## INDIVIDUALS

An Essay in  
Descriptive Metaphysics

This book aims to make clear some of the most general structural features of our ordinary thinking about the world. Much traditional metaphysics is less concerned with describing the actual structure of our thought about the world than to provide a different structure. In opposition to this "revisionary" strand in metaphysics the author aligns himself with that most powerfully represented by Kant.

J. BOBIK: A Note on a Problem about Individuality.

P. M. FARRELL: Freedom and Evil.

### CRITICAL NOTICE

R. E. DOWLING: Warrender's *The Political Philosophy of Hobbes*.

REVIEWS, BOOKS RECEIVED, NOTES AND NEWS

# Ludwig Wittgenstein

NORMAN MALCOLM

*With a Biographical Sketch by*

GEORG HENRIK VON WRIGHT

'... sympathetic, vivid, sometimes harsh (as Wittgenstein was himself), economical yet with an extraordinary sense of actuality. Indeed, the two essays in this short book are not merely the first authentic and extended account of Wittgenstein's life to reach the general public; together they form a literary classic... this extraordinary man is made to live and speak again on the written page.' DAILY TELEGRAPH 12s. 6d. net

## Kant's Critique of Pure Reason

T. D. WELDON

The second edition expands and largely rewrites Parts II and III of the first edition, which deal with the *Critique* itself and not with its historical antecedents; this is primarily to show the connexion between Kant's pioneer work towards a philosophy of science in the modern sense and the contributions of some contemporary writers. 35s. net

## The Collected Papers of Charles Sanders Peirce

*Volume VII: SCIENCE AND PHILOSOPHY*

*Volume VIII: REVIEWS, CORRESPONDENCE, AND BIBLIOGRAPHY*

EDITED BY ARTHUR W. BURKS

The divisions of Volume VII reflect the development of Peirce, as the principal focus of his attention shifted from experimental science to the methods of science and finally to speculative metaphysics.

*Numerous text-figures each volume 63s. net*

## Patterns of Discovery

R. H. HANSON

An examination of the processes involved in theory-finding in science, illustrated by examples from the history of physics. Professor Hanson considers the nature of observation, the status of facts, the logic of causality, the character of physical theory, and the place of laws in physics. 30s. net
