

MRS Communications

VOLUME 9 • NO 1, 2019

A publication of the

MRS MATERIALS RESEARCH SOCIETY
Advancing materials. Improving the quality of life.

CAMBRIDGE
UNIVERSITY PRESS

MRS COMMUNICATIONS

MRS Communications is a high-impact archival journal focusing on rigorous peer review and rapid publication of completed research with broad appeal to the materials community. Major article types include rapid communications (research letters), “prospectives” papers, correspondence and commentaries.

“Prospectives” are a unique feature of this Journal offering succinct and forward-looking reviews of topics of interest to a broad materials research readership. This modern journal features advanced on-line publication, in full color, acceptance of supplemental materials, and multimedia content. *MRS Communications* leverages the deep technical expertise of leading MRS members among its editorial board and reviewers under the governance of a team of Principal Editors, and the advanced author and reader publication services and academic standing offered by Cambridge Journals.

Manuscript submissions that succinctly describe groundbreaking work in the broad field of materials research are encouraged. Examples of leading topical areas of interest to *MRS Communications* readers include:

- Biomaterials and biomimetic materials
- Carbon-based materials
- Complex oxides and their interfaces
- Materials for energy storage, conversion and environmental remediation
- Materials for nanophotonics and plasmonic devices
- Theory and simulation of materials
- Mechanical behavior at the nanoscale
- Nanocrystal growth, structures and properties, including nanowires and nanotubes
- Nanoscale semiconductors for new electronic and photonic applications
- New materials synthesis, templating and assembly methods
- New topics in metals, alloys and transformations
- Novel and *in-situ* characterization methods
- Novel catalysts and sensor materials
- Organic and hybrid functional materials
- Quantum matter
- Surface, interface and length-scale effects on materials properties

Author queries and submissions

MRS Communications operates a fully online author submission and peer review system, which can be found at <http://mc.manuscriptcentral.com/mrscom>

For questions related to *MRS Communications*, please contact mrc@mrs.org

MRS Communications Article Types

Prospectives

Forward-looking short reviews. Authoritative and balanced, but can deal with controversies or new and speculative areas of research for future consideration.

Research Letters

A concise presentation of a study with broad interest, showing novel results.

Editorials

Opinion piece, policy statement, or general commentary, typically written by board of the publication or a guest of notable stature.

Commentaries

An item whose subject or focus is another article or articles; this article comments on the other article(s).

Correspondence

Letter to the editor/publication, typically commenting upon a published item.

See complete technical descriptions online at www.mrs.org/mrc-article-types

Editor-in-Chief: Rigoberto Advincula, *Case Western Reserve University, USA*

Principal Editors

Luca Dal Negro, *Boston University, USA*

Derek Patton, *University of Southern Mississippi, USA*

Jason Locklin, *University of Georgia, USA*

Alberto Salleo, *Stanford University, USA*

Róisín Owens, *University of Cambridge, United Kingdom*

Shinji Takeoka, *Waseda University, Japan*

MRS Communications Advisory Board

Jodie Bradby, *The Australian National University, Australia*

Horacio Espinosa, *Northwestern University, USA*

A. Lindsay Greer, *Cambridge University, United Kingdom*

Supratik Guha, *Argonne National Laboratory/University of Chicago, USA*

Howard E. Katz, *Johns Hopkins University, USA*

Nicholas A. Kotov, *University of Michigan, USA*

George Malliaras, *Cambridge University, United Kingdom*

Tobin Marks, *Northwestern University, USA*

Andrew M. Minor, *University of California, Berkeley and Lawrence Berkeley National Laboratory, USA*

Linda F. Nazar, *University of Waterloo, Canada*

Kenichi Oyaizu, *Waseda University, Japan*

Ramamoorthy Ramesh, *University of California, Berkeley, USA*

Venkatesan Renugopalakrishnan, *Northeastern University and Boston Children's Hospital, USA*

Henning Riechert, *Paul Drude Institut für Festkörperelektronik, Germany*

Thomas P. Russell, *University of Massachusetts, USA*

Darrel G. Schlom, *Cornell University, USA*

James S. Speck, *University of California, Santa Barbara, USA*

Alec Talin, *Sandia National Laboratory, USA*

Katsuyo Thornton, *University of Michigan, USA*

Vladimir V. Tsukruk, *Georgia Institute of Technology, USA*

Nagarajan (Nagy) Valanoor, *The University of New South Wales, Australia*

Suresh Valiyaveetil, *National University of Singapore, Singapore*

Editorial Office:

Ellen W. Kracht, *Publications Manager, Materials Research Society, Warrendale, PA*

Kirby L. Morris, *Production Assistant, Materials Research Society, Warrendale, PA*

