Life of extremes

Polar Biology is not only the focal point for scientists working in polar regions but also attracts the interest of those working in general biology, ecology, and physiology as well as in oceanography and climatology related to polar life. The journal presents results of all kinds of studies in plants, animals and micro-organisms of marine, limnic and terrestrial habitats of Arctic and Antarctic regions.

Topics covered include:

- Life history
- Ecology of organisms and communities
- Morphology and taxonomy
- Distribution, abundance and biogeography
- Dynamics of populations
- Physiology of growth, metabolism and reproduction
- Behaviour and sensory physiology
- Ecosystem studies.
