The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY
WALTER HOWARTH

ASSISTED BY
W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

'SCUROFORM'

TRADE MARK

BRAND

*butoform**in tuberculous laryngitis*

'Scuroform' brand butoform, surface anaesthetic, because of its low toxicity, is of particular value in the treatment of tuberculous laryngitis. The product is available in powder and lozenge form. In advanced tuberculous laryngitis the powder, either full strength or in a lactose vehicle, is used for relieving painful ulceration prior to meals.

Supplies:—

Powder, Bottles of 25 Gm.

Lozenges, containers of 40.

Our Medical Information Department will be glad to supply you with further details.

For many years this Company has been engaged in the development of Audiometers. Just prior to the war it introduced the Marconi Acuity Meter, type TF444, regarded by otologists as an important development in the scientific estimation of the degree of deafness, as well as in diagnostic technique.

Of necessity, further work in Audiometry was suspended for some time. The great increase in deafness, however, directly attributable to the war, has necessitated a resumption of activity and the latest Audiometer we are now able to announce has been designed for the widest application, both to-day and in post-war rehabilitation.

A limited number of instruments can be allocated to Hospitals or recognized Institutions, subject to the approval of the appropriate authority.

We shall be pleased to supply particulars of the latest Acuity Meter, type TF444A, on request.

PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

**DeVilbiss
ATOMIZERS**

DROPPER ?

ATOMIZER ?

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper
