# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.

4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.

8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.

9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

### *United States of America*

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

## ***Chemotherapy in Acute Otitis Media***

**E**VERY case of uncomplicated acute suppurative otitis media should be treated by sulphonamide therapy in accordance with the fundamental principles of high initial dosage and regular frequent administration. In this way the incidence of mastoiditis may be reduced to a low figure. When a bacteriological diagnosis has not been made DAGENAN—M & B 693 should be used as a proportion of cases are pneumococcal, but in known haemolytic streptococcal cases sulphanilamide (May &

Baker) orally or PROSEPTASINE orally in association with parenteral SOLUSEPTASINE may be employed. In the comparatively rare Staphylococcus aureus otitis media THIAZAMIDE may be substituted.

While cases of acute mastoiditis may frequently be prevented or aborted, chemotherapy is also of value as an adjuvant to surgical intervention in established mastoiditis for the treatment or prevention of complications, especially otogenic meningitis.

★DAGENAN—M & B 693★ is supplied in containers of 25 tablets.

★DAGENAN SODIUM—M & B 693 SOLUBLE★ is supplied in boxes of 6 x 3 c.c. ampoules.

Sulphanilamide (May & Baker) is supplied in containers of 25 tablets.

★PROSEPTASINE is supplied in containers of 25 tablets.

★SOLUSEPTASINE is supplied in boxes of 6 ampoules of 10 per cent. and 20 per cent. solution.

**PRESCRIBE THE EASY EFFECTIVE METHOD**

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

**DROPPER ?**

**DeVilbiss  
ATOMIZERS**

**ATOMIZER ?**

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper
