

## Index of Subjects

- Adipose tissue, apparent and total fat cell numbers, response to early undernutrition and rehabilitation, rat 15
- Adipose tissue, cell replication, response to early undernutrition and rehabilitation, rat 33
- Adipose tissue, fat cell number, response to early undernutrition and rehabilitation, strain differences, rat 27
- Age, effect on carbohydrases in small intestine mucosa, pig 125
- Alkaline phosphatase, isoenzyme activity, effect of zinc deficiency, rat 561
- Amino acids *see also* carnitine, Methionine, sulphur amino acids, Tryptophan
- Amino acids, small intestine, relation to rumen microbial protein synthesis, effect of nitrogen supplementation of barley diets, sheep 421
- Anaemia, iron deficiency, effectiveness of Fe-fortified common salt, Indian schoolchildren 45
- Ascorbic acid, dietary level, effect on muscle carnitine, guinea-pig 385
- Ascorbic acid status, sensitivity of carnitine as index, guinea-pig 385
- Bile acid metabolism, effect of dietary fibre, rat 101
- Biotin, status and requirements, assessment from blood pyruvate carboxylase activity, relation to husbandry conditions and diet processing, broiler 541
- Caeruloplasmin, diamine oxidase activity, response to duodenally-infused molybdenum, sheep 515
- Calcium, soluble content in small intestine, effect of casein as dietary protein, relation to phosphopeptide formation, rat 457
- Carbohydrases, effect of age on the level and distribution in small intestine mucosa, developing pig 141
- Carbohydrate utilization, obesity, relation to development of glucose intolerance, man 281
- Carnitine, muscle concentrations, response to dietary ascorbic acid levels, guinea-pigs 385
- Carob seed (*Ceratonia siliqua*), germ meal and its protein isolate, nutritional evaluation, rat 115
- Casein, dietary protein source, effect on soluble calcium in small intestine, relation to phosphopeptide formation, rat 457
- Cattle 125, 179, 229, 491
- Child 45, 375, 381, 393
- Cholesterol, bile secretion and gall bladder content, effect of ascorbic acid, pregnant guinea-pig 95
- Cholesterol, plasma, effect of isoenergetic replacement of sucrose by glucose, man 251
- Cholesterol 7 $\alpha$ -hydroxylase, response to varying dietary fibre content, rat 101
- Cold exposure, effect on mammary glucose metabolism, lactating goat 163
- Copper, dietary level, effect on performance and tissue mineral content, laying hen 205
- Copper, effect of withdrawal from diet on production and tissue mineral content, mature hen 551
- Copper, plasma levels, response to duodenally-administered molybdenum, relation to caeruloplasmin diamine oxidase activity, sheep 515
- Copper-molybdenum interaction, effect of dietary Cu intake on tissue Cu distribution, rat 329
- Critical temperature, relation to feeding and management, early-weaning, pig 321
- Digestibility, in vivo estimation for laying hen, use of in vitro method with intestinal fluid of pig 389
- Digestion site, silage diets, effect of maturity of grass ensiled and barley supplementation, sheep 481
- Early-weaning commercial feeding and management relation to environmental temperature, heat production and critical temperature, pig 321
- Early-weaning, energy and protein intake, effect on growth, food efficiency and nitrogen retention, pig 289
- Early-weaning, energy and protein intake, effect on nitrogen and energy utilization and carcass composition, pig 305
- Energy and protein requirements, assessment during early-weaning, pig 289
- Energy expenditure, daily patterns of Upper-Volta female farmers in dry and rainy seasons 71
- Energy expenditure, estimation using heat-flow meters, man 87
- Energy expenditure, relation to 24 h energy intake, measurement by calorimetry, man 257
- Energy metabolism, lactation, response to growth hormone and growth hormone fragments, cow 179
- Energy utilization for growth, efficiency measurements, multiple regression techniques, early-weaning, pig 305
- Environmental temperature, relation to feeding and management, early-weaning, pig 321
- Enzymes *see* Alkaline phosphatase, Caeruloplasmin, Carbohydrases, cholesterol 7 $\alpha$ -hydroxylase, Pyruvate carboxylase
- Ethanol, voluntary intake and metabolism, effect of dietary thiamin, rat 1
- Fat, dietary source, effect on hepatic lipogenesis, meal-fed rat 571
- Fatty acids *see also* Polyunsaturated fatty acids
- Fibre, dietary, effect on bile acid metabolism, rat 101
- Fibre, response to dietary level, relation between retention time and motor activity in the large intestine, pig 155

- Folate, liver retention, effects of methionine supplementation and vitamin B<sub>12</sub> deficiency, rat 235
- Food wastage, national survey of households in Britain 53
- Glucalogues, non-metabolizable sugar analogues, validity of use in assessing changes in intestinal absorption mechanisms for dietary sugars, rat 435
