THE JOURNAL OF HYGIENE

EDITED BY

GEORGE H. F. NUTTALL, M.D., PH.D., SC.D., F.R.S.

QUICK PROFESSOR OF BIOLOGY IN THE UNIVERSITY OF CAMBRIDGE

IN CONJUNCTION WITH

JOHN S. HALDANE, M.D., LL.D., F.R.S.,
Late Reader in Physiology in the University of Oxford.

ARTHUR NEWSHOLME, C.B., M.D.,
Medical Officer to the Local Government Board.

CHARLES J. MARTIN, M.B., D.Sc., F.R.S.,
Director of the Lister Institute, London.

J. C. G. LEDINGHAM, M.B., D.Sc.,
Bacteriologist-in-Chief, Lister Institute, London.

G. S. GRAHAM-SMITH, M.D.,
University Lecturer in Hygiene, Cambridge.

M. GREENWOOD, JUNR., M.R.C.S.,
Statistician, Lister Institute, London.

THE UNIVERSITY OF CHICAGO PRESS

The Evolution of Sex in Plants. (The University of Chicago Science Series.) By JOHN MERLE COULTER, Head of the Department of Botany in the University of Chicago.

viii + 140 pages, small, 12mo., cloth; 4s. net.

In this first volume of the new "University of Chicago Science Series" Professor Coulter, the editor of the *Botanical Gazette* and the author of numerous volumes on botanical science, has given a presentation of the results of research showing that all reproduction is the same in its essential features and all methods of reproduction are natural responses to the varying conditions encountered by plants in their life-histories. Sex reproduction, the author says, is simply one kind of response, the sex feature not being essential to reproduction, but securing something in connection with the process. Various phases of the subject discussed include the evolution of sex organs, the alternation of generations, the differentiation of sexual individuals, and parthenogenesis. The last chapter, which offers a theory of sex, reviews the more prominent facts set forth in preceding parts of the volume, and serves both as a summary and a working hypothesis.

In preparation for early publication in the same series with Professor Coulter's book are volumes on *The Origin of the Earth*, by Professor Thomas C. Chamberlin, head of the Department of Geology, and *The Isolation and Measurement of the Electron*, by Professor Robert Andrews Millikan, of the Department of Physics.

Artificial Parthenogenesis and Fertilization. By JACQUES LOEB, Member of the Rockefeller Institute for Medical Research.

x + 312 pages, 12mo., cloth; 10s. net.

The first complete treatment of the subject of artificial parthenogenesis in English. It gives an account of the various methods by which unfertilized eggs can be caused to develop by physio-chemical means, and the conclusions which can be drawn from them concerning the mechanism by which the spermatozoon induces development. Since the problem of fertilization is intimately connected with so many different problems of physiology and pathology, the bearing of the facts recorded and discussed in the book goes beyond the special problem indicated by the title.

A Laboratory Guide in Bacteriology. Revised Edition. By PAUL G. HEINEMANN, of the Department of Hygiene and Bacteriology in the University of Chicago.

xiv + 210 pages, 12mo., cloth; 6s. net.

The *Guide* is confidently offered in the belief that it will commend itself, even more than did the first edition, to elementary students in medical bacteriology, the bacteriology of water and milk, soil bacteriology, and in the study of yeasts and molds. The general course outlined in its pages is suitable alike for students of domestic science and for those who wish to prepare themselves for advanced work in the various branches of bacteriology.

CONTENTS

No. 1 (JULY, 1915).

	PAGE
HEWLETT, R. T. and REVIS, C. On a Complement-stimulating Substance in Cow's Milk	1
BROWNLEE, J. Studies in the Meaning and Relationships of Birth and Death Rates	
II. Density of Population and Death Rate (Farr's Law)	11
III. The Constitution of a Death Rate. (With one Chart)	17
IV. On the Range of Instances in which Geometrical Progressions describe numerically processes of life, i.e. those processes which might be explained by a monomolecular reaction	25
V. On the difficulty that in applying the laws of physical chemistry to life processes, indices occur which suggest the actions of fractions of a molecule	33
RADCLIFFE, J. A. D. Complement Fixation in Pulmonary Tuberculosis	36
MACKINTOSH, J., PENNINGTON, S. and WILLIAMS, R. S. The Supply of Non-tuberculous Dairy Stock	51
HAFFKINE, W. M. Concerning Inoculation against Plague and Pneumonia and the Experimental Study of Curative Methods	64
FLETCHER, W. The Wassermann and Luetin Reactions in Leprosy	102
EWART, R. J. The Influence of Age of the Grandparent at the Birth of the Parent on the Number of Children born and their Sex. (With one Text-figure)	127
TAYLOR, F. E. The Sterilisation of Vaccines; and the Influence of the Various Methods Employed on their Antigenic Properties. (With one Chart)	163

NO. 2 (JANUARY, 1916).

	PAGE
JONA, J. L. A Contribution to the Experimental Study of Fever. (With nine Charts and one Text-figure)	169
GRIFFITH, F. On the Pathology of Bovine Actinomycosis	195
EWART, R. J. The Influence of the Age of the Parent at the Birth of Offspring on the Age at which they are attacked by some of the Zymotic Diseases, with special reference to the Epidemiology of Scarlet Fever. (With two Charts)	208
EASTWOOD, A. and GRIFFITH, F. The Characteristics of Tubercle Bacilli in Human Bone and Joint Tuberculosis	257
EASTWOOD, A. and GRIFFITH, F. The types of Tubercle Bacilli occurring in Tuberculosis of the Human Genito-urinary Tract	310

NO. 3 (SEPTEMBER, 1916).

GREEN, A. B. The Australian Epidemic, 1914	315
SAVAGE, WILLIAM G. and READ, W. J. The Significance of Strepto- cocci in Water Supplies	334
TSURUMI, M. A Contribution to the Study of Amboceptors and Receptors. Second Communication on Heterologous Immunity to Malignant Mouse Tumours	352
Third Communication on Heterologous Immunity to Malignant Mouse Tumours	365
DUKE, H. LYNDBURST. Trypanosomiasis in Northern Uganda. (With Map)	372
HOMER, ANNIE. An Improved Method for the Concentration of Anti- toxic Sera	388
HOMER, ANNIE. A Suggestion as to the Cause of the Lessened Produc- tion of Indol in Media Containing Glucose	401
EASTWOOD, A. Bacteriological Aspects of the Meningococcus Carrier Problem	405

Contents

vii

	PAGE
GRIFFITH, FRED. Identification of the Meningococcus in the Nasopharynx with Special Reference to Serological Reactions	446
SCOTT, W. M. A Study of Meningococci occurring in the Spinal Fluid and of Similar Organisms in the Naso-pharynx	464

NO. 4 (FEBRUARY, 1917).

PRIESTLEY, H. The Mechanism of the Agglutination Reaction	485
NICOLL, W. Flies and Typhoid	505
PHILIP, W. M. and HIRST, L. F. A Report on the Outbreak of the Plague in Colombo. 1914—1916. (With five Maps and one Chart)	527
PIRIE, J. H. HARVEY. Observations on East African Bacillary Dysentery	565
HOMER, A. On Factors Limiting the Extent of the Concentration of Antitoxic Sera by the Fractional Precipitation Methods at present employed	580
INDEX OF AUTHORS	591
INDEX OF SUBJECTS	593
