# Journal of Fluid Mechanics

## Editor

M. G. Worster, University of Cambridge, UK

*Journal of Fluid Mechanics* is the leading international journal in the field and is essential reading for all those concerned with developments in fluid mechanics. It publishes authoritative articles covering theoretical, computational and experimental investigations of all aspects of the mechanics of fluids. Each issue contains papers on both the fundamental aspects of fluid mechanics, and their applications to other fields such as aeronautics, astrophysics, physiology, chemical and mechanical engineering, hydraulics, meteorology, oceanography, geology, acoustics and combustion.

# Mathematical Structures in Computer Science

## Editor-in-Chief

G. Longo, *CNRS and Ecole Normale Supérieure, Paris, France*

*Mathematical Structures in Computer Science* is a journal of theoretical computer science which focuses on the application of ideas from the structural side of mathematics and mathematical logic to computer science. The journal aims to bridge the gap between theoretical contributions and software design, publishing original papers of a high standard and broad surveys with original perspectives in all areas of computing, provided that ideas or results from logic, algebra, geometry, category theory or other areas of logic and mathematics form a basis for the work.

# Probability in the Engineering and Informational Sciences

**Editor**

Sheldon M. Ross, *University of Southern California, USA*

The primary focus of the journal is on stochastic modelling in the physical and engineering sciences, with particular emphasis on queueing theory, reliability theory, inventory theory, simulation, mathematical finance and probabilistic networks and graphs. Papers on analytic properties and related disciplines are also considered, as well as more general papers on applied and computational probability, if appropriate. Readers include academics working in statistics, operations research, computer science, engineering, management science and physical sciences as well as industrial practitioners engaged in telecommunications, computer science, financial engineering, operations research and management science.

# Proceedings of the Edinburgh Mathematical Society

Published for  
The Edinburgh Mathematical Society

## Editorial Management

The Secretary, *ICMS*, Edinburgh, UK

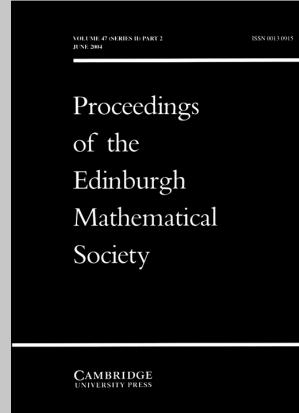

The Edinburgh Mathematical Society was founded in 1883 and over the years, has evolved into the principal society for the promotion of mathematics research in Scotland. The Society has published its *Proceedings* since 1884. This journal contains research papers on topics in a broad range of pure and applied mathematics, together with a number of topical book reviews.

# Combinatorics, Probability and Computing

## Editor-in-Chief

Béla Bollobás, *DPMMMS, Cambridge, UK; University of Memphis, USA*

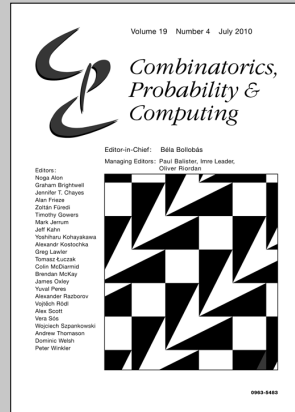

Published bimonthly, *Combinatorics, Probability & Computing* is devoted to the three areas of combinatorics, probability theory and theoretical computer science. Topics covered include classical and algebraic graph theory, extremal set theory, matroid theory, probabilistic methods and random combinatorial structures; combinatorial probability and limit theorems for random combinatorial structures; the theory of algorithms (including complexity theory), randomised algorithms, probabilistic analysis of algorithms, computational learning theory and optimisation.

# The ANZIAM Journal

Published for  
The Australian Mathematical Society

## Editors-in-Chief

A. Bassom, *The University of Western Australia, Australia*

G. C. Hocking, *Murdoch University, Australia*

*The ANZIAM Journal* considers papers in any field of applied mathematics and related mathematical sciences with the aim of rapid publication in print and electronic formats. Novel applications of mathematics in real situations are especially welcomed. All papers should include some indication of applicability, and an introduction that can be understood by non-specialist readers from the whole applied mathematical community.

**SUBSCRIPTIONS**

*European Journal of Applied Mathematics* (ISSN 0956-7925) is published bimonthly in February, April, June, August, October and December. The 2012 subscription price (excluding VAT) of a volume, which includes print and electronic access, is £485 (US \$885 in USA, Canada and Mexico); The electronic-only price available to institutional subscribers is £445 (US \$790 in USA, Canada and Mexico). Single parts are £90 net (US \$170 in USA, Canada and Mexico) plus postage. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered members should provide their VAT registration number. Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

POSTMASTER: send address changes in USA, Canada and Mexico to *European Journal of Applied Mathematics*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Claims for missing issues should be made immediately on receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.
