MARGETTS' HORARY TABLES

SIR,—I was particularly interested in D. H. Sadler's article on Margetts' Horary Tables in Volume VI, No. 4, of the *Journal*. In this article he asks for any further information concerning Margetts.

In my bibliography on the art of navigation, I find the following references to two editions of another work by George Margetts.

MARGETTS, G.

Margett's Longitude Tables for Correcting the Effect of Parallax and Refraction on the Observ'd Distance taken between the Moon and the Sun or a Fixed Star, large folding tables, 4to., London, 1790.

MARGETTS, George.

Longitude tables for correcting the effect of parallax and refraction on the distance observed between the moon and the sun, or a fixed star, plates, folio, London 1793.

P.O. Box 112,
Suva, Fiji.

Yours faithfully,
Harold Gatty
