

# BIOPHYSICAL JOURNAL

Published for the Biophysical Society by  
The Rockefeller University Press

Edited by the Biophysical Society in cooperation with the  
Division of Biological Physics of The American Physical Society

## ARTICLES APPEARING IN VOLUME 16

**Computer Simulation of Flagellar Movement. IV. Properties of an  
Oscillatory Two-State Cross-Bridge Model** C. J. Brokaw

**Prediction of the Conformation of the Histones** Gerald D. Fasman,  
Peter Y. Chou and Alice J. Adler

**Mobility Measurements by Analysis of Fluorescence Photobleaching  
Recovery Kinetics** D. Axelrod, D. E. Koppel, J. Schlessinger,  
E. Elson and W. W. Webb

**The Electrical Resistivity of Aqueous Cytoplasm** Kenneth R. Foster,  
Jeannette M. Bidinger and David O. Carpenter

**Effects of Removing Extracellular  $\text{Ca}^{2+}$  on Excitation and Adaptation  
in *Limulus* Ventral Photoreceptors** J. E. Lisman

The *Biophysical Journal* publishes original articles and occasional reviews on pure and applied biophysics. The price for an annual subscription of twelve monthly issues is \$66 to Europe air only, \$60 elsewhere surface only. Remittances by draft or check on New York, or by international money order, should be made payable to *Biophysical Journal*, The Rockefeller University Press, P.O. Box 5108, Church Street Station, New York 10249.

## INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published.

2. Reviews should preferably be written in English. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. For example

BERNAL, J. D. (1967). *Origin of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* **1**, 3-33.

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. Additional copies may be purchased.

---

# QUARTERLY REVIEWS OF BIOPHYSICS

---

Reviews on the following topics will appear in forthcoming issues:

Determination of the mass of viruses by quantitative electron microscopy.

G. F. BAHR, W. F. ENGLER and H. M. MAZZONE

Kinetics of channel gating in excitable membranes.

L. GOLDMAN

Conformational theory applied to polysaccharide structure.

D. A. BRANT
