

## Contents to Volume 123 (2000)

### Volume 123, No. 1, August 2000

Yun Gao: Representations of Extended Affine Lie Algebras Coordinatized by Certain Quantum Tori	1–25
E. P. Van den Ban and H. Schlichtkrull: A Residue Calculus for Root Systems	27–72
Michel Raynaud: Revêtements des courbes en caractéristique $p > 0$ et ordinarité (coverings of curves in characteristic $p > 0$ and ordinaries)	73–88
Colin J. Bushnell et Guy Henniart: Calculs de facteurs epsilon de paires sur un corps local, II (calculations of epsilon factors of pairs for $GL(n)$ of a local field)	89–115
Kevin Houston: Perverse Sheaves on Image Multiple Point Spaces	117–130

### Volume 123, No. 2, September (I) 2000

Olga Kravchenko: Deformation Quantization of Symplectic Fibrations	131–166
Lubomir Gavrilov and Olivier Virolo: The Real Period Function of $A_3$ Singularity and Perturbations of the Spherical Pendulum	167–184
Holger P. Kley: Rigid Curves in Complete Intersection Calabi–Yau Threefolds	185–208
Sai-Kee Yeung: Very Amplenes of Line Bundles and Canonical Embedding of Coverings of Manifolds	209–223
Vesselin Gasharov and Irena Peeva: Deformations of Codimension 2 Toric Varieties	225–242

### Volume 123, No. 3, September (II) 2000

David Ginzburg and Stephen Rallis: The Exterior Cube $L$ -Function for $GL(6)$	243–272
Atsushi Murase and Takashi Sugano: Local Theory of Primitive Theta Functions	273–302

Alain Genestier: Un Modèle Semi-Stable de la Variété de Siegel de Genre 3 Avec Structures de Niveau de Type $\Gamma_0(p)$	303–328
István Heckenberger: Hodge and Laplace–Beltrami Operators for Bicovariant Differential Calculi on Quantum Groups	329–354
Author Index to Volume 123 (2000)	355
Contents to Volume 123 (2000)	357–358
