For Nasal Affections.

“ASTHMOL”

(SYN. Liq. Supraralin Co. Rouse

THE “POCKET” ALL-GLASS NEBULIZER

Suitable for watery and oil solutions. (ROUSE).

For Asthma, Hay Fever, Nasal Catarrh, and inflamed conditions of the mucous membrane.

ASTHMOL is a preparation obtained from the interaction of Supraralin and Atropa derivatives with Hyponitrous Gas in a non-oily solution.

This compound differs materially from many remedies introduced from time to time.

ASTHMOL has been prescribed with remarkable success for Asthma and Hay Fever. It is also exceedingly useful for obscure complaints which centre in the nose and throat.

ASTHMOL is administered either with the special all-glass Pocket Nebulizer, or the “Rouse” Nebulizer, which, producing an extremely fine cloud of vapour, is directed on to the seat of the disease.
