Bone Anchored Hearing Aid

BAHA Classic 300

The updated BAHA has **three main improvements**:

The first is the development of a **continuous base tone control** which has flexibility to cover the frequency response range of the four previous models. The second improvement is the adoption of ABS plastic for the hearing aid casing which offers a more **aesthetic moulded design**, greater strength and colour stability.

THE BAHA CLASSIC 300 ALSO COMES WITH A **FIVE YEAR WARRANTY** (UK Only).

Indications for the BAHA

- **Chronic Otitis Media** - with conductive or mixed hearing loss where the use of air conduction devices is contraindicated.
- **Congenital Malformation** - of the external or middle ear where an air conduction hearing aid cannot be used or is contraindicated.
- **Otosclerosis** - in some cases.
