

Index of Subjects

- Abattoirs, salmonellae in, 283
- Antibacterial activity of polyvinyl-pyrrolidone-iodine, 509
- Antibodies in complement preparations causing 'false positive' complement fixation with psittacosis-trachoma antigens, 179
- Antibody responses to certain respiratory viruses, the specificity of in human volunteers, 115
- Antigenic differences between strains of the virus of foot-and-mouth disease, a complement fixation technique for the quantitative measurement of, 401
- Antigenic variation in a strain of *Trypanosoma brucei* growing in mice, 69
- Alastrim and rabbit pox, hybrids derived from the viruses of, 141
- Aseptic meningitis associated with Coxsackie B5 and A9 viruses in Northern Japan, 159
- Butchers' shops, salmonellae in, 283
- Candida albicans*, the incidence of the serological groups of in southern England, 395
- Capsulated organisms, the site of specific substances in, 121
- Carriers of intestinal pathogens treated with replacement coliform flora, 39
- Ceiling temperature and reactivation in the isolation of pox virus hybrids, 133
- Cell-free varicella-zoster virus in tissue culture, 413
- Cellular immunity, the specificity of, 353
- Cholecystectomy, the results of in the campaign against typhoid and paratyphoid B in western Norway, 443
- Cholera vaccination, intradermal, 11
- Colds, experiments on the spread of, 365
- Colicine production as an epidemiological marker of *Shigella sonnei*, 1
- Coliform organisms in water, an improved formate lactose glutamate medium for their detection, 495
- Cowpox and variola major viruses, hybrids derived from, 147
- Complement fixation technique for the quantitative measurement of antigenic differences between strains of the virus of foot-and-mouth disease, 401
- Coxsackie B5 and A9 viruses associated with an outbreak of aseptic meningitis in Northern Japan, 159
- Diarrhoea, infantile, the isolation of an unclassified virus from an outbreak, 425
- Disinfection of a woollen blanket, 29
- Egg-yolk reaction of *Staphylococcus aureus* isolated from burns, 229
- Enrichment medium for salmonellae, 25
- Epidemiology of leptospirosis in North Queensland. I. General survey of animal hosts, 451
- Epidemiology of leptospirosis in North Queensland. II. Further observations on the hosts in the Mossman district, 485
- Epidemiology of louping ill in Ayrshire: the first year of studies in sheep, 53
- Food, survival of shigellae in, 303
- Food poisoning, an outbreak due to *Salmonella typhi-murium*, 313
- Foot-and-mouth disease virus. Factors affecting its growth on surviving explants of bovine tongue epithelium, 101
- Foot-and-mouth disease virus. A complement fixation technique for the quantitative measurement of antigenic differences between strains, 401
- Formate lactose glutamate medium, improved, for the detection of *Escherichia coli* and other coliform organisms in water, 495
- Hippopotamus, serological evidence for its susceptibility to natural infection with rinderpest virus, 329
- Hybrids derived from the viruses of alastrim and rabbit pox, 141

- Hybrids derived from the viruses of variola major and cowpox, 147
 Hybrids, pox virus, isolated by the use of ceiling temperature and reactivation, 133
- Immunization of guinea-pig against tetanus, simultaneous active and passive, 379
 Immunofluorescence technique for detecting salmonellae in raw meat, 319
 Inclusion conjunctivitis and trachoma agents, group- and species-specific antigens of, 185
 Influenza haemagglutination-inhibition antibodies in Sydney, 127
 Interferon production and sensitivity of Semliki Forest virus variants, 337
 Intradermal cholera vaccination, 11
- Leptospirosis, its epidemiology in North Queensland. I, 451; II, 485
 Louping ill in Ayrshire, 53
- Measles antibodies, a survey of in different populations, 45
 Meat, home produced, salmonellae in, 283
 Meat, detection of salmonellae in, by a rapid immunofluorescence technique, 319
 Meningitis, aseptic, associated with Coxsackie B5 and A9 viruses, 159
 Mice, the toxicity of 0.025 % warfarin to, 389
Mycoplasma strains from various sources, serological differentiation of, 199
Mycoplasma, the relationship of a type isolated from tissue cultures to a new human oral
Mycoplasma, 351
 Myxomatosis, an outbreak of, caused by a moderately attenuated strain of myxoma virus,
 433
- Nasal secretion, laboratory studies on the dispersal of, 365
 Neomycin-resistant *Staphylococcus aureus* in a burns unit, 221
- Oral poliovirus vaccine fed to a closed community excreting faecal viruses, 171
- Paratyphoid B and typhoid in western Norway, 443
 Pathogenesis of rinderpest in experimental cattle. I, 81; II, 257
 Poliovirus vaccine, the feeding of to a closed community excreting faecal viruses, 171
 Polyvinyl-pyrrolidone-iodine: an assessment of antibacterial activity, 509
 Pox virus hybrids, the use of ceiling temperature and reactivation in the isolation of, 133
 Psittacosis-trachoma antigens, 'false positive' complement fixation with, due to antibodies in
 complement preparations, 179
- Rabbit pox and alastrim viruses, hybrids derived from, 141
 Replacement coliform flora in carriers of intestinal pathogens, 39
 Respiratory viruses, the specificity of the antibody responses of human volunteers to, 115
 Rift Valley fever antigens, physical and serological investigation of, 239
 Rinderpest, studies on the pathogenesis of in experimental cattle. I, 81; II, 257
 Rinderpest virus; a natural infection of the hippopotamus, 329
- Salmonellae, a new enrichment medium for, 25
 Salmonellae in abattoirs, butchers' shops and home-produced meat, and their relation to
 human infection, 283
 Salmonellae in raw meat, a rapid immunofluorescence technique for detecting, 319
Salmonella typhi-murium food poisoning, an outbreak of, 313
 Self-disinfecting surfaces, tests on, 519
 Semliki Forest virus variants, interferon production and sensitivity of, 337
Shigella sonnei, colicine production as an epidemiological marker of, 1
 Shigellae, survival of in food, 303
 Specific substances, the site of in capsulated organisms. 121
 Specificity of cellular immunity, 353
 Spread of colds, experiments on, 365
Staphylococcus aureus in a burns unit, neomycin-resistant strains of, 221
Staphylococcus aureus isolated from burns, the egg-yolk reaction of, 229

- Tetanus, simultaneous active and passive immunization of guinea-pigs against, 379
- Tissue culture, cell-free varicella-zoster virus in, 413
- Tissue cultures, the relationship of a type of *Mycoplasma* isolated from, to a new human oral *Mycoplasma*, 351
- Trachoma and inclusion conjunctivitis agents, serological studies on group- and species-specific antigens of, 185
- Trypanosoma brucei*, observations on antigenic variation in a strain growing in mice, 69
- Typhoid and paratyphoid B in western Norway, 443
- Variola major and cowpox, hybrids derived from the viruses of, 147
- Viruses: Alastrim, 141; Cowpox, 147; Cocksackie, 159; Influenza, 127; Faecal, 171; Foot-and-mouth disease, 101, 401; Myxoma, 433; Polio, 171; Rabbit pox, 141; Respiratory, 115; Rift Valley fever, 239; Rinderpest, 81, 257, 329; Semliki Forest, 337; Unclassified, 425; Varicella-zoster, 413; Variola major, 147
- Warfarin, its toxicity to wild house-mice, 389
- Water, detection of *Escherichia coli* and other coliform organisms in, by an improved formate lactose glutamate medium, 495
- Woollen blanket, disinfection of, 29
