
THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

Membership

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to *The Journal* (ISSN 0373-4633) for Volume 74, 2021, which includes print and electronic access, is £737 (USA, Canada and Mexico US \$1329) and includes delivery by air; single parts are available at £134 (USA, Canada and Mexico US \$240) plus postage. The electronic-only price available to institutional subscribers is £570 (USA, Canada and Mexico US \$1041). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. The *Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8BS, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

THE JOURNAL OF NAVIGATION

VOLUME 74 • NUMBER 2 • MARCH 2021

CONTENTS

- Inclusivity and Diversity of Navigation Services** 269
Anahid Basiri
- An empirical analysis on the operational profile of liquefied natural gas carriers with steam propulsion plants** 273
Carlos González Gutiérrez, Santiago Suárez de la Fuente, Jean-Marc Bonello and Richard Bucknall
- Investigating the correlation between students' perception of authenticity in assessment and their academic achievement in the associated assessment tasks** 293
Samrat Ghosh, Benjamin Brooks, Dev Ranmuthugala and Marcus Bowles
- Application of colour combinations on visual search tasks under vibration environments** 311
Hailiang Wang, Da Tao, Shuang Liu, Tuoyang Zhou and Xingda Qu
- Francesco De Pinedo and Ernesto Campanelli's record-breaking flight to Australia – perception, recognition and legacy: an account in the Australian Press** 328
Alberto Cauli
- A new visual/inertial integrated navigation algorithm based on sliding-window factor graph optimisation** 343
Haiying Liu, Jingqi Wang, Jianxin Feng and Xinyao Wang
- A cross-cultural investigation of design and visual preference of signage information from Hong Kong and Pakistan** 360
Hassan Iftikhar, Salman Asghar and Yan Luximon
- Predictors of professional commitment for Chinese new generation cohorts in a sample of seafaring officers** 379
Xiaohui Jia
- Key factors affecting the quality of maritime education and training: empirical evidence from China** 396
Junzhong Bao, Yan Li, Zunlei Duan, Tingting Li and Pengfei Zhang
- New fault detection and fault-tolerant scheme for Doppler velocity logger outage in ocean navigation systems** 409
Mojtaba Hashemi and Ehsan Shami
- A cost-effective beam forming structure for global navigation satellite system multipath mitigation and its assessment** 425
Qiongqiong Jia, Li-Ta Hsu, Bing Xu and Renbiao Wu
- Availability analysis of GNSS signals above GNSSs constellation** 446
Jie Yang, Xinlong Wang, Liangliang Shen and Ding Chen
- Improved exponential weighted moving average based measurement noise estimation for strapdown inertial navigation system/doppler velocity log integrated system** 467
Lanhua Hou, Xiaosu Xu, Yiqing Yao, Di Wang and Jinwu Tong
- Ranging technology using signals of opportunity of non-cooperative communication satellites** 488
Yuanyuan Gao, Yu Hua, Yu Xiang, Changjiang Huang, Shanhe Wang and Xian Zhao
