Modern Political Parties

APPROACHES TO COMPARATIVE POLITICS

Edited by SIGMUND NEUMANN

Professor of Government and Modern History, Wesleyan University

The first comparative study of party systems in major nations, *Modern Political Parties* provides the student of political science with an invaluable aggregate of authoritative information. Written by scholars who know intimately each country considered, this book offers a panoramic survey of both democratic and totalitarian party systems and of party systems in transition from totalitarianism to democracy. These compact studies of seven countries and three groups of countries stress persistent themes: the functions and structures of political parties; their classification; their sociology; and the nature of party leadership. Finally, there is an evaluation of the significance of parties in world politics.

The German Fifth Column in the Second World War

By LOUIS DE JONG

Executive Director, Netherlands State Institute for War Documentation

Shortly after Hitler came to power, a rumor spread that the Nazis had created a vast network of espionage and conspiracy. Early Nazi successes in Austria and Czechoslovakia lent credence to this fear, and the later incredibly swift conquests of Poland, Denmark, Norway, France, and the Low Countries seemed to confirm it. But Louis De Jong shows that the facts were radically different as he sets forth the whole story of fifth-column panic and examines the reality behind it. There were only two groups comparable to the fifth column that terrified whole nations, he reveals. These groups, in Poland and Yugoslavia, did their work with deadly efficiency, but their existence only serves to highlight Mr. De Jong's major thesis: the world-wide fifth column of popular belief was an exaggerated, grossly overrated ogre.
