

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

JUNE 1972

VOL. 14 PART 3

LONGMAN

INFORMATION FOR CONTRIBUTORS TO *ANIMAL PRODUCTION*

Detailed notes for guidance in the preparation of manuscripts are printed in volume 13, pages ix to xx. A few general points are given below.

Animal Production publishes papers on original research provided that they have not been and, with the exception of authors' summaries, will not be published elsewhere without the Editors' written permission. Authors' summaries can be reproduced if full acknowledgement of the source is made.

Contributions may be in the field of animal production, or in any related scientific field. Reports on techniques will be published only as appendices to scientific papers. Results of research which do not warrant a comprehensive presentation may be submitted for consideration as *Notes*. Notes are not intended for the publication of interim results. They should not exceed 2000 words or the equivalent inclusive of tables and illustrations.

Manuscripts should be typewritten in double spacing with wide margins. Each page and the lines on each page should be numbered. Two copies of the typescript (and of illustrations) should be sent to

Dr. Gerald Wiener,
Animal Production,
A.R.C. Animal Breeding Research Organisation,
West Mains Road, Edinburgh EH9 3JQ, Scotland

Manuscripts are not returned with proofs; authors should therefore retain copies.

Units of measurement. Metric units should be used. SI units will be accepted but are not obligatory.

Symbols and abbreviations. Authors should consult the notes prepared for guidance. Levels of statistical significance which can be indicated without explanation are : * = $P < 0.05$, ** = $P < 0.01$, *** = $P < 0.001$.

Illustrations. The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board, stout tracing paper or plastic film. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

Tables should be as simple and as few as possible. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

AMERICAN SOCIETY OF ANIMAL SCIENCE

PUBLISHERS OF THE MONTHLY

Journal of Animal Science

113 North Neil Street, Champaign, Illinois 61820

The Journal of Animal Science is published monthly by the American Society of Animal Science. It contains papers dealing with livestock production problems and review papers on subjects of general interest to those dealing with livestock production problems. Papers are classified in the table of contents under the following headings: Applied Animal Science, Breeding and Genetics, Meat Science and Muscle Biology, Nonruminant Nutrition, Physiology and Endocrinology, Ruminant Nutrition, and Teaching.

All persons engaged or previously engaged in investigation, instruction or extension in animal production or in the production of livestock products are eligible for membership in the Society. Membership may be obtained after formal application sponsored by one member of the Society in good standing, the payment of dues, and election by the membership committee. The annual membership dues are: U.S. and Canada, \$20.00; South and Central America, \$20.50; other countries, \$21.00; and this includes a subscription to the Journal of Animal Science.

Correspondence concerning subscriptions, purchase of single copies and back issues and related business should be addressed to the Business Manager, Claude Cruse, 425 Illinois Building, 113 North Neil Street, Champaign, Illinois 61820, U.S.A. The subscription price for nonmembers is \$24.00 in the United States and Canada, \$24.50 in the rest of North and South America, and \$25.00 in other places. Checks should be made payable to the American Society of Animal Science. Foreign subscribers are requested to remit by international money order or by a draft on a New York bank.

THE BRITISH COUNCIL

*Ceylon
Commonwealth Educational Co-operation*

THE UNIVERSITY OF CEYLON, PERADENIYA requires a VISITING PROFESSOR or READER/SENIOR LECTURER in DAIRY HUSBANDRY as soon as possible. Candidates for the Reader/Senior Lecturer post should have a first or good second-class honours degree from a university in Britain, or recognised professional qualifications, a postgraduate degree and evidence of research or teaching experience. Candidates for the Visiting Professorship should have a good honours degree, with the above qualifications, and at least ten years university teaching experience.

Salary: £3,934—£5,176 or £3,251—£4,045 per annum according to experience. Married overseas allowances within the following ranges: accompanied £360—£Nil, unaccompanied £245—£Nil, or for lower salary range: accompanied £551—£327, unaccompanied £436—£212. Children's and home education allowances. Income tax refunded if levied. Free furnished accommodation. Outfit grant. Employer's superannuation contribution paid, Medical and insurance scheme. Fares paid for Appointee and family, including mid-tour passages for children in Britain. Assistance with freight and import duty on approved car. Two-year contract.

*Write for further particulars and application form quoting title of post
and reference number 72/OU11 to:—*

PERFORMANCE RECORDING IN SHEEP

by J. B. Owen

With a foreword by J. L. Read

The application of performance recording to sheep has lagged behind that of other forms of livestock production. Recently, however, interest has been growing in the role of recording in increasing efficiency in the production of wool, mutton, and sheep's milk for cheese. In collecting and making available the somewhat scattered information on sheep recording from various parts of the world, Dr. Owen of the School of Agriculture, Cambridge, has performed a most valuable service to an industry which seems to be at the crossroads.

