The only percutaneous device dressing proven to reduce the incidence of **CRBSI and local infections**¹

BIOPATCH Dressing is specifically designed to inhibit bacterial growth around all percutaneous devices, including catheters and orthopedic pins.

Powerful protection... Powerful proof.

- BIOPATCH Dressing provides protection against a broad spectrum of bacteria including resistant strains MRSA and VRE, as well as *Candida albicans*.

- In a controlled, randomized trial, use of BIOPATCH Dressing resulted in a reduction in the incidence of CRBSI and local infections as compared with standard care.¹

Resistance

*The Human Struggle
against Infection*

Norbert Gualde

Translated by Steven Rendall

"Resistance provides a detailed and accurate analysis of the critical factors that determine the outcome of this continuous battle, with an emphasis on the evolutionary protection provided by our immune system."

—Baruj Benacerraf, MD,
Nobel Laureate in Physiology or
Medicine, 1980

"Resistance sparkles with wit and intelligence, and is a treasure trove of historical facts. . . . It also serves as starting point for serious contemplation of present and future perils."—James S. Goodwin, MD,
Director, Sealy Center on Aging

Clinical Infectious Diseases

Official publication of the Infectious Diseases Society of America

Clinical Infectious Diseases (CID) publishes topical research and incisive commentaries from distinguished clinicians and scientists on the diagnosis and treatment of infectious diseases. Each issue contains clinically relevant articles of current interest in:

- Clinical research
- Immune mechanisms
- Medical microbiology
- Epidemiology and prevention
- Pathogenesis
- HIV/AIDS
- New antimicrobial therapies
