THE RHODESIAN JOURNAL OF AGRICULTURAL RESEARCH

Vol 16, No. 1

1978

CONTENTS

- Pastures**
 Characteristics of the herbage on offer during continuous and rotational grazing of the Matopos sandveld of Rhodesia, by D. M. Gammon and B. R. Roberts
 The effect of fertilizer nitrogen on the content of hydrocyanic acid, nitrate and some minerals in Star grass (*Cynodon aethiopicus*, Clayton et Harlan), by C. P. Rudert and J. Oliver
- Soils**
 Relations of sorption of molybdate and phosphate by clays and clay loams to soil pH and other chemical factors, by P. D. Tanner
- Soil Fertility**
 The distribution of sulphate and total sulphur in maize plants (*Zea mays* L.) in relation to the diagnosis of deficiency, by Penelope M. Grant and A. W. G. Rowell
- Cotton**
 The effect of a period of darkness on the translocation of ¹⁴C-labelled assimilates from leaves subtending five to ten-day old cotton bolls (*Gossypium hirsutum* L.), by G. G. Rabey and G. C. Bate
- Research Notes**
 Genetic differences in the growth of groundnut (*Arachis hypogaea* L.) pods and kernels, by J. H. Williams and J. C. S. Allison
 Some observations on winter-grown sunflowers (*Helianthus annuus* L.), by M. J. Herring
 Comparison of the effects of side-dressed and preplant nitrogen application on yield and quality of flue-cured tobacco, by W. W. Ryding
 Spatial variation of rainfall intensity in Rhodesia, by J. D. Torrance

The Journal is published twice yearly. The annual subscription is R.\$6.00 (single copies R.\$3.00) for subscribers in Rhodesia, South Africa and adjoining territories and U.S.\$10.00 (single copies U.S.\$5.00) for subscribers elsewhere. These rates include all charges.

Specimen copies are available free of charge to libraries from: THE EDITOR, RHODESIAN JOURNAL OF AGRICULTURAL RESEARCH, P.O. BOX 8108, CAUSEWAY, SALISBURY, RHODESIA.

TROPICAL AGRICULTURE

THE JOURNAL OF THE FACULTY OF AGRICULTURE
(IMPERIAL COLLEGE OF TROPICAL AGRICULTURE)
UNIVERSITY OF WEST INDIES

Volume 55

Number 1

January 1978

Germination and early growth of ginger (*Zingiber officinale* Roscoe). I—Effects of constant and fluctuating soil temperatures

J. P. Evenson, P. J. Bryant and C. J. Asher

Genetic studies of some morpho-physiological characters associated with yield in oil palm (*Elaeis guineensis* Jacq.)

Tan Geok-Yong

Micronutrient status of the St Vincent groundnut (*Arachis hypogaea* L.)

D. Walmsley and R. A. Baynes

Root nitrogen content and transformation in selected grain legumes

L. A. Nnadi and V. Balasubramanian

Comparison of measured and calculated consumptive use of water by savanna grass, *Axonopus compressus* (Swartz) Beauv.

F. A. Gumbs and M. V. Shastry

Pastures and livestock under tree crops in the humid tropics

D. Thomas

The nutritive value of dried leucaena leaf meal from Malawi: studies with young chicks

J. P. F. D'Mello and D. Thomas

Mastitis caused by *Staphylococcus aureus* and certain *Streptococcus* species in five dairy cattle herds in Trinidad, W.I.

Ann F. Walker and H. E. Williams

Viruses in oil palm

R. T. Plumb, A. J. Dabek and Dorothy E. Shaw

Distribution and probable origin of *Mycosphaerella fijiensis* in southeast Asia

R. H. Stover

Methods of desorbing soil phosphate for application to P-desorption isotherm construction

A. Medina and Danilo López-Hernández

Effect of soil moisture content on nitrogen mineralization during incubation of a slightly alkaline Gangetic alluvial soil and an acid red soil from Bangladesh

M. S. Choudhury and A. H. Cornfield

Promotion of flowering in edible aroids by gibberellic acid

S. Alamu and C. R. McDavid

Reduction of chilling injury in avocados stored in sealed polyethylene bags

K. J. Scott and G. R. Chaplin

Annual subscription: £20 (U.K.), £24 (overseas) and \$52 (U.S.A. and Canada)

Published on behalf of the Faculty by

IPC Science and Technology Press Limited

IPC House, 32 High Street, Guildford, Surrey GU1 3EW, England

Headings. The following details should be given at the head of the first sheet: the full title of the paper; a short title for running headlines, not exceeding 48 characters, counting each letter and space as one character; the name(s) of the author(s); the address at which the work was carried out; the present address(es) of author(s), if different from the previous item; and the address(es) to which proofs should be sent (see under 'Proofs' below).

Summary. A short but accurate and informative summary must be included, *not longer than ten lines of typescript*. The preparation of the summary, which requires much care, is not an Editorial responsibility.

Experimentation. This journal specialises in the presentation of data based on up-to-date methods of field experimentation. It is therefore important, where appropriate, that papers should include: an adequate account of experimental lay-outs; a description of treatments and general management; and assessments of experimental variability (e.g. coefficient of variation) and of the statistical significance of the results, specifying the methods used for the analysis (but without showing any details of the calculations). Papers can rarely be accepted if the work was carried out in containers, and/or under glasshouse conditions, unless it forms part of an investigation on field problems. The journal does not normally publish accounts of straightforward trials of pesticides, herbicides or varieties, since such papers are usually of local interest only.

