**THE NATIONAL INSTITUTE OF
ECONOMIC AND SOCIAL RESEARCH**

This Review is intended to be of service to those, in business and elsewhere, who need to take a view of the general economic situation and prospects. The workings of the economy are not fully understood; and even if they were economic prediction would remain hazardous because of the impact of political events and technological developments. Nevertheless the Institute believes that a group of economists, presenting a comprehensive account of current economic developments and a coherent view of likely trends, can perform a useful service.

Acknowledgements

The Review was launched with the aid of a five-year grant from the Ford Foundation. In October 1966, the Social Science Research Council made a two-year grant towards the cost of research and editorial work for the Review, and this support was renewed for a further five years from October 1968. The Institute gratefully acknowledges these grants and also the contributions from British companies and banks for support of the Institute's research. Subscriptions to the Review cover the cost of printing and distribution only.

The Institute is also grateful to many people in industry for giving the authors the benefit of their knowledge and experience, and to officials in Government departments who have assisted with advice in the interpretation of official statistics.

Authorship

The general articles in this Review are the joint work of members of the research staff, under the general supervision of the editorial board. The contents will usually be unsigned, the views expressed being the responsibility of the Director and Editorial Board. Signed articles will appear, the views expressed being the responsibility of the authors.

Editorial Board

M. J. Artis (*Editor*) J. A. Bispham (*Assistant Editor*) C. A. Blyth (*Deputy Director*)