The book opens with a look at the development of performance recording in livestock breeding in general. After a detailed examination of objectives in sheep improvement, the author considers the use of records in achieving these aims. Accounts of recording schemes already operating in sixteen countries are presented. In many cases, passages are quoted from the regulations of organising bodies, which illustrate how they deal with problems of recording under practical flock conditions.

Technical Communication No. 20 of the Commonwealth Bureau of Animal
Breeding and Genetics, Edinburgh.

The British Journal of Nutrition

Volume 27, Number 3, March 1972

CLINICAL AND HUMAN NUTRITION

- Inverse relationship between sugar intake and relative weight
- Energy intake and expenditure of Indian schoolboys
- Relationship between Hess tests and leucocyte ascorbic acid
- Work level, dietary nitrogen intake and sweat losses in a hot climate
- Glucose tolerance and insulin sensitivity in malnourished children
- Seasonal variation in megaloblastic anaemia

GENERAL NUTRITION

- Zinc-protein interaction in chicks and quail
- Effect of nutritive value of proteins on protein synthesis in vitro in rat skeletal muscle
- Use of hydroxyproline analysis to predict protein quality of meats
- Digestion of concentrates in sheep. 4
- Metabolism of linoleic acid by the young lamb
- Mechanisms of heat damage in proteins. 3
- Effect on growth and carcass composition of feeding reconstituted and dried milk to calves
- Growth and development of rats on a low-protein diet
- Metabolism of propane-1: 2-diol infused into the rumen of sheep
- Effect of intravenous infusions of steroulic acid on milk fat synthesis
- Folate nutrition in the kid
- Calculation of heat production from open-circuit calorimetric measurements

£4.00 net (\$12.00 in USA). Annual subscription £18.00 net (\$55.00 in USA) for six issues

CAMBRIDGE UNIVERSITY PRESS

Experimental Agriculture

Volume 8, Number 2, April 1972

- A WILD Mineralisation of Soil Nitrogen at a Savanna Site in Nigeria
 - R. A. SOBULO Studies on White Yam (*Dioscorea Rotundata*) I. Growth Analysis
 - R. A. SOBULO Studies on White Yam (*Dioscorea Rotundata*) II. Changes in Nutrient Content with Age
 - J. L. PEREIRA and H. R. MAPOTHER Overhead Application of Fungicide for the Control of Coffee Berry Disease
 - S. A. ADENIKINJU Effect of Pod Maturity on Bean Development, Viability, Mucilage content and Seedling Vigour in Cacao
 - V. S. KAVADIA, H.C.L. GUPTA and P. C. JAIN Persistence of Gamma BHC (Lindane) and Malathion Residues on Fruits of Bhindi (*Abelmoschus Esculentas* L.) under Indian Conditions
 - H. A. HABISH Aflatoxin in Haricot Bean and Other Pulses
 - D. J. ANDREWS Intercropping with Sorghum in Nigeria
 - FAISAL M ALI and FAROUK A. SALIH Affects of N, P and K on yield of Grain Sorghum in the Central Rainlands of the Sudan
 - D. K. DAS GUPTA Effects of Nitrogen Application of Nitrogen Content of Grains of Swamp Rice in Sierra Leone
 - J. A. RAJARATNAM White Stripe Disorder of Oil Palm (*Elaeis Guineensis*) in Malaysia
 - I. P. ABROL and S. P. DIXIT Studies of the Drip Method of Irrigation
- £2.00 (\$6.50) each. Annual subscription £7.00 (\$23.00) for four issues

STAY ON TOP of what's happening in your field

for only \$3.00 a week!

Tell us what subjects interest you. What authors. What research. Each week we will examine every article in hundreds of the world's key scientific and technical journals as soon as they're published. And each week we'll send you a personal, customized computer report listing everything being published in your area of interest. On a trial basis. For 13 weeks. For \$39.00.

ASCA® (Automatic Subject Citation Alert) helps answer questions like: What are the latest developments in my field? Who else is working on this problem? What companies? What approaches are being investigated? What research is being done in other fields that might affect my own? ASCA tells you the kind of information you need to know . . . the kind of information practically impossible to obtain in any other way.

Best of all, you can put ASCA to work for you for thirteen weeks for just \$39. Mail the coupon below today.
