

COXEM CO., LTD

COXEM is a market-leading manufacturer of Scanning Electron Microscopes. We offer both bench-top SEM and console or full-size type SEM with various optional features. COXEM is dedicated to serving all customers in a wide range of scientific fields with its high-quality products and optimized solutions.

- **EM-30AX Plus**—The all-in-one system with the world's highest resolution for desktop SEMs combined with a motorized XYT stage. SE and BSE detectors with fully integrated EDS (X-ray Spectroscopy) system.
- **EM-30Plus**—Perfect desktop SEM with high quality imaging for all kinds of applications having superior easy to use software combined with a motorized XYT stage.
- **CX-200Plus**—*NEW* compact size floor model SEM that includes both SE and BSE detectors and a fully motorized 5-axis XYZRT stage as standard. A wide variety of EDS detector options are available including automated feature and particle analysis.
- **STEM**—Scanning Transmission Electron Microscopy detector module that can be used with both our EM-30 series Tabletop SEMs and the CX-200plus SEM.
- **CP-8000(Cross Section Polisher)**—A device to prepare cross sections of various materials.
- **SPT-20**—Very popular Ion Sputter Coater with a variety of targets such as Au, Pt, Pd and etc.

The COXEM brand is fast growing all over the world with hundreds of global universities, labs, government research centers and industrial companies already using COXEM scanning electron microscopes.

COXEM is based in South Korea with distributors located world-wide. To contact our North American representative, please call Element Pi at 833-314-1593 or e-mail at info@elementpi.com