Eileen M. Kiley, *Director of Communications, Materials Research Society, Warrendale, PA*

MRS Communications

Volume 9, Number 1, March 2019

Correspondence

- 1–2 **Highly emitting perovskite quantum dots are finally available in water** Guocan Jiang, Nikolai Gaponik

Prospective Articles

- 3–13 **A perspective on bio-inspired interfacial systems for solar clean-water generation** Rui Feng, Yiming Qiao, Chengyi Song
- 14–26 **Nanoscale magnetization reversal by electric field-induced ion migration** Qilai Chen, Gang Liu, Shuang Gao, Xiaohui Yi, Wuhong Xue, Minghua Tang, Xuejun Zheng, Run-Wei Li
- 27–36 **Graphene nanohybrids for enhanced catalytic activity and large surface area** Sabeen Fatima, S. Irfan Ali, Daniyal Younas, Amjad Islam, Deji Akinwande, Syed Rizwan
- 37–52 **3D models of the bone marrow in health and disease: yesterday, today, and tomorrow** Annamarija Raic, Toufik Naolou, Anna Mohra, Chandralekha Chatterjee, Cornelia Lee-Thedieck
- 53–66 **Versatile applications of three-dimensional objects fabricated by two-photon-initiated polymerization** Cheol Woo Ha, Prem Prabhakaran, Kwang-Sup Lee
- 67–76 **The “Rock of Randomness”: a physical oracle for securing data off the digital grid** Gideon Samid, Gary E. Wnek
- 77–87 **Device processing and junction formation needs for ultra-high power Ga₂O₃ electronics** Fan Ren, J.C. Yang, Chaker Fares, S.J. Pearton

Research Letters

- 88–91 **Direct urea fuel cells based on CuNi-plated polymer cloth as a anode catalyst** Keiichi Kaneto, Mao Nishikawa, Sadahito Uto
- 92–98 **Self-healing liquid-infused surfaces with high transparency for optical devices** Meiling Zhang, Qi Liu, Jingyuan Liu, Jing Yu, Jun Wang
- 99–106 **Deciphering charge-storage mechanisms in 3D MnOx@carbon electrode nanoarchitectures for rechargeable zinc-ion cells** Jesse S. Ko, Martin D. Donakowski, Megan B. Sassin, Joseph F. Parker, Debra R. Rolison, Jeffrey W. Long
- 107–113 **In-silico screening of Pt-based bimetallic alloy catalysts using ab initio microkinetic modeling for non-oxidative dehydrogenation of ethanol to produce acetaldehyde** Fatima Jalid, Tuhin S. Khan, M. Ali Haider
- 114–121 **Highly loaded MXene/carbon nanotube yarn electrodes for improved asymmetric supercapacitor performance** Jong Woo Park, Dong Yeop Lee, Hyunsoo Kim, Jae Sang Hyeon, Monica Jung de Andrade, Ray H. Baughman, Seon Jeong Kim
- 122–128 **Cellulose hydrogel as a flexible gel electrolyte layer** Aswani Poosapati, Eunhwa Jang, Deepa Madan, Nathaniel Jang, Liangbing Hu, Yucheng Lan

