JFM ARCHIVE

Journal of
Fluid Mechanics
Digital Archive
1956–1996

*Vital research from
the definitive source*

The JFM Digital Archive
contains every article from the
first 40 years of the journal,
scanned and digitised to the
highest standards.

Please speak to your librarian
about gaining access.

Journal of Plasma Physics

Editors

Bill Dorland, University of Maryland Honors College, USA

Alex Schekochihin, University of Oxford, UK

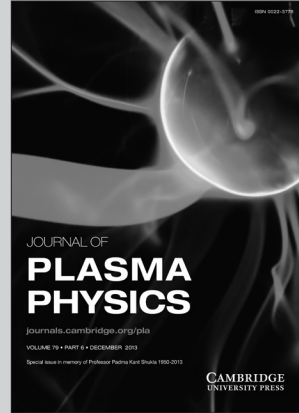

With two new Editors and seven new Associate Editors joining the editorial team *Journal of Plasma Physics* aspires to be the intellectual home of those who think of plasma physics as a fundamental discipline. The journal will particularly focus on publishing research on laboratory plasmas, space physics and plasma astrophysics that takes advantage of the rapid ongoing progress in instrumentation and computing to advance fundamental understanding of multiscale plasma dynamics.

CAMBRIDGE
UNIVERSITY PRESS

- 613 Stability of flow in a channel with longitudinal grooves
H. V. Moradi & J. M. Floryan
- 649 Expansion wave diffraction over a 90 degree corner
I. Mahomed & B. W. Skews
- 665 Model for the initiation of atomization in a high-speed laminar liquid jet
A. Umemura
- 701 Pressure, density, temperature and entropy fluctuations in compressible turbulent plane channel flow
G. A. Gerolymos & I. Vallet
- 747 Reynolds-number-dependent turbulent inertia and onset of log region in pipe flows
C. Chin, J. Philip, J. Klewicki, A. Ooi & I. Marusic
- S* 770 Eigenvalue sensitivity, singular values and discrete frequency selection mechanism in noise amplifiers: the case of flow induced by radial wall injection
S. Cerqueira & D. Sipp
- 800 On the interaction of a planar shock with a light polygonal interface
Z. Zhai, M. Wang, T. Si & X. Luo
- 817 The spontaneous generation of inertia–gravity waves during frontogenesis forced by large strain: theory
C. J. Shakespeare & J. R. Taylor
- 854 Three-dimensional instabilities of quasi-solitary waves in a falling liquid film
N. Kofman, S. Mergui & C. Ruyer-Quil
- 888 Large-eddy simulation study of the logarithmic law for second- and higher-order moments in turbulent wall-bounded flow
R. J. A. M. Stevens, M. Wilczek & C. Meneveau
- 908 Disorganization of a hole tone feedback loop by an axisymmetric obstacle on a downstream end plate
K. Matsuura & M. Nakano
- 943 A dual-tube model for gas dynamics in fractured nanoporous shale formations
I. Lunati & S. H. Lee

JFM Rapids (online only)

- R1 The determination of turbulence-model statistics from the velocity–acceleration correlation
S. B. Pope

S indicates supplementary data or movies available online.

- 1 Mean flow stability analysis of oscillating jet experiments
K. Oberleithner, L. Rukes & J. Soria
- 33 Mixed convection in a horizontal duct with bottom heating and strong transverse magnetic field
X. Zhang & O. Zikanov
- 57 Flow and heat transfer in convectively unstable turbulent channel flow with solid-wall heat conduction
A. Garai, J. Kleissl & S. Sarkar
- 82 An inviscid modal interpretation of the 'lift-up' effect
A. Roy & G. Subramanian
- 114 Weak turbulence theory for rotating magnetohydrodynamics and planetary flows
S. Galtier
- 155 The influence of fast waves and fluctuations on the evolution of the dynamics on the slow manifold
J. P. Whitehead & B. A. Wingate
- 179 The boundary layer instability of a gliding fish helps rather than prevents object identification
A. P. Maertens & M. S. Triantafyllou
- S 208 Interaction of two axisymmetric bodies falling in tandem at moderate Reynolds numbers
N. Brosse & P. Ern
- S 231 Flexibility in flapping foil suppresses meandering of induced jet in absence of free stream
S. Y. Shinde & J. H. Arakeri
- 251 Non-Newtonian stress, collisional dissipation and heat flux in the shear flow of inelastic disks: a reduction via Grad's moment method
S. Saha & M. Alam
- 297 Asymmetric flux models for particle-size segregation in granular avalanches
P. Gajjar & J. M. N. T. Gray
- 330 Fluid migration between confined aquifers
S. S. Pegler, H. E. Huppert & J. A. Neufeld
- 354 Laboratory experiments and simulations for solitary internal waves with trapped cores
P. Luzzatto-Fegiz & K. R. Helfrich
- 381 Parametric subharmonic instability of internal waves: locally confined beams versus monochromatic wavetrains
H. H. Karimi & T. R. Akylas
- 403 Mach number effects on the global mixing modes induced by ramp injectors in supersonic flows
L. Massa
- 432 Influence of Stokes number on the velocity and concentration distributions in particle-laden jets
T. C. W. Lau & G. J. Nathan
- 458 Pressure forces on sediment particles in turbulent open-channel flow: a laboratory study
M. Amir, V. I. Nikora & M. T. Stewart
- S 498 Spectral analogues of the law of the wall, the defect law and the log law
C. Zúñiga Zamalloa, H. C.-H. Ng, P. Chakraborty & G. Gioia
- 514 Rheology of sheared suspensions of rough frictional particles
S. Gallier, E. Lemaire, F. Peters & L. Lobry
- 550 Intermittency in the relative separations of tracers and of heavy particles in turbulent flows
L. Biferale, A. S. Lanotte, R. Scatamacchia & F. Toschi
- 573 Unconfined turbulent entrainment across density interfaces
A. B. Shrinivas & G. R. Hunt
- 599 Analytical results on the role of flexibility in flapping propulsion
M. N. J. Moore
