

INDEX OF SUBJECTS

- Amino-acids, lysis of *Bacterium coli* by, 511
 Analysis, generation method of, applied to mortality from respiratory tuberculosis, 361
 Antitoxin, combination of, with toxin and toxoid, 379
 Assay, dilution, of viruses, 189, 444
 Australia, south-eastern, epidemiology of myxomatosis in, 1951–1953, 337
 Australian X disease and Murray Valley encephalitis, 447
- Bacterium coli*, lysis of, by amino acids, 511
 Beach pollution at a seaside resort, 71
 Birmingham, ringworm survey in, 264
 Blue-tongue virus, Cyprus strain, in mice and complement fixation, 155
 Breeding, intensive system for guinea-pigs, 151
 Brucella species, examination of 800 strains, 105
 Brucella, susceptibility of desert rodents to, 516
 Brucellosis, milk ring test in southern Scotland, 24
 Burns, epidemiology of *Pseudomonas pyocyanea* infection, 403
- Calves, passive and active immunity to *Trichomonas foetus*, 253
 Carriers, antibiotic sensitivity of *Staphylococcus pyogenes* from, 486
 Carriers, enteric, number of bacilli harboured by, 67
 Carriers, nasal, of *Staphylococcus pyogenes*, 304
 Carriers of *Streptococcus pyogenes* among healthy children, 165
 Chicks, feeding behaviour of, in vitamin E deficiency, 315
 Complement fixation with blue-tongue virus, 155
 Conglutination phenomenon, 534
 Conglutinin and immuno-conglutinin in guinea-pigs, pigs, donkeys, rats and mice, 534
 Cream, synthetic, the control of infection from, 230
- Death rates, age-specific, in England and Wales, 417
 Desert rodents, susceptibility of, to *Shigella* and *Brucella*, 516
 Dettol, viricidal action of, 529
 Diamidine in selective medium for *Haemophilus pertussis*, 273
 Dose-mortality relationship for *Salmonella dublin*, 18
- Encephalitis, Murray Valley, and Australian X disease, 447
 England and Wales, age-specific death rates in, 417
 Enteric carriers, number of bacilli harboured by, 67
 Epidemic influenza, in New York State, 1953, 211
 Epidemic, intra-household, maximum likelihood estimation of relative removal rate, 400
 Epidemiology of myxomatosis in south-eastern Australia, 1951–1953, 337
 Estuary, polluted, sulphides in, 194
 Ethylene gas, viricidal action of, 525
- Fifty per cent end-point interpolation, nomogram for, 397
 Fish, dehydrated, bacteriology of, 247
 Food poisoning due to *Salmonella typhi-murium*, 311
 Foot and mouth disease, virus titration of, in culture, 87
 Freezing, maintenance of stock strains of trichomonads by, 545
- Guinea-pigs, intensive system for breeding, 151
- Haemophilus pertussis*, selective medium for, 273
Haemophilus pertussis, type specificity of, 475
 Haptenes of TVi and Ballerup Vi, reactions of, with antisera against Vi-coated erythrocytes,

- Immunity, passive, in myxomatosis, 321
 Immuno-conglutinin and conglutinin in guinea-pigs, pigs, donkeys, rats and mice, 534
 Infection, duration of, in *Salmonella typhi-murium* food poisoning, 311
 Infection from synthetic cream, control of, 230
 Influenza epidemic in New York State, 1953, 211
 Influenza, immunity in mice, 469
 Influenza virus, distribution of radio-active phosphorus in antigenic fractions, 119
 Influenza virus, release of, from the infected cell, 180
 Influenza virus, soluble antigen of, 225
- Laboratory animals, size of breeding group and production in mice, 60
 Leptospiral infections diagnosed in Serbia, 129
- Mice, blue-tongue virus in, 155
 Mice, immunity to salmonella infection in, 9
 Mice, potentiation of immunity to influenza in, 469
 Mice, size of breeding group and production in, 60
 Milk ring test for brucellosis in southern Scotland, 24
 Mosquitoes, viruses from in the Murray Valley area, 551
 Murray Valley area, viruses from mosquitoes in, 551
 Murray Valley encephalitis and Australian X disease, 447
 Myxomatosis, epidemiology of, in south-eastern Australia, 1951–1953, 337
 Myxomatosis, infectious, in south-eastern Australia, 1950, 47
 Myxomatosis, passive immunity in, 321
- Neisseria gonorrhoeae*, investigation of, by a red cell sensitization technique, 425
 New York State, influenza epidemic of 1953, 211
- Penicillin in selective medium for *Haemophilus pertussis*, 273
 Phosphorus, radio-active, distribution of, in fractions of influenza virus, 119
 Physique of Oxford undergraduates, 369
 Poisoning, food, due to *Salmonella typhi-murium*, 311
 Propylene glycol, viricidal action of, 529
Proteus group, Providence strains related to, 1
 Providence strains, related to the *Proteus* group, 1
Pseudomonas pyocyanea, epidemiology in burns, 403
- Rats, feeding behaviour of, in vitamin E deficiency, 315
 Removal rate, relative, maximum likelihood estimation of, in an intra-household epidemic, 400
 Rickettsial infections diagnosed in Serbia, 129
 Ringworm, survey in Birmingham, 264
 Rodents, desert, susceptibility of, to *Shigella* and *Brucella*, 516
- Salmonella dublin*, dose-mortality relationship, 18
 Salmonella infection, immunity to in mice, 9
Salmonella typhi-murium, food poisoning due to and duration of infection, 311
 Scotland, southern, milk ring test for brucellosis in, 24
 Seaside resort, beach pollution at, 71
 Serbia, infections diagnosed in, 129
Shigella, susceptibility of desert rats to, 516
 Sodium fluoride in selective medium for *Haemophilus pertussis*, 273
 Sodium hydroxide, viricidal action of, 529
 Soluble antigen of influenza virus, 225
 Staphylococcal toxins, action of, on isolated rabbit intestine, 492, 502
Staphylococcus pyogenes, antibiotic sensitivity of strains from carriers, 486
Staphylococcus pyogenes, nasal carriers of, 304
Streptococcus pyogenes, carriers among healthy children, 165
 Sulphides in a polluted estuary, 194

- Teepol, viricidal action of, 529
Toxin, staphylococcal, action of on isolated rabbit intestine, 492, 502
Toxoplasma, human infection with, 37
Trichomonads, maintenance of stock strains of by freezing, 545
Trichomonas foetus, passive and active immunity in calves, 253
Tuberculosis, respiratory, analysis of mortality by generation method, 361
- Undergraduates, physique of in Oxford, 369
- Vi haptenes of *Salm. typhosum* and *Ballerup*, reactions of with antisera against Vi-coated erythrocytes, 100
Viricidal action of ethylene gas, 525
Viricidal action of Teepol, sodium hydroxide, propylene glycol and Dettol, 529
Virus infections, diagnosed in Serbia, 129
Viruses, dilution assay of, 189, 444
Viruses from mosquitoes in the Murray Valley area, 551
Vitamin E, feeding behaviour of rats and chicks deficient in, 315