- 129–136 **Reliability of inkjet printed silver nanoparticle interconnects on deformable substrates tested through an electromechanical in-situ technique** Martina Aurora Costa Angeli, Tobias Cramer, Beatrice Fraboni, Luca Magagnin, Dario Gastaldi, Pasquale Vena
- 137–143 **Preparation and electrical conductivity of graphitic carbon-infused copper alloys** B. Ma, U. Balachandran, S.E. Dorris, T.H. Lee, A.J. Rondinone
- 144–149 **Vacuum thermal dealloying of magnesium-based alloys for fabrication of nanoporous refractory metals** Maria Kosmidou, Michael J. Detisch, Tyler L. Maxwell, T. John Balk
- 150–158 **Phase separation of a nematic liquid crystal in the self-assembly of lysozyme in a drying aqueous solution drop** Anusuya Pal, Amalesh Gope, Rumani Kafle, Germano S. Iannacchione
- 159–164 **3D printing of poly(vinylidene fluoride-trifluoroethylene): a poling-free technique to manufacture flexible and transparent piezoelectric generators** Nick A. Shepelin, Vanessa C. Lussini, Phillip J. Fox, Greg W. Dicoski, Alexey M. Glushenkov, Joseph G. Shapter, Amanda V. Ellis
- 165–169 **Determination of the barrier height of iridium with hydrogen-terminated single crystal diamond** Yan-Feng Wang, Wei Wang, Xiaohui Chang, Juan Wang, Jiao Fu, Tianfei Zhu, Zongchen Liu, Yan Liang, Dan Zhao, Zhangcheng Liu, Minghui Zhang, Kaiyue Wang, Hong-Xing Wang, Ruozheng Wang
- 170–180 **Interfacial properties of morpholine-2,5-dione-based oligodepsi-peptides and multiblock copolymers** Rainhard Machatschek, Anne-Christin Schöne, Elisa Raschdorf, Ramona B.J. Ihlenburg, Burkhard Schulz, Andreas Lendlein
- 181–188 **Programmable microscale stiffness pattern of flat polymeric substrates by temperature-memory technology** Yi Jiang, Ulrich Mansfeld, Karl Kratz, Andreas Lendlein
- 189–193 **Effect of excessive Pb on the stability and performance of Pb-halide perovskite solar cells against photo-induced degradation** Aditya S. Yerramilli, Yuanqing Chen, T. L. Alford
- 194–202 **Preparation of nanosized porous oxide layers on titanium by asymmetric AC electrolysis in sulfuric acid** Noriyuki Y. Iwata, Shin-ichi Tanaka, Yuriko Fukushima, Gregory Jerkiewicz
- 203–208 **Thermal stability of two-dimensional titanium carbides $Ti_{n+1}C_n$ (MXenes) from classical molecular dynamics simulations** Vadym Borysiuk, Vadym N. Mochalin
- 209–217 **Thermo-mechanical and swelling properties of three-dimensional-printed poly (ethylene glycol) diacrylate/silica nanocomposites** John Ryan C. Dizon, Qiyi Chen, Arnaldo D. Valino, Rigoberto C. Advincula
- 218–223 **Electrochemical characterization of poly(3,4-ethylenedioxythiophene)/κ-carrageenan as a biocompatible conductive coat for biologic applications** Priscila Hernandez-Suarez, Karla Ramirez, Fernando Alvarado, E. Avendano, Ricardo Starbird
- 224–228 **Aluminum oxide free-standing thin films to enable nitrogen edge soft x-ray scattering** Dan Ye, Sintu Rongpipi, Joshua H. Litofsky, Youngmin Lee, Tyler E. Culp, Sang Ha Yoo, Thomas N. Jackson, Cheng Wang, Esther W. Gomez, Enrique D. Gomez
- 229–235 **Polydiacetylene ribbons formed using the controlled evaporative self-assembly (CESA) method** E. Van Keuren, C. Pornrunroj, C. Fu, X. Zhang, S. Okada, H. Katsuyama, K. Kikuchi, T. Onodera, H. Oikawa
- 236–244 **Influence of electrolyte substrates on the Sr-segregation and $SrSO_4$ formation in $La_{0.6}Sr_{0.4}Co_{0.2}Fe_{0.8}O_{3-\delta}$ thin films** Jeffrey C. De Vero, Harumi Yokokawa, Katherine Develos-Bagarinao, Shu-Sheng Liu, Haruo Kishimoto, Tomohiro Ishiyama, Katsuhiko Yamaji, Teruhisa Horita

