$50.00 ISBN 0 87969 314 2.

This book was reviewed in *Genetical Research* 1989, **54**, p. 161. We wish to point out that the book was written by Ed Harlow and David Lane and not simply edited by these authors, as stated in the above review.