- Glucose, isoenergetic replacement for sucrose, effect on plasma cholesterol and phospholipid-phosphorus, man 251
- $\alpha_2$ HS-glycoprotein, bone, dentine and plasma levels, changes in protein-energy malnutrition, preschool child 381
- Glucose, mammary metabolism, effect of cold exposure, lactating goat 163
- Goat, 163
- Growth hormone, effect on milk yield and composition, response to growth hormone fragments, relation to supply of energy metabolites, lactating cow 179
- Guinea-pig 95, 385
- Heat production, diurnal variations, relation to feeding and management, early-weaning, pig 321
- Heat production, estimation in the rumen from respiratory measurements 239
- Hen 205, 389, 541, 551
- Hormones *see* Growth hormone, Thyroxine
- 25-Hydroxyvitamin D, serum levels, response to dietary vitamin D and sunshine, sheep 533
- Iron, absorption from maize and sorghum beer, the effect of the brewing process, man 271
- Iron, chemical availability in foods, measurement by in vitro incubation with human gastric juice 413
- Iron, fortified common salt, effect in the control of Fe-deficiency anaemia, Indian schoolchildren 45
- Iron-deficiency anaemia, effect on prealbumin and transferrin concentrations, relation to determination of nutritional status, child 375
- Japanese quail (*Coturnix coturnix japonica*) 357
- Lactation, effect of cold exposure on glucose uptake and utilization by the mammary gland, goat 163
- Lactation, milk yield and composition, availability of energy metabolites, response to growth hormone and growth hormone fragments, cow 179
- Lipids, plasma cholesterol and phospholipid-phosphorus, effect of isoenergetic replacement of sucrose by glucose, man 251
- Lipogenesis, liver, effect of dietary maize oil and tripalmitin, meal-fed mice 571
- Maintenance requirement, estimation by multiple regression techniques, early-weaned pig 305
- Man *see also* Child, Women
- Man 45, 71, 87, 251, 257, 271, 281, 375, 381, 393
- Methionine, effects on liver folate incorporation, nutritional Vitamin B<sub>12</sub> deficiency, rat 235
- Methionine, optimum content in fortified-barley diets, effect on growth and liver enzymes, rat 217
- Methionine, unoxidized and total contents in protein concentrates, automated colorimetric method 339
- Microbial protein synthesis, rumen, response to nitrogen supplementation of barley diets, effect on duodenal amino acids, sheep 421
- Microbial protein synthesis, rumen, <sup>35</sup>S-incorporation method for estimation, ruminants 503
- Molybdenum, duodenal infusion, effect on caeruloplasmin diamine oxidase activity and plasma copper, sheep 515
- Molybdenum-copper interaction, effect of dietary Cu intake on tissue Cu distribution, rat 329
- Mouse 83, 571
- Nitrogen *see also* Non-protein-N
- Non-protein-nitrogen, urea and sugar-beet silage diet, effect on rumen and tissue metabolism, bull 229
- Nutritional status index, validity of prealbumin and transferrin concentrations, relation to iron-deficiency anaemia, child 375
- Obesity, carbohydrate utilization, relation to development of glucose intolerance, man 281
- Obesity, index, estimation of body fat content from Lee Index, normal and obese mice 83
- Over-feeding, effects on 24 h energy expenditure, measurement by calorimetry, man 257
- Phosphopeptides, formation in small intestine, effect of casein as dietary protein, relation to soluble calcium content, rat 457
- Pig 141, 155, 289, 305, 321, 389, 445, 525
- Polyunsaturated fatty acids, lymphocyte pattern, effect of dietary linoleate content, rat 367
- Prealbumin, index of nutritional status, validity in regions with endemic iron-deficiency anaemia 375
- Prealbumin, plasma levels in protein-energy malnutrition response to treatment with retinol and improved diet, child 393
- Pregnancy, relation between vitamin C status and gall-bladder cholesterol content, guinea-pig 95
- Proteins *see also*  $\alpha_2$ HS-glycoprotein, phosphopeptides, Prealbumin, Retinol-binding protein, Transferrin
- Protein-energy malnutrition, effects on  $\alpha_2$ HS-glycoprotein in bone, dentine and plasma, preschool child 381
- Protein-energy malnutrition, multi-generational marginal deficiency, effect of rehabilitation on development, rat 403
- Protein-energy malnutrition, plasma prealbumin and retinol-binding protein, response to treatment with retinol and improved diet, child 393
- Protein isolate, carob (*Ceratonia siliqua*) seed germ meal, nutritional evaluation, rat 115
- Protein synthesis, relation to nitrogen and energy balance, effects of weight, age and food intake, pig 445
- Protein synthesis, rumen microbes, <sup>35</sup>S-incorporation method for estimation, ruminants 503
- Protein synthesis, whole body and tissue rates, effect of age, cattle 491

- Pyruvate carboxylase, blood activity, criterion of biotin status and requirement, relation to husbandry conditions and diet processing, broiler 541