- 245–250 **A high-quality mechanofusion coating for enhancing lithium-ion battery cathode material performance** Lituo Zheng, T.D. Hatchard, M.N. Obrovac
- 251–257 **Quantification of grain boundary connectivity for predicting intergranular corrosion resistance in BFe10-1-1 copper–nickel alloy** Yinghui Zhang, Xingyu Feng, Chunmei Song, Hang Wang, Bin Yang, Zhigang Wang
- 258–263 **Enhanced tunneling electroresistance effect in composite ferroelectric tunnel junctions with asymmetric electrodes** Z.J. Ma, L.Q. Li, K. Liang, T.J. Zhang, N. Valanoor, H.P. Wu, Y.Y. Wang, X.Y. Liu
- 264–269 **Surface functionalization of polypropylene and polyethylene films with allylamine by γ radiation** M. Pérez-Calixto, G. González-Pérez, N. Dionisio, E. Bucio, G. Burillo, L. García-Uriostegui
- 270–279 **Time and temperature dependent formation of hollow gold nanoparticles *via* galvanic replacement reaction of As(0) and its catalytic application** Imon Kalyan, Tarasankar Pal, Anjali Pal
- 280–287 **Salt-templated platinum–palladium porous macrobeam synthesis** Fred. J. Burpo, Enoch A. Nagelli, Alexander N. Mitropoulos, Stephen F. Bartolucci, Joshua P. McClure, David R. Baker, Anchor R. Losch, Deryn D. Chu
- 288–291 **Influence of doped metal center on morphology and pore structure of ZIF-8** Ahmed Awadallah-F, Febrian Hillman, Shaheen A. Al-Muhtaseb, Hae-Kwon Jeong
- 292–297 **Bimodal nanoporous platinum on sacrificial nanoporous copper for catalysis of the oxygen-reduction reaction** Masataka Hakamada, Yuto Sato, Mamoru Mabuchi
- 298–303 **Magnetoelectric vibrational energy harvester utilizing a phase transitional approach** Margo Staruch, Jin-Hyeong Yoo, Nicholas Jones, Peter Finkel
- 304–309 **Li⁺ ion conductor based on NaBr doped with LiBH₄** Reona Miyazaki, Masatoshi Shomura, Reina Miyagawa, Takehiko Hihara
- 310–314 **Correlation between strain-rate sensitivity and viscous properties derived from dynamic nanoindentation of ultrafine-grained Al–Zn alloys** Nguyen Q. Chinh, Tamás Csanádi, Jenő Gubicza, Ruslan Z. Valiev
- 315–320 **Magnetostructural phase transitions and large magnetic entropy changes in Ag-doped Mn_{1-x}Ag_xCoGe intermetallic compounds** Anil Aryal, Sudip Pandey, Igor Dubenko, Dipanjan Mazumdar, Shane Stadler, Naushad Ali
- 321–326 **PCBM nanoparticles as visible-light-driven photocatalysts for photocatalytic decomposition of organic dyes** Chanon Pornrunroj, Tsunenobu Onodera, Hidetoshi Oikawa
- 327–333 **Development of ionic-imprinted polyesters of diallyl dicarboxylic acids (DAPY) for uranyl ion extraction (UO₂²⁺)** Alejandro Ramos-Ballesteros, Emilio Bucio
- 334–339 **Ferroelectric domain engineering of lithium niobate single crystal confined in glass** Keith Veenhuizen, Sean McAnany, Rama Vasudevan, Daniel Nolan, Bruce Aitken, Stephen Jesse, Sergei V. Kalinin, Himanshu Jain, Volkmar Dierolf
- 340–343 **Cell viability study of green synthesized CdTe/CdSe quantum dots against osteosarcoma cell line for improved therapeutic action** Ncapayi Vuyelwa, Oluwatobi S. Oluwafemi
- 344–351 **Biocompatible methionine-capped CdS/ZnS quantum dots for live cell nucleus imaging** S. Kanagasubbulakshmi, I. Gowtham, K. Kadirvelu, K. Archana

- 352–359 **Corrosion-resistant nickel thin films by electroless deposition in foam of electrolyte** Takahiro Furuhashi, Yoshiyasu Yamada, Masato Hayashi, Shoji Ichihara, Hiroaki Usui
- 360–369 **Numerical investigation of spherical indentation on elastic-power-law strain-hardening solids with non-equibiaxial residual stresses** Taihua Zhang, Wenqiang Cheng, Guangjian Peng, Yi Ma, Weifeng Jiang, Jiangjiang Hu, Heng Chen
- 370–374 **Thermoelectric figure of merit and thermal conductivity of type-I clathrate alloy nanowires** Prabhjot Kaur, Georg K. H. Madsen, Chandan Bera
- 375–380 **Influence of Tantalum on phase stability and mechanical properties of WB₂** Christoph Fuger, Vincent Moraes, Rainer Hahn, Hamid Bolvardi, Peter Polcik, Helmut Riedl, Paul Heinz Mayrhofer
- 381–389 **Elastomer-based MEMS optical interferometric transducers for highly sensitive surface stress sensing for biomolecular detection** Kazuhiro Takahashi, Toshinori Fujie, Reina Teramoto, Isao Takahashi, Nobutaka Sato, Shinji Takeoka, Kazuaki Sawada
- 390–397 **Design, fabrication, and characterization of polycaprolactone (PCL)-TiO₂-collagenase nanofiber mesh scaffolds by Forcespinning** K. del Ángel-Sánchez, N.A. Ulloa-Castillo, Emmanuel Segura-Cárdenas, Oscar Martínez-Romero, Alex Elías-Zuñiga
- 398–405 **Application of iron (III) meso-tetrakis(4-hydroxyphenyl)porphyrin-methylene blue strips for the detection and quantification of H₂O₂ in aqueous and pharmaceutical fluids** Olayemi J. Fakayode, El Hadji Mamour Sakho, Sandile P. Songca, Oluwatobi S. Oluwafemi
- 406–412 **Revealing the deformation twinning nucleation mechanism of BCC HEAs** Zachary H. Aitken, Yong-Wei Zhang
- 413–420 **Bicomponent nanofibrous scaffolds with dual release of anticancer drugs and biomacromolecules** Yu Zhou, Qilong Zhao, Natasha L.Y. Tsai, Min Wang
