

# The American Journal of Psychiatry

Contents April 2016,  
Volume 173

## Editorials

- 311 **RAISE-ing our expectations for first-episode psychosis**  
Thomas R. Insel
- 313 **Biotypes in psychosis: has the RDoC era arrived?**  
Daniel C. Javitt
- 315 **A medication for depression with mixed features**  
William Coryell
- 317 **Appetite changes in depression**  
Leslie C. Baxter

## Introspection

- 319 **Hope, faith, love, and treating serious mental health conditions**  
Kristin S. Cadenhead, Helene Mirzakhanian

## Perspectives in global mental health

- 330 **Trauma and depression in Ethiopian women returning from Middle Eastern countries**  
Berhanie Getnet *et al*

## Images in neuroscience

- 332 **Personalized human cortical spheroids**  
Sergiu P. Pasca

## Reviews and overviews

- 334 **Transformation of mental health care for US soldiers and families during the Iraq and Afghanistan wars: where science and politics intersect**  
Charles W. Hoge *et al*
- 344 **Neural circuitry of impaired emotion regulation in substance use disorders**  
Claire E. Wilcox *et al*

## New research – articles

- 362 **Comprehensive versus usual community care for first-episode psychosis: 2-year outcomes from the NIMH RAISE early treatment program**  
John M. Kane *et al*
- 373 **Identification of distinct psychosis biotypes using brain-based biomarkers**  
Brett A. Clementz *et al*
- 385 **Gating deficit heritability and correlation with increased clinical severity in schizophrenia patients with positive family history**  
Tiffany A. Greenwood *et al*
- 392 **Resting hyperperfusion of the hippocampus, midbrain, and basal ganglia in people at high risk for psychosis**  
Paul Allen *et al*
- 400 **Lurasidone for the treatment of major depressive disorder with mixed features: a randomized, double-blind, placebo-controlled study**  
Trisha Suppes *et al*
- 408 **Bitemporal versus high-dose unilateral twice-weekly electroconvulsive therapy for depression (EFFECT-Dep): a pragmatic, randomized, non-inferiority trial**  
Maria Semkowska *et al*
- 418 **Depression-related increases and decreases in appetite: dissociable patterns of aberrant activity in reward and interoceptive neurocircuitry**  
W. Kyle Simmons *et al*