- Rat 1, 15, 27, 33, 101, 107, 115, 171, 189, 217, 235, 329, 349, 367, 403, 435, 457, 561
- Refecation, occurrence on a sucrose-based diet, relation to biochemical effects of riboflavin deficiency, rat 171
- Rehabilitation, relation to multi-generational marginal protein deficiency, effect on development, rat 403
- Retinol, effect on retinol-binding protein and pre-albumin in plasma, protein-energy malnourished child 393
- Retinol-binding holoprotein, plasma levels, seasonal changes, relation to sexual development, Japanese quail 363
- Retinol-binding protein, plasma levels in protein-energy malnutrition, response to treatment with retinol and improved diet, child 393
- Riboflavin, deficiency, effect of sucrose-based diet on refecation, relation to biochemical effects of deficiency, rat 171
- Rumen, bacterial protein synthesis, response to nitrogen supplementation of barley diets, effect on duodenal amino acids, sheep 421
- Rumen, microbial protein synthesis, <sup>35</sup>S-incorporation method for estimation, ruminants 503
- Sheep 421, 469, 481, 515, 533
- Silage, nutritive value, effect of maturity of ensiled grass and barley supplementation, relation to intake and utilization, sheep 481
- Silage nitrogen, nutritive value, effect of maturity of grass ensiled and barley supplementation, sheep 469
- Silages, nutritive value, effect of maturity of grass ensiled and barley supplementation on digestion of nitrogenous constituents, sheep 469
- Sucrose, dietary supplement, effect on relationship between urea degradation, plasma urea and rumen ammonia, cattle 125
- Sugars *see* Glucalogues, Glucose, Sucrose
- Sugars, dietary, intestinal absorption mechanisms, use of non-metabolizable analogues (glucalogues), rat 435
- Sugar-beet silage, effect of feeding with urea-mineral concentrate on rumen and tissue metabolism, bull 229
- Sulphur amino acids, optimum methionine:cystine content, fortified-barley diets, effect on growth and liver enzymes, rat 217
- Technique, assessment of changes in intestinal absorption mechanisms for dietary sugars with non-metabolizable analogues (glucalogues), rat 435
- Technique, automated colorimetric method for estimating unoxidized and total methionine in protein concentrates 339
- Technique, estimation of body fat from Lee Index, normal and obese mice 83
- Technique, estimation of heat loss using direct calorimetry and heat-flow meters, man 87
- Technique, estimation of rumen heat production from respiratory measurements 239
- Technique, estimation of rumen microbial protein synthesis, <sup>35</sup>S-incorporation method, ruminants 503
- Technique, in vivo estimation of digestibility for laying hen by in vitro method using intestinal fluid of pig 389
- Technique, measurement of chemical availability of iron in foods by in vitro incubation with human gastric juice 413
- Technique, measurement of <sup>65</sup>Zn absorption, rat 189
- Technique, multiple-regression, study of maintenance requirement and efficiency of energy utilization, young pig 305
- Thiamin, dietary, effect on ethanol intake and ethanol metabolism, rat 1
- Thyroxine, rate of utilization, relation to energy intake, effect of dietary composition, pig 525
- Trace elements *see* Copper, Iron, Molybdenum, Zinc
- Transferrin, invalid index of nutritional status in regions with endemic iron-deficiency anaemia 375
- Triglyceride metabolism, relation to dietary tryptophan intake, rat 349
- Tryptophan, dietary intake, effect on fatty acid and triglyceride metabolism, rat 349
- Tryptophan, dietary level, response of enzymes of tryptophan NAD pathway, relation to tryptophan nutritional status, rat 107
- Tryptophan, nutritional status, assessment from urinary excretion of quinolinic acid and N'-methyl-nicotinamide, rat 107
- Undernutrition, effect of rehabilitation on adipose tissue cell numbers, strain differences, rat 27
- Undernutrition, effect of rehabilitation on adipose tissue cellularity, rat 15
- Undernutrition, effect of rehabilitation on cell replication, adipose tissue, rat 33
- Urea, degradation in gastrointestinal tract, relation to plasma urea and rumen ammonia, response to dietary sucrose, cattle 125
- Urea, nitrogen source in sugar-beet-silage diet, effect on rumen and tissue metabolism, bull 229
- Vitamin(s) *see also* Ascorbic Acid, Biotin, Folate, 25-Hydroxyvitamin D, Retinol, Riboflavin, Thiamin, Vitamin B12, Vitamin C, Vitamin D
- Vitamin B12, nutritional deficiency, effect of methionine supplementation on liver folate incorporation rat 235
- Vitamin C, effect on cholesterol content of gall bladder, pregnant guinea-pig 95
- Vitamin D status, effect of diet and sunshine on serum 25-hydroxyvitamin D, sheep 533
- Women 71
- Zinc, deficiency, effect on activity of alkaline phosphatase and its isoenzymes, rat 561
- Zinc, intestinal absorption, measurement of <sup>65</sup>Zn absorption, rat 189