Plates. Illustrations are welcome if they contribute to an understanding of the paper, but will only be accepted if of high quality. Photographs should be provided as unmounted glossy black-and-white prints (colour prints, but not colour transparencies, are acceptable for reproduction in black-and-white; they can only be reproduced in colour if a financial subsidy is provided). If lettering is to be inserted on a print, this should be shown on a spare copy or an overlay, and an unmarked print should be provided for marking by the printer.

Diagrams. Diagrams, including lettering, should be drawn in Indian ink on white drawing paper. Each illustration should bear the name of the author(s) and the figure number, written clearly in the margin or on the back. *On no account should diagrams be submitted on sheets larger than foolscap size.*

Legends. The legends for all illustrations should be given on a separate sheet of paper, clearly marked with the number of each plate or diagram. The ideal position for each diagram should be marked in the text, although it may not be possible to put the illustration exactly in that place. Plates will normally be bound immediately after the end of the paper.

Dating the work. Dates should be given for the beginning event of each experiment. *The journal is reluctant to accept papers submitted more than three years after the end of the relevant experimental work.*

Tables. Each table should be typed on a separate sheet of paper, and its preferred position indicated on the typescript. Each table should be numbered and bear an appropriate title, along the lines normally used for tables in this publication. Contributors are specially asked to avoid presenting tables that are too large to print across the page, hence the limit of 80 typewriter characters referred to earlier.

Use of metric units. All data must be presented in metric units, preferably SI units. Comparable data in local units (e.g. acres, ounces, etc.) may be given in parentheses by the first mention, if authors wish, or factors for converting metric into local units may be given as footnotes. The use of SI units will probably become mandatory at some time in the future.

References. The Harvard system of citation is used throughout as follows: name and initial(s) of author(s); year of publication in parentheses, further distinguished by the addition of small letters a, b, c, etc., where there are citations to more than one paper published by the same author(s) in one year; contracted title of periodicals as given in the World List of Scientific Periodicals; volume number in arabic figures; number of the first page of the paper. In the text, references should be denoted by giving the name of the author(s) with the date of publication in parentheses, e.g. Brown (1937) . . . (Brown, 1937), (Brown, 1927a; Jones and Smith, 1942a, b; Smith *et al.*, 1950). In the list of references all authors' names should be given. **Not more than fifteen papers should normally be cited.**

Referees. All manuscripts are critically reviewed by expert referees, on whose advice the Editor accepts or rejects contributions, or returns them to authors for reconsideration.

Proofs. Two sets of single-sided page proofs will be sent to each author, but it is the responsibility of the senior author to collate the views of his co-author(s) and submit a consolidated set of corrections to the Editor, by returning to him the printer's marked proof (identified by the words 'marked copy') with all required corrections. No further corrected proof will be sent to the author(s), unless this is specially requested. Excessive alterations, other than corrections of printer's errors, may be disallowed or charged to the author.

Offprints. Fifty offprints will be sent free of charge to the author. Where there are two or more authors, all fifty offprints will be sent to the senior author, unless the printer is asked to divide them. Additional offprints may be ordered on the form sent out with the proofs (to the senior author only if there is more than one) provided this is returned to the printer within seven days of its receipt by the author.

Return of manuscript. Where a submission is not accepted for publication the top copy will be returned; manuscripts on thin (air-mail) paper will usually be sent by air but bulky manuscripts from overseas may be returned by surface mail.

EXPERIMENTAL AGRICULTURE

VOLUME 14, NUMBER 2, APRIL 1978

CONTENTS

E. A. Kueneman, G. Hernandez-Bravo and D. H. Wallace: Effects of Growth Habits and Competition on Yields of Dry Beans (<i>Phaseolus vulgaris</i>) in the Tropics	97
W. Y. Chew, K. T. Joseph and K. Ramli: Influence of Soil-applied Micronutrients on Cassava (<i>Manihot esculenta</i>) in Malaysian Tropical Oligotrophic Peat	105
R. Lal, P. R. Maurya and S. Osei-Yeboah: Effects of No-tillage and Ploughing on Efficiency of Water Use in Maize and Cowpea	113
W. Godfrey-Sam-Aggrey and Alex S. Ndoleh: Effects of Alar on Growth, Flowering and Yield of Okra	121
T. F. Demian: The Pull and Lift Required to Remove Cotton Stalks in the Sudan	129
A. M. Hamdoun and A. G. T. Babiker: Effects of Some Herbicides on Cotton Weeds in the Sudan Gezira	137
F. I. O. Nwoke and S. N. C. Okonkwo: Effects of Periodic Removal of Mother Tubers on Yield of <i>Dioscorea rotundata</i>	145
Hassan Suliman Ibrahim: Effects of Irrigating Sugarcane at Different Soil Moisture Deficits in the Sudan	151
W. Y. Chew and M. A. Abdul Malek: Influence of BOH (Beta-hydroxyethylhydrazine) on Pineapple <i>cv</i> Mauritius Grown in Malaysian Peat	157
A. R. Pillay and J. R. Mamet: Intercropping Sugarcane with Maize	161
S. H. Mantell and S. Q. Haque: Incidence of Internal Brown Spot Disease in White Lisbon Yams (<i>Dioscorea alata</i>) During Storage	167
Zahar Samsuddin and Ivan Impens: Water Vapour and Carbon Dioxide Diffusion Resistances of Four <i>Hevea brasiliensis</i> Clonal Seedlings	173
Book Reviews	
Vegetation and the Atmosphere: J. L. Monteith	178
Tropical Soils and Soil Survey: A. Young	178
Tea: T. Eden (3rd ed)	179
Food Crops of the Lowland Tropics: Ed. C. L. A. Leakey and J. B. Wills	179
