Postage *id.*

*Made and printed in Great Britain.*

**routine  
measure  
against**

Many medical superintendents of Mental Hospitals make a routine practice of inoculating new admissions against typhoid and paratyphoid infections.

Effective immunization in this manner is achieved by the suspended vaccine, Anti-Typhoid-Paratyphoid (T.A.B.) *Glaxo*. Grown in a liquid *synthetic* culture medium, the vaccine eliminates unspecific reaction due to foreign proteins and impurities. Prepared from carefully selected, smooth, virulent strains, it gives a highly satisfactory antibody response as shown by agglutination tests in human beings and by the mouse protection test. Reactions are slight and infrequent.

CHARLES BERG, M.D., D.P.M.

### CLINICAL PSYCHOLOGY

This brilliant and detailed review of the whole subject of clinical psychology concludes with a critical analysis of past treatment and revolutionary suggestions for the future. It is a case book of the neuroses and their treatment and cites examples from the simplest worries and anxieties, through increasing severity of stresses, to incipient major disorders. 25s. net.

### DEEP ANALYSIS

The complete analysis of an individual case which throws considerable light upon the working of the human mind. "Can be warmly commended."—*The Practitioner*. 12s. 6d. net.

40 MUSEUM STREET, W.C. 1

# **ELIXIR GABAIL**

(BROMO-VALERIANATE)

**The Ideal Sedative in all Nervous Affections**

Elixir Gabail combines the sedative action of Bromide and Chloral Hydrate with the nervine and anti-spasmodic deodorised Valerianate. Pharmaceutically it is as pleasant and palatable as it is efficacious from the therapeutic standpoint, the disagreeable odour and flavour of the Valerian having been completely removed without in any way impairing its therapeutic value.

**In Hysteria and Psychasthenia it relieves nervous excitement and produces a calm state of mind that is conducive to rapid recovery. It is also of value in states of temporary emotional excitement, in Hypochondriasis and Melancholia.**

**Dosage:** One tablespoonful in water twice or thrice daily. As a hypnotic: two tablespoonfuls in water at bedtime.

Supplied in bottles of 187 c.c. and in bulk for Hospital use.

*Literature and Samples on request.*

**THE ANGLO-FRENCH DRUG Co. Ltd.**  
**11-12, Guilford Street, London, W.C. 1**

TRADE MARK

**'SONERYL'** BRAND  
butobarbitone

*short*  
*sedation to*  
*prolonged narcosis*

One of the advantages of 'Soneryl' is the ease with which, by graduating the dose, the degree of action may be varied from the mildly sedative to the deeply hypnotic.

This is of particular interest in psychiatric practice for it enables the one drug to be used as a hypnotic in all the mental states from simple anxiety to intractable psychosis. It may be given for long periods with the minimal side-effects.

Generally 'Soneryl' is given orally in tablets (grains  $1\frac{1}{2}$  in each), but for cases where it is impracticable to give the drug by mouth, suppositories containing three, five or ten grains of 'Soneryl' are available.

**Supplies:** Tablets in containers of 12, 25, 100 and 500  
Suppositories in boxes of 5
