The Western World and Japan

By **G. B. Sansom**. The classic analysis of the cultural interaction of the West with Asia—especially Japan—from pre-Christian times. Challenging both Spengler and Toynbee, the author suggests that, although Asia may follow a Western economic pattern, it will never submit to Western precepts in political, social, or religious life. "A book that throws more light on the problems of Asia today than many books specifically devoted to that subject."

The Political Economy of Development

Theoretical and Empirical Contributions

Edited by **Norman Thomas Uphoff** and **Warren F. Ichman**

In this sequel to *The Political Economy of Change*, the editors present their model of the "political economy of development" and bring together previously published studies that contribute to this new, supradisciplinary view of development, more relevant to policy than that usually found in social science literature. The thrust of the book is action-oriented, introducing social science knowledge into the arena of public policy.

Daniel S. Lev

Information and Behavior in a Sikh Village

Social Organization Reconsidered

Murray J. Leaf

The first major study of a Sikh community in Central Punjab to appear in modern anthropological literature. Perhaps because this region has been neglected by social scientists, it presents important paradoxes in terms of accepted generalizations about Indian village life. Instead of attributing these contradictions to social change, the author suggests that they represent a stable, pervasive condition of social life.

Communism in Korea

Robert A. Scalapino and Chong-Sik Lee

In this in-depth study of the origins and evolution of Korean Communism, the authors' basic thesis is that in analyzing the Communist movement, in Korea or in comparable societies, it is necessary to consider three critical variables: Communism, emergence, and tradition. Their use of both historical and social science methods enables them to treat each of these forces definitively.

Her study provides for deeper insights into middle-class life in India than those resulting from the questionnaires and structured interviews of other studies.

THE WEST IN RUSSIA AND CHINA

DONALD W. TREADGOLD

In this two-volume work the development of western thought in Russia and China is examined throughout the whole of modern times up to the Communist revolutions of 1917 and 1949 respectively.

Dr. Treadgold's interpretation offers many new features. The important role of religious ideas is brought to the fore. He considers sympathetically the values of Russian and Chinese culture and the efforts made to incorporate these into various syncretic solutions—solutions which have been severely criticized by certain Russians and Chinese and also by western historians.

THE DYNAMICS OF INDIAN POLITICAL FACTIONS

MARY C. CARRAS

An analysis of factionalism in two rival groups within the dominant Congress Party in Maharashtra, based on interviews with 160 Party members on four district councils.

Dr. Carras' analysis suggests that the factional behavior of the councillors interviewed corresponds with national (or calculable) economic interests, thus challenging a common assumption that Indian political alignments are determined by factors such as personal, family or caste loyalties. As to any sense of Muslim political unity and nationhood as an outcome of British rule, Dr. Hardy shows the limitations and frailty of that by 1947. (*Cambridge South Asian Studies No. 13*) Cloth \$15.50 Paper \$5.95

The Pattern of the Chinese Past

A Social and Economic Interpretation

Mark Elvin. This bold and original work examines the evolution of Chinese society from the second century to the nineteenth in terms of changing patterns in the economics of technology. The author deals in turn with three major questions. First, by what virtue did the Chinese empire remain united when the Roman Empire and all other historic empires ultimately collapsed? Second, what caused the technical revolution that made twelfth-century China the most advanced nation in the world? Finally, why did Sung China's flair for technology disappear and fail to produce the equivalent of the Industrial Revolution in the West? Particular attention is paid to the manner in which economic and military technology both affected and were affected by social and political institutions. \$12.50
