## Correction

---

In *World's Poultry Science Journal* Volume 57, June 2001, pages 139–156 we published the paper "Potential usefulness of the plumage reducing Naked Neck (Na) gene in poultry production at normal and high ambient temperatures" by C.V. Singh, D. Kumar and Y.P. Singh.

Dr C.V. Singh wishes to make the following corrections:

- (1) Tables 1 and 2 were copied from Merat, *World's Poultry Science Journal* **42**: 124–142.
- (2) Tables 3 and 4 were copied from Cahaner *et al.*, *Poultry Science* **72**: 767–775.

These sources should have been listed and the authors express their regrets at the omissions.
