History

Published quarterly by Duke University Press

Social Science History is the journal of the Social Science History Association and exists to publish material directed to improving the quality of historical explanation in teaching and research of relevant theories and methods from the social science disciplines. It is aimed at social scientists interested in longitudinal analysis and historians seeking a more rigorous and consciously theoretical orientation. The editors encourage and provide a forum for research that attempts generalizations of some breadth verified by systematic examination of the relevant evidence and supported by quantitative analysis when appropriate. Research efforts involving comparisons across time between individuals and groups within a single population and between different and properly comparable populations across space and over time will be particularly welcome. The editors welcome contributions to the development of theory and techniques which, although firmly centered in particular social science disciplines, can provide a genuine interdisciplinary focus in approaching the historical dimension. *Social Science History* will also inform its readers about new developments in social science data archives, research funding agencies, training programs and summer institutes, and significant new publications in history and the social science disciplines.

Manuscripts should be submitted (four copies) to Russell Menard, *Social Science History*, Department of History, University of Minnesota, 614 Social Sciences, 267 19th Avenue South, Minneapolis, MN 55455. Include a word count on the title page. Submissions must be typed with *all* written material *double-spaced* (including quotations, notes, and the list of references) using only one side of the paper. The typewritten lines should not exceed 5½ inches in length. Brief parenthetical citations are included in the text, all complete references are listed alphabetically at the end of the article, and notes are used only for discursive comments and appear immediately before the list of references. Contributors may request a “Style Guide for Authors” from the editor or refer to *Social Science History* 18:1, pages 152–60, for detailed information on this journal’s style. The Social Science History Association does not accept responsibility for statements of fact or opinion made by the contributors.
