## THE SHAFT GRAVES AND BEEHIVE TOMBS OF MYCENAE AND THEIR INTERRELATION

By Sir ARTHUR EVANS, D.Litt., F.R.S., F.B.A. With 68 Illustrations. 15s. net.

The juxtaposition at Mycenae, in the Beehive Tombs and the Shaft Graves on the Acropolis, of two certainly royal forms of interment has raised a problem which has hitherto puzzled archaeologists. Against the theory that an earlier dynasty were buried in the shaft graves and a later dynasty in the beehive graves (now quite empty of remains), Sir Arthur Evans in his book brings to bear most important evidence derived from his discoveries at Knossos, and puts forward an alternative theory that only one dynasty is concerned, and that at some time of danger the contents of the beehive tombs were transferred for safety to the pits on the citadel. This theory has naturally not at first met with universal acceptance, but in *The Times Literary Supplement* of August 7 Sir Arthur quotes from a letter addressed to him shortly before his death by the eminent German archaeologist, Prof. von Duhn, who wrote that, though he took up the volume "with strong preconceived views as to the beehive tombs being later than the shaft graves," after reading it through twice and weighing the new arguments and remarkable parallels adduced he was led to recognize the truth of its conclusions, which seemed to him and to many other students a discovery which reconciles apparently incompatible phenomena.
